Song Without Words Gerald Shea, 2013-02-26 A “fascinating memoir” of living with partial deafness that offers new insight into the nature of language (Booklist). Much has been written about the profoundly deaf, but the lives of the nearly thirty million partially deaf people in the United States today remain hidden. *Song without Words* tells the astonishing story of a man who, at the age of thirty-four, discovered that he had been unable to hear higher ranges of speech since a bout of scarlet fever childhood, yet somehow managed to navigate his way through Andover, Yale, and Columbia Law School, and to establish a prestigious international legal career. Gerald Shea’s witty and candid memoir tells how he compensated for his deafness through sheer determination and an amazing ability to translate the melody of vowels—albeit with some mistakes along the way. His experience gives fascinating new insight into the nature and significance of language, the meaning of deafness, the fierce controversy between advocates of signing and of oral education, and the longing for full communication that unites us all. “With candor, insight, and considerable charm and wit, Gerald Shea has explored the little-known world of the partially deaf, a world of confused language and identity.” —Andrew Solomon, New York Times—bestselling author of *Far from the Tree*

Language, Gesture, and Space Karen Emmorey, Judy S. Reilly, 2013-06-17 This book brings together papers which address a range of issues regarding the nature and structure of sign languages and other gestural systems, and how they exploit the space in which they are conveyed. The chapters focus on five pertinent areas reflecting different, but related research topics: * space in language and gesture, * point of view and referential shift, * morphosyntax of verbs in ASL, *

gestural systems and sign language, and * language acquisition and gesture. Sign languages and gestural systems are produced in physical space; they manipulate spatial contrasts for linguistic and communicative purposes. In addition to exploring the different functions of space, researchers discuss similarities and differences between visual-gestural systems -- established sign languages, pidgin sign language (International Sign), homesign systems developed by deaf children with no sign language input, novel gesture systems invented by hearing nonsigners, and the gesticulation that accompanies speech. The development of gesture and sign language in children is also examined in both hearing and deaf children, charting the emergence of gesture (manual babbling), its use as a prelinguistic communicative device, and its transformation into language-like systems in homesigners. Finally, theoretical linguistic accounts of the structure of sign languages are provided in chapters dealing with the analysis of referential shift, the structure of narrative, the analysis of tense and the structure of the verb phrase in American Sign Language. Taken together, the chapters in this volume present a comprehensive picture of sign language and gesture research from a group of international scholars who investigate a range of communicative systems from formal sign languages to the gesticulation that accompanies speech.

Signs of Hope Donna West, 2012-01-17 Winner of the 2013 Outstanding Qualitative Book Award by the International Congress of Qualitative Inquiry. Signs of Hope tells the story of a narrative inquiry with three deafhearing families. For many of us, deafness represents loss and silence. For others, being deaf is a genetic quirk; an opportunity for learning, spiritual adventure and reward. For yet others, it is the most natural thing in the world; a connection to a genealogical layer of signing ancestors and the continuation of a culture. Amid the noise of mainstream, medical and educational discourses of deafness, here are family voices demanding to be heard - whether spoken or signed - that challenge audiological and surgical intervention, that call for scrutiny and critique of 'inclusive' deaf-related pedagogical practices, that rail against marginalisation of members of minority cultures. Over four years, Donna West has recorded the stories of three families who wish to counter and resist what they see as damaging misconceptions and discriminatory constructions of deafness and deafhearing family life. Here, spaces are created that respect and acknowledge human beings - adults, children, deaf, hearing - as storytellers. The poetic and performative narratives at the heart of this book reveal not only the ways in which hurtful definitions of, and discrimination towards, deaf people and signing deafhearing families is destabilised, but also the ways in which celebration of deaf culture and sign language are affirming and vital for healthy family life.

When the Mind Hears Harlan Lane, 2010-08-04 The authoritative statement on the deaf, their education, and their struggle against prejudice.

Deviant Bodies Jennifer Terry, Jacqueline L. Urla, 1995-12-22 ... the papers in Deviant Bodies reveal an ongoing Western preoccupation with the sources of identity and human character. -- Times Literary Supplement Highly recommended for

cultural studies... -- The Reader's Review It would be useful for upper-level undergraduate and graduate courses in the sociology of the body, the history and sociology of science and medicine, and women's studies courses, particularly those exploring the feminist critiques of science and medicine. -- Contemporary Sociology ... a powerful deconstruction of the scientific gaze in configuring bodily deviance as a means of legitimating the social order within multiple historical and social contexts.... the many excellent selections will make for compelling reading for students of medical anthropology and the history of science. American Anthropologist Deviant Bodies reveals that the normal, healthy body is a fiction of science. Modern life sciences, medicine, and the popular perceptions they create have not merely observed and reported, they have constructed bodies: the homosexual body, the HIV-infected body, the infertile body, the deaf body, the colonized body, and the criminal body.
