Principios impositivos de justicia y eficiencia: fundamentos, conflicto y proyección. Un enfoque transdisciplinar Zulema Calderón Corredor, 2017-06-29 A lo largo de estas páginas el lector encontrará los resultados de un análisis histórico y transdisciplinar sobre los fundamentos de los principios tributarios más relevantes de los sistemas fiscales modernos: el principio de justicia y el principio de eficiencia económica. Después de describir el marco conceptual de referencia en

materia de principios, se analiza la realidad de estos principios en el ámbito del sistema tributario español posterior a la Constitución de 1978, identificando sus principales vicisitudes y el difícil equilibrio mantenido entre ellos. El estudio de las causas de este conflicto se desarrollará a partir del análisis de los presupuestos teóricos que sirven de base a cada uno de los principios: desde el ámbito de la teoría del impuesto justo para el principio de justicia y desde el ámbito de la teoría económica para el principio de eficiencia. Para ello se analizan los elementos que históricamente han influido en su configuración hasta ser interpretados cómo lo hacen en la actualidad. Este análisis se realiza en el contexto de las distintas cosmovisiones que históricamente se han sucedido, -realista, moderna, cientificista, y post-moderna-, y en las que las cuestiones epistemológica, antropológica y política han determinado la forma de entender el Derecho y la Economía, y con ello la justicia y la eficiencia en los tributos. La investigación concluye identificando algunos de los elementos que más han influido en la configuración actual de los principios impositivos de equidad y eficiencia. Finalmente y sobre la base de las conclusiones alcanzadas, se propone un sustrato teórico que pueda servir de referencia para la interpretación y proyección de los principios impositivos de justicia y eficiencia y una propuesta de reforma constitucional y de interpretación del principio de capacidad económica.

Con una extensión de 3.836 páginas, la publicación se divide en dos tomos: en el primero incorpora los comentarios hasta el artículo 65 (Título II) y en el segundo, del artículo 66 (Título III) a la disposición final, incluyéndose en cada uno de ellos un índice alfabético de autores y otro analítico, que vincula materias con artículos. A pesar de su gran extensión, es una obra que, de manera clara, concisa y fácilmente manejable, recapitula el significado de nuestra Constitución durante sus cuarenta años de existencia. ISBN:

Capitalismo del siglo XXI Héctor Vega, Turbulencias de guerras regionales y de catástrofes humanitarias azotan al mundo; millones de inmigrantes y refugiados en Europa siembran la incertidumbre en un clima de recesión y deuda en las principales economías de Europa y América Latina. Todo ello sin evocar los estados de pobreza, necesidad y miseria que azotan algunas regiones de África, Sudeste asiático y América Latina. El reciente huracán Irma que azota las islas del Caribe y de Florida demuestra los efectos destructivos del cambio climático en vidas humanas y pérdidas materiales. Si queremos comprender la construcción de la globalidad en las últimas décadas y su proyección en la economía del siglo 21 debemos reflexionar en dos fenómenos que no parecieran concentrar la prioridad de todos los gobiernos de la Tierra a saber, el cambio climático y el mercado laboral. Este libro asocia ambos temas a las tendencias de la economía global. Cuando el mundo alcanza resultados científicos y tecnológicos, impensables hace algunos años, se hace aún más notorio que hemos fracasado frente a millones de hombres, mujeres y niños sin salud, educación y vivienda. No hemos cumplido ni ética ni materialmente con estos Bienes Públicos elementales aún cuando han sido consagrados en innumerables textos, ceremonias y reuniones de Naciones Unidas. Definitivamente hemos fallado. El fracaso en la realización de los Bienes Públicos se ha traducido en un costo social importante, ilustrado por situaciones de bajos salarios, ingresos insultantemente desiguales, seguridad social mediocre o desfinanciada, niveles de infraestructura económica insuficientes a saber: energía, agua potable, medio ambiente, transporte, rutas, tranques, puentes, puertos, aeropuertos... Si nos comprometemos a subvenir estas necesidades de Bienes Públicos en el mundo en los próximos 20 años tendríamos que prever nada menos que 50 billones de dólares (millones de millones), so pena de desastres, devastaciones y mortandades. El McKinsey Report (2013) presenta este cálculo como la única forma de cumplir con esa brecha que, por descuidos e indolencias de sus gobiernos, ha cavado la Humanidad en los últimos 200 años de revoluciones industriales.
