Software libre para el control y gestión de los procesos administrativos y académicos de instituciones privadas de educación para los ciclos básico, medio y diversificado. Mauricio García de Ceca,Wilnel Jose Verdu Guerrero,Wilnel Verdu,2012-09-24 Esta investigación propone el desarrollo e implantación de un sistema web bajo lineamientos de software libre para llevar a cabo la gestión y el control de los distintos procesos administrativos (registro de nómina, control de matrículas) y académicos (registro de estudiantes, registro de notas, materias y evaluaciones) que corresponden a las labores regulares y al funcionamiento básico del plantel. Siguiendo las fases de desarrollo de aplicaciones propuesta por la metodología RAD, se realizó un levantamiento de datos y su posterior análisis para determinar las tareas que se llevan a cabo actualmente en la institución educativa que nos sirve como caso de estudio (Unidad Educativa Instituto Privado Boyacá). Luego del análisis se procedió a realizar un diseño de los componentes del sistema (modelo de datos, estructura HTML, flujo de datos) y a partir de estos, se desarrolló la solución propuesta, la cual fue sometida a pruebas y contó con la aprobación de la institución educativa para su futura implementación.
