*Genitricksling Joyce*, 2021-11-22 Joyce's methods of composition have only recently begun to be examined in a rigorous fashion. Already the work done on the genesis of Joyce's texts has fostered both new insights and new questions regarding the overall status of his oeuvre. The conference Genitricksling Joyce, held at Antwerp in 1997, testified to the variety and vitality of genetic investigations into Joyce's work. We have tried to recreate this vitality in the present volume with a double purpose, or double trick. First, the essays collected in *Genitricksling Joyce* are not only indicative of the growing body of genetic scholarship, they also signify methodological and theoretical changes among its practitioners towards a more open form of discussion and understanding. Second, we hope that these essays will clearly demonstrate the relevance of genetic criticism to current critical and cultural concerns in Joyce studies.

**Maurice Blanchot and Fragmentary Writing** Leslie Hill, 2012-07-05 The first book to provide a detailed account of fragmentary writing in the work of the French novelist, critic, and thinker Maurice Blanchot (1907-2003).

*The Vulgate Version of the Arthurian Romances: Supplement: Le livre d'Artus, with glossary. 1913* Heinrich Oskar Sommer, 1913

*Paper Machine* Jacques Derrida, 2005 This book questions the book itself, archivization, machines for writing, and the mechanicity inherent in language, the media, and intellectuals. Derrida questions what takes place between the paper and the machine inscribing it. He examines what becomes of the archive when the world of paper is subsumed in new machines for virtualization, and whether there can be a virtual event or a virtual archive. Derrida continues his long-standing investigation of these issues, and ties them into the new themes that governed his teaching and thinking in the past few years: the secret, pardon, perjury, state sovereignty, hospitality, the university, animal rights, capital punishment, the question of what sort of mediatized world is replacing the print epoch, and the question of the "wholly other." Derrida is remarkable at making seemingly occasional pieces into part of a complexly interconnected trajectory of thought.

**Kierkegaard and Climate Catastrophe** Isak Winkel Holm, 2023 This volume argues for the relevance of Kierkegaard's employment of the prophetic noir, modelled after the prophetic books of the Hebrew Bible, to understanding how to live in a time of climate change.

Remains of a Self Cathrine Bjørnholt Michaelsen, 2021-06-29 From the twentieth century in the twenty-first, psychoanalysis and deconstruction have challenged, and continue to challenge, our conceptions of subjectivity and selfhood. Psychoanalysis revealed that even in our innermost households we are never quite alone; rather, instances of “otherness” incessantly interfere in our most intimate relation to ourselves, forcing us to adapt continuously. Deconstruction, inheriting both this psychoanalytic disclosure and Heidegger’s destruction of the history of metaphysics, went to the foundations of the Western constructions of “the subject” and “the self,” only to find how a destabilizing otherness was always already haunting them. What, if anything, remains of the self in the aftermath? Early on in the wake of deconstruction, a certain misconceived and simplified notion of the “death of the subject” was proclaimed and in recent years more or less successful attempts have been made at reviving the notions of “the subject,” “the self,” and “agency.” In contrast to these attempts at revival, this book offers a two-pronged approach: On the one hand, it argues that neither psychoanalysis nor deconstruction propounds a simple annihilation of the subject or liquidation of the self; on the other hand, however, neither do they pave the way for a “return to the subject” or “resurrection of the self” that would allow us once again to become confident about our presence to ourselves. Instead, this book suggests that if we set ourselves the task of taking up the heritage from psychoanalysis and deconstruction in a serious manner, we are obliged to retrace the subject and the self as undergoing perpetual auto-deconstruction.

*Biography and the Question of Literature in France* Ann Jefferson, 2007-01-04 Containing critical readings of some major French authors in the light of the evolving relations between biography and literature, this book offers a history of French literature over a 300-year period, and also a discussion of biography - its forms, history, and functions

Understanding Blanchot, Understanding Modernism Christopher Langlois, 2018-06-14 Maurice Blanchot occupies a central though still-overlooked position in the Anglo-American reception of 20th-century continental philosophy and literary criticism. On the one hand, his rigorous yet always-playful exchanges with the most challenging figures of the philosophical and literary canons of modernity have led thinkers such as Georges Bataille, Emmanuel Levinas, Jacques Derrida, and Michel Foucault to acknowledge Blanchot as a major influence on the development of literary and philosophical culture after World War II. On the other hand, Blanchot's reputation for frustrating readers with his difficult style of thought and writing has resulted in a missed opportunity for leveraging Blanchot in advancing the most essential discussions and debates going on today in the comparative study of literature, philosophy, politics, history, ethics, and art. Blanchot's voice is simply too profound, too erudite, and too illuminating of what is at stake at the intersections of these disciplines not to be exercising more of an influence than it has in only a minority of intellectual circles. *Understanding Blanchot, Understanding Modernism* brings together an international cast of leading and emergent scholars in making the case for precisely what contemporary modernist studies stands to gain from close inspection of Blanchot's provocative post-war writings.

**Crisis** Sascha Bru, Kate Kangaslahti, Li Lin, Iveta Slavkova, David Ayers, 2022-09-06 Notions of crisis have long charged the study of the European avant-garde and modernism, reflecting the often turbulent nature of their development. Throughout their history, the avant-garde and modernists have both confronted and instigated crises, be they economic or political, aesthetic or philosophical, collective or individual, local or global, short or perennial. The seventh volume in the series European Avant-Garde and Modernism Studies addresses the myriad ways in which the avant-garde and modernism have responded and related to crisis from the late nineteenth to the twenty-first century. How have Europe's avant-garde and modernist movements given aesthetic shape to their crisis-laden trajectory? Given the many different watershed moments the avant-garde and modernism have faced over the centuries, what common threads link the critical points of their development? Alternatively, what kinds of crises have their experimental practices and critical modes yielded? The volume assembles case studies reflecting upon these questions and more from across all areas of avant-garde and modernist activity, including visual art, literature, music, architecture, photography, theatre, performance, curatorial practice, fashion and design.

**Crimes of the Future** Jean-Michel Rabaté, 2014-04-24 The decade since the publication of Jean-Michel Rabaté's controversial manifesto *The Future of Theory* saw important changes in the field. The demise of most of the visible French or German philosophers, who had produced texts that would trigger new debates, then to be processed by Theory, has led to drastic revisions and starker assessments. Globalization has been the most obvious factor to modify the selection of texts studied. During the twentieth century, Theory incorporated poetics, rhetorics, aesthetics and linguistics, while also opening itself to continental philosophy. What has changed today? The knowledge that we live in a de-centered world has destabilized the primacy granted to a purely Western canon. Moreover, much of contemporary theory remains highly allusive and this is often baffling for students. Theory keeps recycling itself, producing authentic returns of basic theses, terms and concepts. Canonical modern theorists often return to classical texts, as those of Plato, Kant, Hegel, Nietzsche. And now we want to know: what is new? *Crimes of the Future* explores the past, present and potential future of Theory.

**Archival Afterlives** Laura Hughes, 2023-11-15 A capacious analysis of a legendary intellectual friendship and the material legacies it left behind Over the course of their decades-long friendship, Hélène Cixous and Jacques Derrida assembled overlapping archives of written experiments and exchanges that document a shared interest in their literary afterlives. In this incisive account, Laura Hughes shows how pushing against the limits of writing and of life itself means not only imagining but manifesting a community of future readers. *Archival Afterlives: Cixous, Derrida, and the Matter of*

Friendship examines the embodied nature of literary creation, taking letters, fragments, notes, and other ephemera as objects of critical analysis and care. Combining close readings of key texts and previously unexamined archival materials, Hughes traces critical connections between Cixous and Derrida, between the theoretical and the autobiographical, and between life writing and its limits. In putting deconstruction into dialogue with new material analyses and archive studies, *Archival Afterlives* positions this historical and intellectual relationship as a lens through which to reexamine the legacy of critical theory itself.
