**Summary of Dolores Cannon's The Convoluted Universe - Book 2** Everest Media,2022-03-26T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 I have traveled through time and space to explore the history of the past, and the possibilities of the future. I have visited unknown planets and dimensions, and spoken with many so-called alien species. I have discovered that everything is hidden in the recesses of the subconscious mind, and that it can be discovered and applied in our time. #2 I first became involved with reincarnation and past-life regression in 1968. My husband, Johnny, was career U. S. Navy for over twenty years, and had just returned from duty in

Viet Nam. We were stationed in Texas and trying to return our lives to normal after a four year separation caused by the war. #3 1968 was a significant year in my life because it changed everything forever. My husband, Johnny, was almost killed in a horrendous automobile accident on his way to the Naval Base one night. He was hit head-on by a drunken driver, and mangled into the wreckage of our Volkswagen bus. The doctors said it was a miracle he lived, because his injuries were so extensive that he should have died. #4 I was glad to have the sanctuary of the hills as my retreat, as I was completely focused on my husband and the children. I had no idea where I would find clients in the hills of Arkansas, but I knew I wanted to do something with my life.

Frontiers of Knowledge: Scientific and Spiritual Sources for a New Era Douglas Kinney, 2014-06-06 Frontiers of Knowledge is the story of unfolding developments that are revolutionizing our understanding of ourselves and our place in the universe. We are birthing a new era in which our ideas about the nature and source of reality are swiftly changing. Insights from quantum physics suggest that the basis of our physical world is actually mental—conscious thoughts. Other discoveries are causing us to redefine our concepts of mind and the elusive thing we call consciousness. All strongly hint that spirituality is the underlying source of everything. Frontier scientists and scientifically trained researchers are providing us with a rich and expanding base of knowledge through systematic investigations of startling phenomena that have been observed in quantum physics, cosmology, biology, psychology, disease and healing, death, near-death experiences, reincarnation experiences, and those occurring in spiritual hypnosis on the nature of the spiritual realm. New concepts of reality are especially needed to explain the incredibly finetuned characteristics and the mysterious nature of our physical universe. Ninety-five percent of the universe's energy and mass are a mystery to scientists, and for the moment, we resort to naming them dark matter and dark energy. The last time a comparable knowledge revolution occurred was in the late sixteenth century when astronomers determined that the planets revolved around the sun, not the earth. Historians call it the Copernican Revolution because it led to modern Western science. From one perspective, the new era predicted in this book—a revolution in its own right—can be considered the completion of the quantum revolution by defining and explaining the role of consciousness in our universe. An underlying aspect of this new revolution is the sense that humanity is moving into a new era of rapidly expanding knowledge of the human spirit (our soul aspect) and non-physical realities. Until now, this emerging knowledge has not been organized into a coherent and comprehensive structure. Frontiers of Knowledge provides the first outline of this new structure of reality.

Stars on the Earth Richard Leviton, 2006-08-18 Discover the wonderful secret the Earth holds for us—that the stars of the galaxy live on our planet. Holograms of high-magnitude stars over holy mountains. Physical travel to other planets through stargates on the Earth's surface. Near instantaneous transportation across the planet through quick-way portals. Outrageous science fiction or sober geomantic fact? Earth Mysteries researcher Richard Leviton takes you on a wild tour of three geomantic features of our planet and reveals that what science fiction has dreamed the Earth in fact offers us. Stars on the Earth combines scholarship, clairvoyance, and field experience with the latest discoveries of geology and astrophysics and the timeless insights of the world's myths to open the planetary door to the stars. It's all part of the Earth's unsuspected but staggeringly rich endowment as a designer planet. Our planet was precisely designed and implemented for us, and it's equipped with a visionary geography that mirrors features of the galaxy and Heavens. Why are so many of the Earth's mountains said to be holy, producing visions and encounters with the gods? They all have canopies of light called domes, each transmitting the presence of a galactic star. What is the geomantic origin of the Bermuda Triangle? Two dysfunctional stargates. If working properly, they and the Earth's other two million stargates could transport us rapidly to other planets. Is there a way to travel quickly across the planet without using cars, airplanes, boats, or trains? Yes, and it's called a traversable wormhole, and the Earth has thousands of them awaiting our discovery and use. Come join the tour of a planet you've never seen before: our own star-infused Earth.
