**Souls of Naples** Autori Vari,2024-03-21T14:32:00+01:00 In this volume you will find stories about hyperactive relics, ghosts in spiritual or bodily form, as well as accounts of the dead being conjured, resurrected, and brought back to life from decomposing matter. This is not so much for the purpose of assembling a kind of Neapolitan Wunderkammer, but rather to allow these bodies - in physical or spiritual form, or sometimes both at the same time - to speak as protagonists, and to offer their own contribution to the historical anthropology of the Kingdom of Naples. This volume explores the boundaries between

body and spirit, life and death, as well as the natural, preternatural, and supernatural in the long early modern era in southern Italy.

Naples 1925 Martin Mittelmeier, 2024-11-12 The untold story of how the volcanic landscape surrounding Naples influenced a crucial moment in twentieth-century intellectual history In the 1920s, the Gulf of Naples was a magnet for European intellectuals in search of places as yet untouched by modernity. Among the revolutionaries, artists, and thinkers drawn to Naples were numerous scholars at a formative stage in their journeys: Walter Benjamin, Siegfried Kracauer, Alfred Sohn-Rethel, Asja Lacis, Theodor W. Adorno, and many others. While all were indelibly shaped by the volcanic Neapolitan landscape, it was Benjamin who first probed the relationship between the porous landscape and the local culture. But Adorno went further, transforming his surroundings into a radical new philosophy—one that became a turning point in the modern history of the discipline. In this ingenious book, Martin Mittelmeier reveals the Gulf of Naples as the true birthplace of the Frankfurt School. From the majestic crater rim of Mount Vesuvius to the soft volcanic rock that Neapolitans used to build their city, Mittelmeier follows Adorno's and his fellow thinkers' footsteps through the cities along the gulf, demonstrating how their observations and encounters surface again and again in their writings for decades to come, and serve as the structuring principle of Critical Theory.

*Engineering Geology for Society and Territory - Volume 8* Giorgio Lollino, Daniele Giordan, Cristian Marunteanu, Basiles Christaras, Iwasaki Yoshinori, Claudio Margottini, 2014-08-21 This book is one out of 8 IAEG XII Congress volumes, and deals with the preservation of cultural heritage. In 1972, the World Heritage Convention linked in a single framework the concepts of nature conservation and the preservation of cultural sites. Since then, engineering geology is enlarging its contributions to national and international projects on this topic and is extending its interests to key issues like: safeguarding of monuments and sites from geotechnical perspectives; advanced monitoring; investigations on cultural landscapes; development of geo-databases for cultural heritage classification; studies on the interactions between humankind, natural landscape evolution and cultural heritage; analysis of weathering and deterioration of rock properties of monuments; risk analysis of sites affected by natural hazards and many others. With the contributions in this book, engineering geologists, conservation scientists and further experts from other natural, social and economic sciences, as well as representatives of international organizations and national and local administrative authorities exchange their ideas and practices on culture heritage preservation by presenting both local case studies and multidisciplinary international projects. The Engineering Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: Environment, processes, issues and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: Climate Change and Engineering Geology. Landslide Processes. River Basins, Reservoir Sedimentation and Water Resources. Marine and Coastal

Processes. Urban Geology, Sustainable Planning and Landscape Exploitation. Applied Geology for Major Engineering Projects. Education, Professional Ethics and Public Recognition of Engineering Geology. Preservation of Cultural Heritage.

**This Party's Dead** Erica Buist, 2021-02-18 What if we responded to death... by throwing a party? By the time Erica Buist's father-in-law Chris was discovered, upstairs in his bed, his book resting on his chest, he had been dead for over a week. She searched for answers (the artery-clogging cheeses in his fridge?) and tried to reason with herself (does daughter-in-law even feature in the grief hierarchy?) and eventually landed on an inevitable, uncomfortable truth: everybody dies. While her husband maintained a semblance of grace and poise, Erica found herself consumed by her grief, descending into a bout of pyjama-clad agoraphobia, stalking friends online to ascertain whether any of them had also dropped dead without warning, unable to extract herself from the spiral of death anxiety... until one day she decided to reclaim control. With Mexico's Day of the Dead festivities as a starting point, Erica decided to confront death head-on by visiting seven death festivals around the world - one for every day they didn't find Chris. From Mexico to Nepal, Sicily, Thailand, Madagascar, Japan and finally Indonesia - with a stopover in New Orleans, where the dead outnumber the living ten to one - Erica searched for the answers to both fundamental and unexpected questions around death anxiety. This Party's Dead is the account of her journey to understand how other cultures deal with mortal terror, how they move past the knowledge that they're going to die in order to live happily day-to-day, how they celebrate rather than shy away from the topic of death - and how when this openness and acceptance are passed down through the generations, death suddenly doesn't seem so scary after all.

Dark Heritage Tourism in the Iberian Peninsula Sara Cerqueira Pascoal, Laura Tallone, Marco Furtado, 2023-04-03 This book seeks to offer a collection of relevant essays dealing with different aspects of dark tourism sites in the Iberian Peninsula, delving into issues related to shared attitudes in the face of death and suffering. Thus, all the chapters explore the ideological readings that may turn dark sites into places of dissonant heritage, and therefore make them meaningful elements in the formation of collective identities. Illustrating the multidisciplinary potential of dark tourism studies, the contributors come from different fields of study, including historiography, literary studies, sociology. This collection reflects on how tourism managers, researchers, academics, policy makers and local communities can mobilize, transition and adapt

to cultural tourism fluctuations, as well as mitigate the negative impacts of global crises. It also provides examples of tourist practices which, despite their local scope, have a strong potential impact on collective and social levels, as well as on business and multiple fields of study, research and education.

**Jimmie Durham, Europe, and the Art of Relations** Andrea Feeser,2020-09-24 This book investigates Jimmie Durham's community-building process of making and display in four of his projects in Europe: *Something ... Perhaps a Fugue or an Elegy* (2005); two Neapolitan nativities (2016 and ongoing); *The Middle Earth* (with Maria Thereza Alves, 2018); and *God's Poems, God's Children* (2017). Andrea Feeser explores these artworks in the context of ideas about connection set forth by writers Ann Lauterbach, Franz Rosenzweig, Pamela Sue Anderson, Vinciane Despret, and Hirokazu Miyazaki, among others. Feeser argues that the materials in Durham's artworks; the method of their construction; how Durham writes about his pieces; how they exist with respect to one another; and how they address viewers, demonstrate that we can create alongside others a world that embraces and sustains what has been diminished. The book will be of interest to scholars working in contemporary art, animal studies, new materialism research, and eco-criticism.

**Sustainable Buildings from Marble Waste Heaps** Katia Talento,2024-11-05 This book examines how discarded marble heaps can be repurposed, in situ, to breathe new life into the landscape, offering solutions that are as innovative as they are practical and sustainable. The author showcases the power of creativity and sustainability to revitalize communities and landscapes with new architectural buildings and public spaces. The volume combines theory with practice, including an

extensive bibliography about landscape mutation, rehabilitation of quarries and waste reuse, and, at the same time, a detailed case study on the Estremoz Anticline, in Portugal, one of the world's main sites of marble extraction. Of all the material extracted from the several quarries of the Estremoz Anticline, only about 9% is marketed because of assessed of quality standards. Distinct from other research volumes in this domain, "Sustainable Buildings from Marble Waste Heaps" focuses on the regeneration of industrial landscapes through the on-site reuse of waste heaps, without removing the material from the context it belongs to or changing its morphology, preserving the identity of the place and promoting circular economy.
