Cómo hacer un proyecto de investigación Raúl Tafur,Manuel Izaguirre,2022-02-04 Aunque las universidades ofrecen asignaturas, seminarios y talleres de tesis, no se logra que un número considerable de estudiantes alcance su primer grado con la opción investigación. Es que hacer una tesis es una empresa difícil para los estudiantes. La gran masa de estudiantes no logra hacer una tesis y esto ocurre primero porque hacer un proyecto exige el dominio de una diversidad de disciplinas: la lógica, la metodología, la estadística, la epistemología que no son conocidas ni manejadas adecuadamente por los tesistas. Por otro lado, hacer un proyecto de tesis exige el conocimiento y manejo de técnicas y estrategias adecuadas, las cuales no están dentro de las competencias de los estudiantes, lo que se aprecia al observar los currículos en las diversas carreras universitarias. Pese a que las universidades organizan seminarios y talleres de tesis, las debilidades indicadas subsisten.

La obra comprende 16 capítulos englobados en tres áreas temáticas denominadas Elementos socioambientales en las unidades de producción familiar, Análisis de elementos

para el desarrollo de capacidades y bienestar de los pequeños productores y Oportunidades y limitaciones en la producción agropecuaria regional. Aspectos metodológicos en la investigación odontológica Sergio Sánchez García, Erika Heredia Ponce, Javier de la Fuente Hernández, María del Carmen Villanueva Vilchis, Laura Bárbara Velázquez Olmedo, 2024-10-14 El libro proporciona las bases científicas y las aplicaciones de los diseños de investigación que se pueden emplear en el estudio de las enfermedades bucales, así como la planificación, la ejecución y el análisis de resultados de los trabajos de investigación. La investigación debe ser integrada de forma sistematizada, estructurada, lógica y objetiva para que sea posible obtener datos válidos y confiables que permitan el avance en el conocimiento. Además, se debe cumplir con las exigencias indispensables en cuanto a novedad, actualidad, originalidad en el tratamiento del tema, fundamentación científica y alcances en la práctica como contribución a los procesos de cambio. Para realizar una investigación se debe tomar en cuenta el conocimiento que se ha construido previamente, ya que forma parte de una estructura teórica ya existente. El marco teórico implica analizar teorías, investigaciones y antecedentes para ayudar al análisis y la solución del problema a investigar. En este libro también se podrá encontrar lo que es un diseño de estudio con enfoque epidemiológico y la importancia de conocer sus características básicas, para elegir correctamente la opción que mejor se adecúe para responder la pregunta de investigación que se pretende abordar.

Metodología de la investigación Héctor Daniel Lerma González, 2022-08-31 Cuando un docente, estudiante o investigador desea llevar a cabo una investigación necesita tener a la mano un documento sencillo que lo guíe, que le permita revisar de manera concreta, práctica y con un ejemplo orientador los pasos del proceso investigativo. Este libro fue escrito con tal propósito. Una investigación consta de tres etapas: planificación, ejecución y presentación del informe final. El resultado de la “planificación” es el diseño de la investigación, denominado proyecto o protocolo; el resultado de la “ejecución” de este plan o proyecto son las mediciones y análisis de las variables del estudio, y el “documento final” es un informe estructurado de los resultados y de la forma como se obtuvieron. En esta nueva edición del texto se realizó una revisión, ampliación y actualización de todos los capítulos. Desde hace muchos años, este libro ha sido utilizado para orientar los trabajos de grado en pregrados y posgrados, y en la asignatura Metodología de la Investigación de diferentes universidades del país. Asimismo, es una herramienta útil para aclarar los conceptos del proceso científico en secundaria. Incluye - Cada uno de los elementos para elaborar la propuesta, el anteproyecto y el proyecto de una investigación. - Actualización según el manual de la American Psychological Association (APA) en su última versión y de las normas ICONTEC, para la presentación de trabajos científicos. - Ampliación de conceptos sobre las variables, tablas, cuadros y

gráficas. - Ejemplos claros y sencillos que sirven como guía en cada paso. Contenidos en el Sistema de Información en Línea (SIL) Al final del libro encontrará el código para ingresar al Sistema de información en Línea - SIL - donde encontrará presentaciones de las diferentes etapas del proceso científico

Hacer ciencia. Teoría y práctica de la producción científica Héctor Maletta, 2024-07-15 Este libro parte del estudio de la ciencia como actividad y presenta guías prácticas para diseñar proyectos, realizar investigaciones, publicar resultados y participar en la tarea colectiva de construir más y mejor conocimiento.

El Proyecto de Investigación. Introducción a la Metodología Científica. 5ta. Edición Fidias G. Arias, El Proyecto de Investigación: Introducción a la metodología científica 5ª Edición, obra de Fidias G. Arias, obtuvo el Premio Nacional 2006 como Mejor Libro Técnico. Galardón merecido por la constancia del autor en la revisión, corrección y actualización permanente del texto, el cual se ha caracterizado por expresar de la manera más accesible, sencilla y práctica los fundamentos de la Metodología de la Investigación como base indispensable para la formulación y ejecución de proyectos científicos. Hoy día, el mencionado libro es fuente de consulta en todos los niveles educativos, desde bachillerato hasta postgrado. Además, es recomendado en numerosas instituciones venezolanas y de otros países de habla hispana.

Los elementos de investigación Hugo Cerda Gutiérrez, 2021-04-01 Este libro está animado por tres premisas básicas: explicar en términos sencillos los conceptos y temas más complejos de la investigación científica, no disociar la teoría de la práctica y hacer de la obra una herramienta de formación y no de simple información, es decir, que el texto se constituya en una guía para el ejercicio y la práctica de la investigación. El doble vínculo que mantuvo el autor por muchos años con la práctica investigativa y con la docencia le permitió detectar las dificultades que debe asumir el estudiante, no sólo a nivel académico, epistemológico, lógico o filosófico, sino en el momento de seleccionar el tema, formular el problema, planear, ejecutar la revisión de la literatura disponible, y elaborar la investigación, la tesis o monografía de grado como requisito obligatorio de su graduación.

Formación, Política e Investigación. Tomo 2 Gutiérrez Serrano, Norma Georgina, 2013-01-01 El conjunto de trabajos que conforman este tomo aborda un panorama amplio del quehacer en investigación educativa, actividad profesional que, considerada como disciplina en sí misma, es relativamente reciente en algunos países, y en otros, apenas comienzan a vislumbrarse sus primeros pasos. Es decir, es un campo de conocimientos independiente de las otras que le fueron dando

vida propia, como la psicología, la sociología, la antropología o la pedagogía, por mencionar las más identificadas como raíces de lo que hoy se reconoce como investigación educativa. Se integran textos que presentan el tema de la producción de conocimiento en educación en distintos escenarios con trabajos de análisis e interpretación sobre una panorámica general y trabajos que se construyen a partir de casos específicos sobre instituciones, programas, procesos y actores. La obra en su totalidad es producto de valiosos intercambios realizados entre colegas del campo de la investigación educativa en América Latina; intercambios que iniciaron como resultado de una convocatoria en el año 2008 realizada por el Núcleo de Investigaciones sobre Conocimiento y Política Educativa de Buenos Aires, Argentina, hacia colegas de Brasil, Chile, Paraguay, Uruguay y México. En un esfuerzo posterior, esta obra es resultado de un financiamiento otorgado por parte del Consejo Nacional de Ciencia y Tecnología (Conacyt), en México, para profundizar sobre el tema de producción de conocimiento en educación.
