Protecting the Global Environment Gary C Bryner, 2015-11-17 Gary Bryner's brief, readable, capstone book: Features a forward by Mark A. Boyer Outlines the major environmental challenges facing the world today Applies international relations theory to these challenges Covers such key topics as development, sustainability, and market capitalism Offers a social justice perspective to environmental problems and solutions Borne of an amalgam of social science, fieldwork, and a passionate commitment to justice, this book brings debates about climate change to a new level, compelling readers and researchers to rethink the reasons for reversing global environmental trends. The book lays out three inspirations for improving environmental prospects: effective markets, sustainable development, and environmental justice for the most vulnerable. It also projects three possible scenarios flowing from the success or failure of these inspirations one bleak, one breakthrough, and one of status quo. Gary Bryner is not sanguine about humanity's ability to make the right choices, but this does not deter him from asking us to think beyond our own generation and our own species in urging environmental action now.

Interculturalism, Society and Education, 2010-01-01 In no part of the world today is the concept of intercultural exchange a novelty, and in many parts of the world it has even been a long tradition. Nevertheless, recent globalization forces have combined to accelerate many aspects of migration and intercultural confrontation. As a result, we see an emerging world society in which intercultural mixing and conflict are salient characteristics, rather than being exceptional situations or embryonic phases of societal development. The need for intercultural education and for intercultural dialogue in various forms has become universal. All people have an obligation to participate in- and take responsibility for- world peace, balanced sustainable development, and democratic dialogue to create “the capacity to live together.” Persistent and increasingly complex patterns of population movement, with all of the societal ramifications that accompany them, demand consideration of ways in which different societies respond to issues of intercultural education and dialogue, both historically and currently. Interculturalism, Society and Education contains contributions that explore comparative and international case studies ranging from accounts of educational problems impacting specific immigrant groups in Europe, socio-educational programs and projects in Africa and Asia, comparative analyses of “citizenship education” issues in selected countries, and a global overview of different patterns of the interculturalism-society-education nexus. This volume offers a sampling of the multiplicity of intercultural forms around the world, useful for policy-makers and educators across the spectrum of institutions and organizations that strive to open paths for positive intercultural exchange through education.

Globalization Lui Hebron, John F. Stack Jr., 2016-09-22 Now in a fully revised and updated edition, this balanced and clearly written text explores globalization and its impact from economic, political, social, environmental, and cultural

perspectives. Providing a framework and platform for student learning, the book gives readers the tools to unravel the complexities of globalization in all its facets. Lui Hebron and John Stack note that as a hot-button term, globalization is used to describe any number of changes within, among, and between societies and states. Their goal is to reduce the noise engulfing debates and interpretations of one of the most dynamic, contested, applauded, and disparaged phenomena of the twenty-first century. Arguing that current assessments—both positive and negative—of globalization are overblown, the authors treat the dramatically changing landscapes of world politics as less a revolution than an evolution of already established structures and patterns of transnational relations. They trace how globalization has affected individuals, societies, states, and intergovernmental and supranational organizations. Making sense of a world seemingly smaller and incomprehensibly larger, simultaneously centralizing and fragmenting, *Globalization: Debunking the Myths* offers both an indispensable introduction for undergraduates and a concise review for more advanced students.

Child Rights Education for Participation and Development Murli Desai, Sheetal Goel, 2018-08-27 The aims of child rights education are to make children and their primary duty-bearers aware of child rights so that they both can be empowered to together advocate for and apply them at their family, school and community levels. This sourcebook focuses on child rights education for primary prevention with reference to participation and development. The introductory chapter covers child rights values of peace, dignity, tolerance, freedom, equality and justice and child rights principles of dignity of the child, primary consideration to the best interests of the child, universality and non-discrimination, and state and societal accountability. Child rights to participation focuses on child rights for playing a decisive and responsible role in their own life and a participatory role in the family, schools, associations, community and with the state as citizens. Child rights to development includes child rights to free, compulsory, comprehensive and quality education, free of discrimination and violence; child rights to play, recreational, cultural, and artistic activities and media literacy; child rights to health with reference to physical health and hygiene, healthy and hygienic food and nutrition, sexual health and prevention of substance abuse; and child rights to environmental education with reference to child rights to environmental harmony and hygiene and child rights to sustainable environment. This is a must-read for researchers, trainers, and other professionals working on child rights issues across the world, and especially in developing countries.

Reconceptualizing English Education in a Multilingual Society Isabel Pefianco Martin, 2018-03-01 This book brings together chapters that describe, investigate, and analyze the place of English in education in multilingual Philippines. Unlike most studies on languages in education, which take a neutral, de-contextualized stance, this volume takes a pluricentric view of the English language by positioning it in relation to its varieties, as well as to other languages in the country. Because of the changing realities of English in the Philippines, traditional assumptions about the language as monolithic and unchanging, as well as about how it should be taught and learned, need to be revisited and re-conceptualized.

One Health and Zoonoses John S. Mackenzie, Martyn Jeggo, 2019-08-19 The One Health concept recognizes that the health of humans, animals, and their ecosystems are interconnected, and that a coordinated, collaborative, multidisciplinary, and cross-sectoral approach is necessary to fully understand and respond to potential or existing risks that originate at the animal-human-ecosystems interfaces. Thus, the One Health concept represents a holistic vision for addressing some of the complex challenges that threaten human and animal health, food safety, and the environments in which diseases flourish. There are many examples showing how the health of humans is related to the health of animals and the environment. Diseases shared between humans and animals are zoonoses. Some zoonoses have been known for many years, whereas others have emerged suddenly and unexpectedly. Over 70% of all new emerging diseases over the past few decades have been zoonoses that have emerged from wildlife, most often from bats, rodents, or birds. Examples of zoonoses are many and varied, ranging from rabies to bovine tuberculosis, and from Japanese encephalitis to SARS. Clearly, a One Health approach is essential for understanding their ecology, and for outbreak response and the development of control strategies. However, the One Health concept and approach is much broader than zoonoses; it extends to including antimicrobial resistance, food safety, and environmental health and, consequently, impacts on global health security, economic wellbeing, and international trade. It is this breadth of One Health that connects the papers in this Special Issue.

Migration and Forced Displacement - Vulnerability and Resilience - Volume 1 Samson Maekele Tsegay, 2024-11-06

Migration has been one of the contested topics among scholars and politicians throughout the world. Similarly, the experiences of refugees, asylum seekers, and migrants have been different as they are influenced by race, gender, class, and geographical location. This book explores the experiences of international migrants, including the challenges they face from nation-states, environmental issues, and sociocultural factors. It consists of chapters that discuss the causes and effects of migration, the role of nation-states, and the environment. Moreover, the book covers gender and family relations and the relationship of refugees and migrants with the host population and the socio-cultural and economic integration of migrants. Overall, the book argues that international migrants, particularly refugees and asylum seekers, are among the most vulnerable groups in the world. However, they use various strategies to overcome their vulnerability and become resilient in the face of adversity. Hence, the book contributes to increasing people's awareness of migration and the experiences of refugees, asylum seekers, and migrants. It can also be a significant source for initiating further debate and academic discussion on issues of migration and forced displacement, vulnerability, and resilience.

A Philosophical Inquiry into Subject English and Creative Writing Oli Belas, 2022-11-18 While engaging with the current political-educational climate of England, this book offers a timely contribution to debates around questions of knowledge in relation to education and school-level English by drawing together theories of individual and disciplinary knowledge. The book provides a philosophical conception of knowledge - as fundamentally embodied at the level of the individual, and a matter of cultural form at the level of shared or common knowledge - and an analysis of the implications of this for schooled English. The research draws from various related fields including literary criticism, philosophy (of knowledge and of symbolic form), and phenomenology. The book rethinks general notions of knowledge and lays out the problems that exist within knowledge and language systems in education, especially secondary and university levels. This highly relevant and informative book offers an insightful resource for academics, researchers, and post-graduate students in the fields of education studies, educational policy and politics, philosophy of education, and literature studies.

Democracy and Peacebuilding in the Framework of SDG 16+ Luis José Consuegra, 2020-03-23 The scale, ambition

and approach of the Agenda 2030 for Sustainable Development, and its SDG framework, are unprecedented. The SDGs are global in nature and universally applicable; they consider national contexts, capacities, and levels of development and challenges. SDG 16 was developed from the need to ensure proper actions towards achieving peace, justice and strong institutions to support and guarantee the sustainability of the entire development structure; the national contexts are the basis for its advancement. Global and regional organizations have an important role to play in achieving SDG 16. They can provide support, expertise and knowledge products, and bring together best practices and lessons learned to the operational levels, to better inform all stakeholders for a better, effective, collaborative and coordinated decision-making process. This Discussion Paper was developed with input gathered from official key partner organizations that attended several gatherings to discuss the role of global and regional organizations in the advancement of SDG 16, held using the platform provided by the Inter-Regional Dialogue on Democracy at International IDEA.

English in Southeast Asia and ASEAN Azirah Hashim, Gerhard Leitner, 2020-11-16 English in Southeast Asia and ASEAN embeds English in its various regional Southeast Asian and political ASEAN language habitats. Addressing the history, developmental stages and contacts with other languages, it provides in-depth information on the region and its political organization. In doing so, it analyzes the geo-political division of the region between former Anglophone and non-Anglophone colonies and shows that this distinction has led to considerable differences in the status and texture of English. This analysis includes the role and impact of American English in mainland and maritime Southeast Asia to highlight the linguistic properties of English and its linguistic and sociopolitical development, English used in specific domains, language policies and concludes with the future of English and future challenges. This book therefore provides an integrative survey of the various roles of English in ASEAN member states and studies the transformation of entire language habitats, including the major national and regional languages that participate in this process. It also explains how new societies emerge with their conflicting identities and their aspirations to act regionally or even globally and is a valuable resource for scholars and students in the fields of World Englishes, Asian Studies and those interested in language contact, policy and planning.

Global Learning and International Development in the Age of Neoliberalism Stephen McCloskey, 2021-10-13 This book argues that the international development sector is in crisis which can be mostly sourced to its side-stepping the dominant development question of our age, the neoliberal growth paradigm. It argues that this crisis can be addressed, at least in part, by the sector's re-engagement with the radical development education process that it helped to foster and sustain for over two decades. The recent safeguarding scandal is symptomatic of a sector that is becoming overly hierarchical, brand conscious and disconnected from its base. This book argues that many of the problems the sector is facing can be sourced to its failings in grappling with the question of neoliberalism and formulating a coherent critique of how market orthodoxy has accelerated poverty in the global North and South. This book recommends re-embracing the radical origins of global learning, situated in the participative methodology and praxis (reflection and action) of Paulo Freire, both as internal capacity-building and external public engagement. The book proposes a new development paradigm, focusing on bottomup, participative approaches to policy-making based on the needs of those NGOs claim to represent - the poor, marginalised and voiceless - rather than constantly following the agenda of donors and governments. The recommendations made by this book will serve as an important resource for researchers and students of international development and global learning, as well as to NGOs, civil society activists and education practitioners looking for solutions to the problems within the sector.

Jesus "The Way, The Truth and The Life" Thd Bish, 2011 Jesus - The Way, The Truth and The Life will prove that Jesus is the only Way to God, the very embodiment of all Truth and the very essence of Life, just as He declared of Himself in the fourteenth chapter and sixth verse of the gospel of John by saying, I am the way, the truth, and the life and that no one comes to the Father except through Me. This book will show using systematic theology, proofs and truth arguments that Jesus is exactly who He says He is, confirmed by God the Father, the Holy Spirit and by Christ Himself. Jesus said in Mark 8; 27 of scripture Who do you say I Am. This book will make it obvious why you must answer this pointed question just as Peter did in claiming to Jesus that You are the Christ, the Son of the Living God. Time is getting short and Jesus is on His way back to earth. It's not a time to be confused or wrong on issues having eternal consequences. Though the book reads as a college textbook it forces you to think and study the word of God. The book is most valuable in a curriculum setting or for those interested in Christian apologetics. Jesus is compared to a myriad of other secular philosophies both past and present and as a result it is conclusively obvious that Jesus is the way, truth and the life and all others are false. This book stands on the foundation that a relationship with God thru Christ is by faith alone (Sola Fide), by grace alone (Sola Gratia), by Christ alone (Solus Christus), by scripture alone (Sola Scriptura) and with glory to God alone (Soli Deo Gloria). Dr. Ronald N Bish, ThD. received his Doctorate from Freedom Bible College in Systematic Theology and Apologetics and also holds a Master Degree

in Mechanical Engineering. For further information contact www.ronaldbish.com.

Caste, COVID-19, and Inequalities of Care Sanghmitra S. Acharya, Stephen Christopher, 2022-03-01 This book explores how social discrimination in South Asia contributes to health disparities and impedes well-being. Specifically, it addresses how marginalization shapes health outcomes, both under normal circumstances and specifically during the COVID-19 pandemic. Coming from diverse backgrounds and representing different academic disciplines, the authors have contributed a range of chapters drawing from quantitative and ethnographic material across South Asia. Chapters address reservation politics, tribal lifeways, Dalit exclusions from governmental institutions, Muslim ghettoization, gendered domestic violence, social determinants of health among migrant workers, and the pandemic fallout across South Asian society, among other subjects. Scholars draw on decades of experience and firsthand ethnographic fieldwork among affected communities. The chapters provide an innovative analysis, often in real time, of the human toll of casteism, classism, patriarchy, and religious intolerance—many set against the spectre of COVID-19. Many authors not only present social critiques but also offer specific policy recommendations. The book is of great interest to social scientists, public health practitioners, and policy advocates interested in addressing systemic inequalities and ensuring that future pandemics are not disproportionately felt by the most vulnerable.
