Flex Your Age Joan MacDonald,2022-12-06 How did Joan do that? Now you can find out! As we get older, our bodies go through many changes, especially physical and mental. Most are out of our control. But for those that aren't, all we need sometimes is advice about how to make specific, sustainable, and successful decisions that can alter the course of how our lives go from that point forward. This is where Joan MacDonald of Train with Joan comes in. Just a few years ago, this septuagenarian wasn't happy with how she looked and what she ate. With help from her daughter, Michelle (a certified strength and conditioning specialist), Joan developed exercise and diet goals as well as objectives for how to change her mindset—not just how she saw herself physically but how she felt about herself mentally regardless of her physical fitness or her age. Change is hard. Doing things differently than you did them before is hard. Making different choices is hard. But in this book that's part self-help and part memoir, you'll learn how Joan made her miraculous transformation as well as how Michelle helped her mother on that journey. But you'll also learn motivation techniques, fitness and nutrition fundamentals, and how to find and contribute to a community of support. Change is intimidating, but this book will help you learn what you're capable of—and how to enrich yourself no matter at what stage in life you are. Everything you need to get started—and to stay dedicated to a new path—is inside this book. With Joan and Michelle by your side, you'll discover how to make changes for today, changes for tomorrow, and changes for the remainder of your life—long may you live.

A Critical Auto/Ethnography of Learning Spanish Phiona Stanley, 2016-11-10 The premise that intercultural contact produces intercultural competence underpins much rationalization of backpacker tourism and in-country language education. However, if insufficiently problematized, pre-existing constructions of cultural 'otherness' may hinder intercultural competence development. This is nowhere truer than in contexts in which wide disparities of power, wealth, and privilege exist, and where such positionings may go unproblematized. This study contributes to theoretical understandings of how intercultural competence develops through intercultural contact situations through a detailed, multiple case study of three conceptually comparable contexts in which Western backpackers study Spanish in Latin America. This experience, often 'bundled' with home-stay, volunteer work, social, and tourist experiences, offers a rich set of empirical data within which to understand the nature of intercultural competence and the processes through which it may be developed. Models of a single,

context-free, transferable intercultural competence are rejected. Instead, suggestions are made as to how educators might help prepare intercultural sojourners by scaffolding their intercultural reflections and problematizing their own intersectional identities and their assumptions. The study is a critical ethnography with elements of autoethnographic reflection. The book therefore also contributes to development of this qualitative research methodology and provides an empirical example of its application.

**We See You!** Daisy M. Jenkins, 2024-08-26 One warm Arizona morning, Daisy Jenkins was talking with God during her daily walk and lamenting to Him about the negativity, vitriol, and hatred permeating US news media. Whatever happened to kindness and goodness? Jenkins wondered. Why didn't newspapers and TV broadcasts ever highlight stories of love and support, especially in the wake of the devastating COVID-19 pandemic? Instead, American society was being bombarded with reporting on the violence, mass shootings, political wrangling, and racial injustice that kept our country angry, mistrustful, and constantly on edge. God, Jenkins said, somebody needs to write more about the positive things happening in our world today. God's answer was immediate: You're a writer. Why don't you write something positive and stop waiting for someone else to do it? As soon as Jenkins heard this call to action, she got to work. This book features thirty amazing men, ranging in age from twenty-two to ninety-eight, with heartfelt and inspiring life stories to share. Their experiences may not be a cure-all for the troubles of this world, but they offer us precious liberation, even for a short while, from negativity. They remind us that when we look for goodness, we will find that it is still alive and well and that it's high time we shine a brighter light on it to reveal the truth that the more we see the goodness around us, the more we allow others to see it within us.

**Turning Point** Agnes Dairo, 2022-03-18 We all reach a point in our lives when we question our purpose on earth and wonder if it's worth it and going to be fulfilling. Well, join the ride with Aderoju Samuels in a bildungsroman short-story as she drives on the road to self-discovery.

**Life Compass** Nevzat Keles, This is a choice. A choice you should make sooner or later. Just like the choice Neo is offered between a red pill and a blue pill to go out of the Matrix. This is the moment of truth and you have to decide now. Will you take the red pill and reject to be prisoned in the Matrix like all the other people in order to walk on your own path? Or will you take the blue pill and stay in the comfortable simulated reality of the Matrix, like all the other silent and obedient millions of people. In other words will you reject the chance of building your own life and walking on your own path easily? Yes, this is just up to you. Every single human being is unique and equipped with different abilities. Each single person has his own way, his own project and his own mission in this world. All you need to do is to think and find that project of your own. One man's life cannot be simply consisted of eating, drinking, sleeping, populating the world, gathering wealth and prosperity and just living among the given boundaries. Your life should have a more significant purpose and you are probably meant for something bigger. You should get rid of your mood being unhappy for the weekdays but just happy for the

weekend. Waiting for weekend, holiday or retirement to live is big nonsense. In fact, you are continuously postponing your life without being aware of that. As if you have an evidence for more enough time to come. You prefer to define your happiness under specific circumstances, and most of the time postpone your happiness instead of living the moment. However, the happiness or unhappiness is actually in your hands. Now, move on. Get into action and stop postponing yourself and your life. Take a step. Today or even right now. Otherwise pour tears after 5 or 10 years for your time and dreams which you could not make come true. Crash your head on the walls as you haven't done anything about what you could. Whine to your close friends. Get sad. Listen to melancholic music. Complain about the time which is passing so fast. Continue to postpone your goals and dreams to the next years. If you really want to be successful then for sure you will be. You are the only one who can prevent yourself being as successful as in your dreams. Means, you are the only who can stop you.

*Language Education in Digital Spaces: Perspectives on Autonomy and Interaction* Carolin Fuchs, Mirjam Hauck, Melinda Dooly, 2021-09-09 This book brings together contributions on learner autonomy from a myriad of contexts to advance our understanding of what autonomous language learning looks like with digital tools, and how this understanding is shaped by and can shape different socio-institutional, curricular, and instructional support. To this end, the individual contributions in the book highlight practice-oriented, empirically-based research on technology-mediated learner autonomy and its pedagogical implications. They address how technology can support learner autonomy as process by leveraging the affordances available in social media, virtual exchange, self-access, or learning in the wild (Hutchins, 1995). The rapid evolution and adoption of technology in all aspects of our lives has pushed issues related to learner and teacher autonomy centre stage in the language education landscape. This book tackles emergent challenges from different perspectives and diverse learning ecologies with a focus on social and educational (in)equality. Specifically, to this effect, the chapters consider digital affordances of virtual exchange, gaming, and apps in technology-mediated language learning and teaching ranging from instructed and semi-instructed to self-instructed contexts. The volume foregrounds the concepts of critical digital literacy and social justice in relation to language learner and teacher autonomy and illustrates how this approach may

contribute to institutional objectives for equality, diversity and inclusion in higher education around the world and will be useful for researchers and teachers alike.

**Gamify** Biran Burke, 2016-10-14 Organizations are facing an engagement crisis. Regardless if they are customers, employees, patients, students, citizens, stakeholders, organizations struggle to meaningfully engage their key constituent groups who have a precious and limited resource: their time. Not surprisingly, these stakeholders have developed deflector shields to protect themselves. Only a privileged few organizations are allowed to penetrate the shield, and even less will meaningfully engage. To penetrate the shield, and engage the audience, organizations need an edge. Gamification has emerged as a way to gain that edge and organizations are beginning to see it as a key tool in their digital engagement strategy. While gamification has tremendous potential to break through, most companies will get it wrong. Gartner predicts that by 2014, 80% of current gamified applications will fail to meet business objectives primarily due to poor design. As a trend, gamification is at the peak of the hype cycle; it has been oversold and it is broadly misunderstood. We are heading for the inevitable fall. Too many organizations have been led to believe that gamification is a magic elixir for indoctrinating the masses and manipulating them to do their bidding. These organizations are mistaking people for puppets, and these transparently cynical efforts are doomed to fail. This book goes beyond the hype and focuses on the 20% that are getting it right. We have spoken to hundreds of leaders in organizations around the world about their gamification strategies and we have seen some spectacular successes. The book examines some of these successes and identifies the common characteristics of these initiatives to define the solution space for success. It is a guide written for leaders of gamification initiatives to help them avoid the pitfalls and employ the best practices, to ensure they join the 20% that gets it right. Gamify shows gamification in action: as a powerful approach to engaging and motivating people to achieving their goals, while at the same time achieving organizational objectives. It can be used to motivate people to change behaviors, develop skills, and drive innovation. The sweet spot for gamification objectives is the space where the business objectives and player objectives are aligned. Like two sides of the same coin, player and business goals may outwardly appear different, but they are often the same thing, expressed different ways. The key to gamification success is to engage people on an emotional level and motivating them to achieve their goals.

**Play at Work** Adam L. Penenberg,2015-11-24 A fascinating look at how games can help us learn, create, and innovate Once thought to be nothing more than diversions for children and nerds, games have become an integral part of everyday life. Educators are trying to make learning more fun by introducing games into the classroom while cutting-edge managers are doing the same in the workplace. Doctors, scientists, and entrepreneurs are deploying games to help solve some of the world's most pressing problems. But according to Adam Penenberg, it's not the games themselves that improve our lives, but rather smart game design and its impact on the brain that can lead us to become immersed in a task we find enjoyable. The individuals and institutions that have used games to achieve this effect are often rewarded with astounding results. Drawing on the latest brain science on attention and engagement plus his own firsthand reporting, Penenberg shows how organizations like Google, Microsoft, hospitals, and the military have used game design in bold new ways--

*Diavola* Jennifer Thorne, 2024-03-26 Jennifer Thorne skewers all-too-familiar family dynamics in this sly, wickedly funny vacation-Gothic. Beautifully unhinged and deeply satisfying, *Diavola* is a sharp twist on the classic haunted house story, exploring loneliness, belonging, and the seemingly inescapable bonds of family mythology. USA Today Bestseller Best Horror Books of 2024 (so far)—Esquire Most Anticipated Books of 2024—Goodreads Anna has two rules for the annual Pace family destination vacations: Tread lightly and survive. It isn't easy when she's the only one in the family who doesn't quite fit in. Her twin brother, Benny, goes with the flow so much he's practically dissolved, and her older sister, Nicole, is so used to everyone—including her blandly docile husband and two kids—falling in line that Anna often ends up in trouble for simply asking a question. Mom seizes every opportunity to question her life choices, and Dad, when not reminding everyone who paid for this vacation, just wants some peace and quiet. The gorgeous, remote villa in tiny Monteperso seems like a perfect place to endure so much family togetherness, until things start going off the rails—the strange noises at night, the unsettling warnings from the local villagers, and the dark, violent past of the villa itself. **Autonomy in Language Learning and Teaching** Alice Chik, Naoko Aoki, Richard Smith, 2017-12-07 This book seeks to expand the research agendas on autonomy in language learning and teaching in diverse contexts, by examining the present landscape of established studies, identifying research gaps and providing practical future research directions. Based on empirical studies, it explores research agendas in five emerging domains: language learning and teaching in developing countries; social censure and teacher autonomy; learner autonomy and groups; learner autonomy and digital practice; and finally, learner autonomy and space. In doing so, it sheds new light on the impact of digital media, group dynamics and the application of ecological perspectives on learner autonomy. The contributors present a novel reconsideration of new learning affordances, and their discussion of spatial dimensions provides much needed expansion in the field.
