**Urban Design: Street and Square** Cliff Moughtin, 2007-06-07 This book, part of a series of four, offers a detailed analysis of urban design, covering the streets, squares and buildings that make up the public face of towns and cities. It outlines the theory of the principal features of urban design from which method is developed and provides a better understanding of the main elements of urban design. This includes the arrangement, design and details of the streets and squares, and the roles they play in city planning. This third edition includes chapters on Sustainable Urban Design and Visual Analysis, introducing the latest theories and influences in the field and bringing greater practical significance to the book. Cliff Moughtin explores the street and square in terms of function, structure and symbolism and examines fine examples in their historical context. These are set against the background of the laws of urban design composition, culled from Renaissance and modern writers.

**Mystical Themes in Le Corbusier's Architecture in the Chapel Notre Dame Du Haut at Ronchamp** Robert Coombs,2000 This is a study of Le Corbusier's most controversial work after World War II: Notre Dame du Haut at Ronchamp. It reveals his Cubist interweaving of metaphysical themes and the various mystical strands of the Ronchamp riddle.

**Ronchamp** Association oeuvre Notre-Dame-du-Haut,2008 The French Pilgrimage Church of Notre-Dame du Haut in Ronchamp is not just a destination for pilgrims from around the world, but also for people who are interested in art and architecture. This compact book describes the history of earlier churches that stood on the site, the research and discussions for the new building, the various approaches by Le Corbusier, and the different building phases up to the consecration. The book combines art and spirituality in words and pictures, and gives readers a tour around the church, with special attention paid to architecture, the unique quality of the area's light, and impressions of the church's acoustic qualities.

*LeCorbusier: Notre Dame Du Haut, Ronchamp, 1950-54* , The Boston College Fine Arts Department presents information about the Swiss architect and city planner Charles-Edouard Jeanneret (1887-1965), who was known as Le Corbusier. The department provides images with descriptions of Notre Dame du Haut, a church building that Jeanneret designed that was completed between 1950 and 1954.

**Le Corbusier in Detail** Flora Samuel,2007-08-31 This is the first book to give such close attention to Le Corbusier's approach to the making of buildings. It illustrates the ways in which Le Corbusier's details were expressive of his overall philosophical intentions. It is not a construction book in the usual sense- rather it focusses on the meaning of detail, on the ways in which detail informs the overall architectural narrative of a building. Well illustrated and containing several specially prepared scaled drawings it acts as timely reminder to both students and architects of the possibilities inherent in the most small scale tectonic gestures.

Sacred Concrete Flora Samuel, Inge Linder-Gaillard, 2013 Le Corbusier not only designed and built churches; he was also intensely interested in religion and faith. His work deeply influenced church architecture in the twentieth century. This book examines Le Corbusier's relationship with religion in two introductory chapters, presents his four designs for La Sainte-Baume, the Chapel of Notre Dame du Haut de Ronchamp, the Cloister of La Tourette, and the Church of St. Pierre, and, in the final chapter, examines his influence on church architecture in Europe in the twentieth century. Examples include the Jubilee Church near Rome by Richard Meier, the Chapel of Saint Ignatius in Seattle by Steven Holl, the Santa Maria Church in Porto by Ivaro Siza, Tadao Ando's Meditation Space in Paris, as well as the Kapelle der Versöhnung (Church of Reconciliation) in Berlin by Reitermann & Sassenroth. Flora Samuel holds a PhD in architecture and teaches design and architecture history at the University of Bath, UK, and is the author of numerous publications. Inge Linder-Gaillard also holds a PhD in architecture and has researched and written about Le Corbusier's work in numerous essays.
