RJ Shavelson

Introducción a los conceptos y teorías de las ciencias físicas Gerald James Holton, Stephen G. Brush, 1996-10 Quizás la característica más sorprendente de este libro es el énfasis que pone en la naturaleza del descubrimiento, el razonamiento y la formación de conceptos como un tópico fascinante. Esto significa que los aspectos históricos y filosóficos de la exposición no son meramente un ingrediente dulce para conseguir que el lector digiera el texto lo más fácilmente posible, sino que se presentan por su propio interés intrínseco.

La formación de conceptos en ciencias y humanidades Pablo González Casanova, Marcos Roitman Rosenmann, 2006-01-01 Concepto es término latino y está asociado al hecho de engendrar ideas: el ser humano es capaz de formar conceptos. de concebir o crear ideas. Así, el verbo que subyace en el sustantivo concepto es capio, is, que en español dió capturar. Al formar conceptos, el hombre engendra, captura o concibe ideas: señala límites, marca fronteras y separa un objeto conceptual de otro. Así ha sucedido desde Grecia hasta hoy.

Conceptos Basicos de Estadistica para Ciencias Sociales José Juan Cáceres Hernández, 2006

Ciencias sociales , 1999-01-01 Las ciencias sociales viven hoy en una desmesura cercana a la catarsis. La multiplicidad de temas y problemas tratados, la diversificación de sus enfoques y métodos, su fragmentación en múltiples especialidades y subdisciplinas constituyen un proceso que es, al mismo tiempo, depurador y vigorizante. Las grandes certezas de la tradición entran en crisis; incluso, algunas antiguas verdades desaparecen. Pero la tradición sobrevive, muta y renueva. Los linderos de las ciencias sociales —el espacio teórico-cultural de las fronteras— han sido campo fértil para la novedad y la renovación. En dicho espacio pueden tenderse puentes: se alcanzan los contornos de otras ciencias, se acogen sus concepciones y, con

ellas, se amplía la visión de una realidad que, desde cualquier punto de vista, se encuentra en constante cambio. La reestructuración de las ciencias sociales se verifica en las diversas disciplinas que la conforman, y que son abordadas en este texto. Los análisis que se brindan aquí sobre la sociología, la política, la antropología y la historia dan cuenta de sus tradiciones y mudanzas; de sus diálogos y de los procesos de hibridación disciplinaria; de las tensiones y retos que hoy enfrentan. Más allá de la especificidad de cada una de las disciplinas analizadas existe un paisaje teórico común y un horizonte intelectual que parece también compartirse. Los autores registran los grandes cambios que condujeron a la fragmentación teórica y disciplinaria. En todos los casos se reconoce el acercamiento de la disciplina en cuestión a otras disciplinas de las ciencias sociales; algunas veces, incluso a las ciencias de la materia y de la vida. Describen también la multiplicación de teorías y métodos de análisis para abordar los viejos y nuevos problemas. Pero el clima cultural de la diversidad también incluye otros horizontes. Los que aquí se defienden aceptan una diversidad que no renuncia a la política. Algunos, incluso, propugnan la construcción de un nuevo paradigma: uno que corresponda a una sociedad hecha de muchas sociedades no excluyentes.

La investigación científica Mario Bunge, 2000-05-02 Partiendo de la idea de que hacer ciencia no es obrar a ciegas sino un proceso intelectual y creador asistido por medios materiales, Bunge ofrece un tratado sistemático de epistemología, que recorre el sendero íntegro de la investigación científica y examina cada etapa del ciclo de la investigación: la hipótesis de trabajo, la hipótesis corroborada o ley, el sistema hipotético-deductivo o teoría, la explicación y la predicción por medio de teorías, la acción fundada sobre la teoría y la evaluación de las ideas a la luz de los hechos.

Segunda reunion tecnica internacional sobre extension agricola - Lima, Peru, Noviembre 20-Diciembre 2, 1961 ,

Las ciencias sociales revisitadas Gustavo Leyva Martínez, 2024-05-17 El origen de esta obra se remite al Tratado de Metodología de las Ciencias Sociales editado por mi colega ya fallecido, Enrique de la Garza Toledo, y por quien esto escribe y fue publicado en su primera edición en 2012 en el marco de una coedición entre el Fondo de Cultura Económica y la Universidad Autónoma Metropolitana. Esa obra tuvo una buena acogida en el ámbito iberoamericano y, después de una reimpresión, la obra actualmente se encuentra prácticamente agotada. Después del fallecimiento de Enrique de la Garza en

2021 y tras los once años transcurridos desde su publicación me pareció que era necesario pensar no tanto en una reedición, sino en una nueva obra dotada de una perspectiva teórica aún más amplia que hiciera justicia tanto a los temas, a las corrientes y a autoras y autores no tratados en su momento, así como a los nuevos enfoques metodológicos surgidos en los últimos años. Es por esta razón que en este libro debía marcarse claramente la distinción con relación al Tratado de Metodología de las Ciencias Sociales no solamente con respecto a su amplitud y variedad, sino también con relación a su título mismo.

El concepto de heurística en las ciencias y las humanidades Carlos Pereda, 2000-01-01 El racionalismo contemporáneo reconoce que la creatividad y la pasión por la innovación son factores esenciales del cambio progresivo, pero considera que estos componentes heurísticos carecen de rigor metodológico. Tal concepción esquizofrénica ha sido predominante, no obstante lo absurdo que resulta separar el contexto de descubrimiento supuestamente irracional al contexto de justificación. Los trabajos de este libro esclarecen los usos y significados del concepto de la heurística en diversas disciplinas, proponen una visión alternativa a esta separación y reivindican el carácter racional y la relevancia epistémica de la heurística.
