This will cause the blocks read with a full table scan to be immediately flushed from the buffer cache. *Cache directive "no-cache" | An explanation of the HTTP Cache ...* Cache directive "no-cache" An explanation of the HTTP Cache-Control header The Cache-Control header is used to specify directives for caching mechanisms in both HTTP requests and responses. When the NoCache property is set to true present in a HTTP request message, an application should forward the request toward the origin server even if it has a cached copy of what is being requested. *Is there a tag to turn off caching in all browsers?* I found that Chrome responds better to Cache-Control: no-cache (100% conditional requests afterwards). "no-store" sometimes loaded from cache without even attempting a conditional request. Firefox responds better to "no-store" but still sometimes loads from cache if you reload immediately afterwards. What a mess! **Cache-Control header - MDN Web Docs** Jul 4, 2025 · The HTTP Cache-Control header holds directives (instructions) in both requests and responses that control caching in browsers and shared caches (e.g., Proxies, CDNs). **What's with all the cache/nocache stuff and weird filenames?** The .nocache.js file contains JavaScript code that resolves the Deferred Binding configurations (such as browser detection, for instance) and then uses a
