Digital Games and Mathematics Learning Tom Lowrie,Robyn Jorgensen (Zevenbergen),2015-10-05 Digital games offer enormous potential for learning and engagement in mathematics ideas and processes. This volume offers multidisciplinary perspectives—of educators, cognitive scientists, psychologists and sociologists—on how digital games influence the social activities and mathematical ideas of learners/gamers. Contributing authors identify opportunities for broadening current understandings of how mathematical ideas are fostered (and embedded) within digital game environments. In particular, the volume advocates for new and different ways of thinking about mathematics in our digital age—proposing that these mathematical ideas and numeracy practices are distinct from new literacies or multiliteracies. The authors acknowledge that the promise of digital games has not always been realised/fulfilled. There is emerging, and considerable, evidence to suggest that traditional discipline boundaries restrict opportunities for mathematical learning. Throughout the book, what constitutes mathematics learnings and pedagogy is contested. Multidisciplinary viewpoints are used to describe and understand the potential of digital games for learning mathematics and identify current tensions within the field. Mathematics learning is defined as being about problem solving; engagement in mathematical ideas and processes; and social engagement. The artefact, which is the game, shapes the ways in which the gamers engage with the social activity of gaming. In parallel, the book (as a textual artefact) will be supported by Springer's online platform—allowing for video and digital communication (including links to relevant websites) to be used as supplementary material and establish a dynamic communication space.

Media Education David Buckingham,2003-09-11 This book examines recent changes in media education and in young people's lives, and provides an accessible set of principles on which the media curriculum should be based, with a clear rationale for pedagogic practice. David Buckingham is one of the leading international experts in the field - he has more than twenty years' experience in media education as a teacher and researcher. This book takes account of recent changes both in the media and in young people's lives, and provides an accessible and cogent set of principles on which the media curriculum should be based. Introduces the aims and methods of media education or 'media literacy'. Includes descriptions of teaching

strategies and summaries of relevant research on classroom practice. Covers issues relating to contemporary social, political and technological developments.

Rabbits Rabbits Everywhere Ann McCallum, 2007-02-01 Each week the residents of Chee take a portion of their bountiful crops to the wizard who lives on the hill. One week the Pied Piper decides that the wizard doesn't deserve his full portion. The next day two rabbits appear in a field. The day after that, there are two more rabbits. Each day the number of rabbits increases and they are eating everything in their path. It is up to a young girl named Amanda to save Chee's crops by figuring out the pattern by which the rabbits multiply.

Understanding Mathematics for Young Children Derek Haylock, Anne D Cockburn, 2017-02-08 Having a deep understanding of the mathematical ideas and concepts taught in the classroom is vital as a nursery or primary school teacher. In order for children to get to grips with these concepts, trainee teachers need to be aware of how they come to interpret and understand them. Now in its 5th edition, this essential book helps trainee teachers develop their own knowledge of key mathematical ideas and concepts for the nursery and primary classroom. Now focusing specifically on ages 3-7, it also supports trainees with several age-appropriate classroom activities. As well as updates to further reading suggestions and research focuses, this revised edition includes new content on: Mastery in learning mathematics Simple fractions Roman numerals Money as a form of measurement

The Teacher Development Continuum in the United States and China National Research Council, Policy and Global Affairs, Board on International Scientific Organizations, U.S. National Commission on Mathematics Instruction, 2010-10-28 In 1999, Liping Ma published her book *Knowing and Teaching Elementary Mathematics: Teachers' Understanding of Fundamental Mathematics in the United States and China*, which probed the kinds of knowledge that elementary school teachers need to convey mathematical concepts and procedures effectively to their students. Later that year, Roger Howe, a member of the U.S. National Commission on Mathematics Instruction (USNC/MI), reviewed the book for the *Notices of the American Mathematical Society*, concluding that it 'has lessons for all educational policymakers.' Intrigued by the idea of superrank teachers, the USNC/MI sponsored a workshop entitled 'The Teacher Development Continuum in the United States and China'. The purpose of the workshop was to examine the structure of the mathematics teaching profession in the United States and China. The main presentations and discussion from the workshop are summarized in this volume.

Legends of Lhiosquor Trent Coleman, 2014-04 This first book in the After Eden series chronicles the rise of nations from the descendants of Cain and the descendants of Seth. When a branch of Cain's line gives rise to the abominable race of Giants, Seth and his followers lay the foundations of the great city of Lhiosquor. With divine help, the people of Lhiosquor manage to prevent the first generation of Giants from subjugating the human race. However, it is not long before decisions made by some of Seth's descendants set in motion a prophesied sequence of catastrophic events. A new generation of Giants arises, threatening to destroy the City of Light from without as the ambition and machinations of the powerful threaten it from within. At this time, God raises up the prophet Enoch. Descended from both the line of Seth and the line of Cain, Enoch presents a choice to the people of Lhiosquor and all other free peoples of the world: acknowledge God and receive His favour, or fall to the cruel dominion of the Giants.

I Got this Hat Jol Temple, Kate Temple, 2014 From the brilliant team behind PARROT CARROT and MIKE I DON'T LIKE comes a very clever and funny rhyming tale about the surprisingly large world of hats. I GOT THIS HAT is the National Simultaneous Storytime book for 2016! 'I got this hat in China. I got this hat from a miner. I got this hat from a deep-sea diver. I got this hat from a racing-car driver...' Hats. Only the headless dislike them. Everyone else loves wearing them! If you enjoy wearing hats, you'll enjoy this book. But please don't wear it as a hat. It will fall off. Find the FREE app at
