Early American Cartographies Martin Brückner, 2012-12-01 Maps were at the heart of cultural life in the Americas from before colonization to the formation of modern nation-states. The fourteen essays in *Early American Cartographies* examine indigenous and European peoples' creation and use of maps to better represent and understand the world they inhabited. Drawing from both current historical interpretations and new interdisciplinary perspectives, this collection provides diverse approaches to understanding the multilayered exchanges that went into creating cartographic knowledge in and about the Americas. In the introduction, editor Martin Bruckner provides a critical assessment of the concept of cartography and of the historiography of maps. The individual essays, then, range widely over space and place, from the imperial reach of Iberian and British cartography to indigenous conceptualizations, including dirty, ephemeral maps and star charts, to demonstrate that pre-nineteenth-century American cartography was at once a multiform and multicultural affair. This volume not only highlights the collaborative genesis of cartographic knowledge about the early Americas; the essays also bring to light original archives and innovative methodologies for investigating spatial relations among peoples in the western hemisphere. Taken together, the authors reveal the roles of early American cartographies in shaping popular notions of national space, informing visual perception, animating literary imagination, and structuring the political history of Anglo- and Ibero-America. Deep Sky Observing Steve R. Coe, 2012-12-06 Steve Coe has been watching the deep sky from locations near his home in Arizona for almost 20 years. During that time he has accumulated a wealth of knowledge, observations, hints and tips that will help every deep sky observer, regardless of experience. This, his first book, gives detailed practical advice about how to find the best observing site, how to make the most of the time spent there, and what equipment and instruments to take along. Culture & Language at Crossed Purposes Jerome McGann,2022-07-29 Culture and Language at Crossed Purposes unpacks the interpretive problems of colonial treaty-making and uses them to illuminate canonical works from the period. Classic American literature, Jerome McGann argues, is haunted by the betrayal of seventeenth- and eighteenth-century Indian treaties—"a stunned memory preserved in the negative spaces of the treaty records." A noted scholar of the "textual conditions" of literature, McGann investigates canonical works from the colonial period, including the Arbella sermon and key writings of William Bradford, John Winthrop, Anne Bradstreet, Cotton Mather's Magnalia, Benjamin Franklin's celebrated treaty folios and Autobiography, and Thomas Jefferson's Notes on the State of Virginia. These are highly practical, purpose-driven works—the record of Enlightenment dreams put to the severe test of dangerous conditions. McGann suggests that the treaty-makers never doubted the unsettled character of what they were prosecuting, and a similar conflicted ethos pervades these works. Like the treaty records, they deliberately test themselves against stringent measures of truth and accomplishment and show a distinctive consciousness of their limits and failures. McGann's book is ultimately a reminder of the public importance of truth and memory—the vocational commitments of humanist scholars and educators.
