Britain and the Narration of Travel in the Nineteenth Century Kate Hill, 2017-05-15 Interrogating the multiple ways in which travel was narrated and mediated, by and in response to, nineteenth-century British travelers, this interdisciplinary collection examines to what extent these accounts drew on and developed existing tropes of travel. The three sections take up personal and intimate narratives that were not necessarily designed for public consumption, tales intended for a popular audience, and accounts that were more clearly linked with discourses and institutions of power, such as imperial processes of conquest and governance. Some narratives focus on the things the travelers carried, such as souvenirs from the battlefields of Britain's imperial wars, while others show the complexity of Victorian dreams of the exotic. Still others offer a disapproving glimpse of Victorian mores through the eyes of indigenous peoples in contrast to the imperialist vision of British explorers. Swiss hotel registers, guest books, and guidebooks offer insights into the history of tourism, while new photographic technologies, the development of the telegraph system, and train travel transformed the visual, aural, and even the conjugal experience of travel. The contributors attend to issues of gender and ethnicity in essays on women travelers, South African travel narratives, and accounts of China during the Opium Wars, and analyze the influence of fictional travel narratives. Taken together, these essays show how these multiple narratives circulated, cross-fertilised, and reacted to one another to produce new narratives, new objects, and new modes of travel.

The travelogues reflect the colorful diversity of the genre, presenting the experiences of individuals and groups from China to Great Britain. The spotlight falls on interdependencies of travel writing and historiography, geographic spaces, and specific practices such as pilgrimages, the hajj, and the harem. Other points of emphasis include the importance of nationalism, the place and time of printing, representations of fashion, and concepts of masculinity and femininity. By displaying close, comparative, and distant readings, the volume offers new insights into perceptions of otherness, the circulation of knowledge, intermedial relations, gender roles, and digital analysis.

Border Regimes in Twentieth Century Europe Péter Bencsik, 2022-08-19 This book offers a comprehensive and comparative analysis of the history of passports, border surveillance, border crossing, and other elements of European border regimes in the 20th century. Border regime is interpreted widely, including inbound and outbound travels, permanent and temporary movements, distance and local border traffic, borderland fortifications, penalties for borderland offences, and also restrictions of free movement, even inside a given country. Based on archival sources from Hungary and the Czech Republic, extensive literature and more than two decades of research, the author distinguishes between two basic border regimes: the restrictive eastern and the permissive western systems, and a transitional zone between them. The historical development of these regimes is discussed in the framework of waves of globalisation and territorialisation. *Border Regimes in Twentieth Century Europe* offers the first-ever systematic comparison of European border regimes for students, scholars, and any readers who are interested in travel history, border studies, globalisation, area studies and 20th century Europe, including everyday history. By presenting their different historical experiences, the book contributes to a better understanding between old and new member states of the European Union, as well as between member and non-member states.

The Statute of the International Court of Justice Andreas Zimmermann, Karin Oellers-Frahm, Christian Tomuschat, Christian J. Tams, 2012-10-11 The International Court of Justice is the principal judicial organ of the United Nations and plays a central role in both the peaceful settlement of international disputes and the development of international law. This comprehensive Commentary on the Statute of the International Court of Justice, now in its second edition, analyses in detail not only the Statute of the Court itself but also the related provisions of the United Nations Charter

as well as the relevant provisions of the Court's Rules of Procedure. Five years after the first edition was published, the second edition of the Commentary embraces current events before the International Court of Justice as well as before other courts and tribunals relevant for the interpretation and application of its Statute. The Commentary provides a comprehensive overview and analysis of all legal questions and issues the Court has had to address in the past and will have to address in the future. It illuminates the central issues of procedure and substance that the Court and counsel appearing before it face in their day-to-day work. In addition to commentary covering all of the articles of the Statute of the ICJ, plus the relevant articles of the Charter of the United Nations, the book includes three scene-setting chapters: Historical Introduction, General Principles of Procedural Law, and Discontinuation and Withdrawal. The second edition of the Commentary adds two important and instructive chapters on Counter-Claims and Evidentiary Issues. The combination of expert editors and commentators, and their assessment of new developments in the important work of the ICJ, make this a landmark publication in the field of international law.

The Cairo Genizah and the Age of Discovery in Egypt Rebecca J. W. Jefferson, 2022-01-27 The Cairo Genizah is considered one of the world's greatest Hebrew manuscript treasures. Yet the story of how over a quarter of a million fragments hidden in Egypt were discovered and distributed around the world, before becoming collectively known as "The Cairo Genizah," is far more convoluted and compelling than previously told. The full story involves an international cast of scholars, librarians, archaeologists, excavators, collectors, dealers and agents, operating from the mid-nineteenth to the early twentieth century, and all acting with varying motivations and intentions in a race for the spoils. Basing her research on a wealth of archival materials, Jefferson reconstructs how these protagonists used their various networks to create key alliances, or to blaze lone trails, each one on a quest to recover ancient manuscripts. Following in their footsteps, she takes the reader on a journey down into ancient caves and tombs, under medieval rubbish mounds, into hidden attic rooms, vaults, basements and wells, along labyrinthine souks, and behind the doors of private clubs and cloistered colleges. Along the way, the reader will also learn about the importance of establishing manuscript provenance and authenticity, and the impact to our understanding of the past when either factor is in doubt.

Test Tube Envy J. Andrew Brown, 2005 The scientific disciplines considered range from nineteenth-century phrenology and ethnography to twentieth-century chemistry, quantum mechanics, cybernetics, and chaos theory. In so doing, Brown critically engages the work of Foucault and other social and philosophical theorists as he examines the ways in which scientific prestige is manufactured and appropriated on the literary stage.--Jacket.

The scientific dialogue linking America, Asia and Europe between the 12th and the 20th Century. Fabio

D'Angelo,2018-06-11 The first volume of Viaggiatori “Curatele” series seeks to recreate some scientific dialogues, namely meetings, exchanges and acquisition of theoretical and practical scientific knowledge, thus linking the cultural, historical and geographical context of America, Asia, Europe and Mediterranean Sea between the 16th and the 20th century. More specifically, the main objective is to consider the role of travellers as passeurs, as “intermediaries” for building and allowing the circulation of knowhow and the practical and theoretical knowledge from one continent to another.

The Dynamics of Technology Roddam Narasimha,J Srinivasan,S K Biswas,2003-12-06 `This is a good book for a general reader to understand the inter-relationship between science, technology and society and particularly the contribution made by engineers towards technology development' - Technovation This volume, a collection of 10 essays by leading practitioners from both east and west, shows how technology, which has become a major force in our lives today, is itself like a powerful engine. The creation and maintenance of this engine depends on engineers, on ideas from science, research and development, on the pressures and constraints of the market place and national security, on the skills and knowledge of manpower and on the financial resources that banks, governments and other institutions can command and provide. This book does not expound any one point of view. Rather, it tries to understand how the engine of technology works, how it is a complex system whose working is shaped by political, economic, social and cultural forces and in turn shapes them.

Beyond: Our Future in Space Chris Impey,2015-04-13 “Expansive and enlightening. . . Impey packs his prose with wonderful anecdotes and weird factoids.”—New York Times Book Review Human exploration has been an unceasing engine of technological progress, from the first homo sapiens to leave our African cradle to a future in which mankind promises to settle another world. Beyond tells the epic story of humanity leaving home—and how humans will soon thrive in the vast universe beyond the earth. A dazzling and propulsive voyage through space and time, Beyond reveals how centuries of space explorers—from the earliest stargazers to today’s cutting-edge researchers—all draw inspiration from an innate human emotion: wanderlust. This urge to explore led us to multiply around the globe, and it can be traced in our DNA. Today, the urge to discover manifests itself in jaw-dropping ways: plans for space elevators poised to replace rockets at a fraction of the cost; experiments in suspending and reanimating life for ultra-long-distance travel; prototypes for solar sails that coast through space on the momentum of microwaves released from the Earth. With these ventures, private companies and entrepreneurs have the potential to outpace NASA as the leaders in a new space race. Combining expert knowledge of astronomy and avant-garde technology, Chris Impey guides us through the heady possibilities for the next century of exploration. In twenty years, a vibrant commercial space industry will be operating. In thirty years, there will be small but viable colonies on the Moon and Mars. In fifty years, mining technology will have advanced enough to harvest resources from asteroids. In a hundred years, a cohort of humans born off-Earth will come of age without ever visiting humanity’s home planet. This is not the stuff of science fiction but rather the logical extension of already available technologies. Beyond shows

that space exploration is not just the domain of technocrats, but the birthright of everyone and the destiny of generations to come. To continue exploration is to ensure our survival. Outer space, a limitless unknown, awaits us.

Bush Wives and Girl Soldiers Chris Coulter,2011-03-15 During the war in Sierra Leone (1991-2002), members of various rebel movements kidnapped thousands of girls and women, some of whom came to take an active part in the armed conflict alongside the rebels. In a stunning look at the life of women in wartime, Chris Coulter draws on interviews with more than a hundred women to bring us inside the rebel camps in Sierra Leone. When these girls and women returned to their home villages after the cessation of hostilities, their families and peers viewed them with skepticism and fear, while humanitarian organizations saw them primarily as victims. Neither view was particularly helpful in helping them resume normal lives after the war. Offering lessons for policymakers, practitioners, and activists, Coulter shows how prevailing notions of gender, both in home communities and among NGO workers, led, for instance, to women who had taken part in armed conflict being bypassed in the demilitarization and demobilization processes carried out by the international community in the wake of the war. Many of these women found it extremely difficult to return to their families, and, without institutional support, some were forced to turn to prostitution to eke out a living. Coulter weaves several themes through the work, including the nature of gender roles in war, livelihood options in war and peace, and how war and postwar experiences affect social and kinship relations.
