45 Great Philosophers and What They Mean for Judaism Shmuly Yanklowitz,2024-06-18 In this new forty-five-chapter series, Rabbi Shmuly explores forty-five of the most influential philosophers throughout history and how Jewish ideas might engage with each of the philosophers and their philosophical projects. At times, Judaism may need to reject harmful, foreign ideas. Other times, Judaism may need to adapt, integrate, and expand. There are many other approaches we'll see of how Jewish thought can engage with other philosophies as well. In this exciting new exploration, we learn about Jewish intellectual history and what it means for us today.

Who's All Going (to Die)? Lisa Springer,2025-09-16 One can never ask too many questions in this contemporary horror about a teen girl who gets invited to the soft launch of a luxury resort and finds their wellness practices disturbing--and deadly. Ariana is ready to get away. From the chill of a New York winter. From the anxiety around her volleyball injury and

what that means for her future. Thanks to her new friend Oakley, she can do just that. Oakley has offered Ariana an all-expenses-paid trip to her parents' wellness retreat on an island off Barbados. The Dream resort seems like the perfect escape. At least, it did before lifestyle guru Juniper-Moon started introducing suspect activities like psychedelic mushroom tea ceremonies and bee venom facials. And as disturbing accidents start happening around the island and tension between the guests and staff builds, Aria realizes she and her friends might not be in paradise after all. Now it's no longer a question of when but if they can make it home alive.

Rest Alex Soojung-Kim Pang, 2016-12-06 Rest is such a valuable book. If work is our national religion, Pang is the philosopher reintegrating our bifurcated selves.---Arianna Huffington, New York Times Book Review Overwork is the new normal. Rest is something to do when the important things are done—but they are never done. Looking at different forms of rest, from sleep to vacation, Silicon Valley futurist and business consultant Alex Soojung-Kim Pang dispels the myth that the harder we work the better the outcome. He combines rigorous scientific research with a rich array of examples of writers, painters, and thinkers—from Darwin to Stephen King—to challenge our tendency to see work and relaxation as antithetical. Deliberate rest, as Pang calls it, is the true key to productivity, and will give us more energy, sharper ideas, and a better life. Rest offers a roadmap to rediscovering the importance of rest in our lives, and a convincing argument that we need to relax more if we actually want to get more done.

Not a Perfect Fit Jane A. Schmidt, 2025-07-30 Not a Perfect Fit is a collection of stories that are laugh-out-loud funny one minute and thought-provoking the next. Stories range from Schmidt's experience living off-grid as the only English woman in an Amish neighborhood to family trips that are remarkably similar to National Lampoon's Vacation. Through it all, she manages to rise above the many challenges she faces—inspiring and entertaining her audience along the way. Filled with animal antics, gratitude, mishaps, and madcap adventures, Not a Perfect Fit's tell-all, single-girl-gone-country, down-home stories give readers permission to laugh and cry—and, most important, to carry on.

The Terrestrial Biosphere S.T. Trudgill, 2014-09-25 Terrestrial Biosphere tries to pose the questions which underlie the many-sided debate of how to respond to and influence change: How should we view nature? What do we do for the best - how should we act - what are we trying to achieve and what should we be guided by? In doing so the book introduces and attempts to analyse not only scientific aspects of the debate but also cultural attitudes and values: the notions of ecosystem stability are now challenged and it is also clear that ecosystems are renewable but not repeatable. It finds that prescriptive 'solutions'

based on current constructs may not be adequate. Feeling that analysis should lead to advocacy, the author believes that if we can't improve predictability, we have to increase adaptability which means that ecological and social capacity building should be advocated. This is seen in terms of concepts, institutions, attitudes and values which allow for a plurality of meanings and which can cope with surprise and unforeseen change - and which also facilitates responses to change.

Tree Cultures Paul Cloke, Owain Jones, 2020-07-12 The relationship between nature and culture has become a popular focus in social science, but there have been few grounded accounts of trees. Providing shelter, fuel, food and tools, trees have played a vital role in human life from the earliest times, but their role in symbolic expression has been largely overlooked. For example, trees are often used to express nationalistic feelings. Germans drew heavily on tree and forest imagery in nation-building, and the idea of 'hearts of oak' has been central to concepts of English identity. Classic scenes of ghoulish trees coming to life and forests closing in on unsuspecting passers-by commonly feature in the media. In other instances, trees are used to represent paradisaical landscapes and symbolize the ideologies of conservation and concern for nature. Offering new theoretical ideas, this book looks at trees as agents that co-constitute places and cultures in relationship with human agency. What happens when trees connect with human labour, technology, retail and consumption systems? What are the ethical dimensions of these connections? The authors discuss how trees can affect and even define notions of place, and the ways that particular places are recognized culturally. Working trees, companion trees, wild trees and collected or conserved trees are considered in relation to the dynamic politics of conservation and development that affect the values given to trees in the contemporary world. Building on the growing field of landscape study, this book offers rich insights into the symbolic and practical roles of trees. It will be vital reading for anyone interested in the anthropology of landscape, forestry, conservation and development, and for those concerned with the social science of nature.

Concord in Massachusetts, Discord in the World Jannika Bock, 2008 «Reading Thoreau's Journal, I discover any idea I've ever had worth its salt,» notes the American composer John Cage in 1968. Upon reading the words of nineteenth-century nature philosopher Henry Thoreau, Cage is immediately fascinated with the Transcendentalist's ideas, in particular his views on music and silence. Recognizing his own beliefs in Thoreau's writings, Cage began to rely heavily on the thoughts of the nineteenth-century man and implement them as the basis for his own compositions - both musical and written. Drawing on the complete oeuvres of Cage's and Thoreau's written works, this book surveys the intertextual relation between the writings of the two men. In the juxtaposition of these authors' aesthetics, this book reveals surprising overlaps in the thoughts of Cage and Thoreau.

The Woodland Grave Tony Reynolds, 2024-04-18 In the dead of night two young women meet by chance on a hillside. Chris is the squire's daughter and Gerry a visitor to her village. Although Chris has lived all her life in the countryside and Gerry is a London sophisticate, they become close friends. They are taking a walk when Chris timidly enquires how long

Gerry intends to stay in the village. In response, Gerry indicates a small wood a mile or two away. 'My lover is buried there,' she announces. 'Soon it will be a year and a day since his death and I've come to stand by his grave.'
