Predictive Analytics Eric Siegel,2013-02-19 In this rich, entertaining primer, former Columbia University professor and

Predictive Analytics World founder Eric Siegel reveals the power and perils of prediction: What type of mortgage risk Chase Bank predicted before the recession. Predicting which people will drop out of school, cancel a subscription, or get divorced before they are even aware of it themselves. Why early retirement decreases life expectancy and vegetarians miss fewer flights. Five reasons why organizations predict death, including one health insurance company. A truly omnipresent science, predictive analytics affects everyone, every day. Although largely unseen, it drives millions of decisions, determining whom to call, mail, investigate, incarcerate, set up on a date, or medicate. Predictive analytics transcends human perception. This book's final chapter answers the riddle: What often happens to you that cannot be witnessed, and that you can't even be sure has happened afterward -- but that can be predicted in advance? Whether you are a consumer of it -- or consumed by it -- get a handle on the power of Predictive Analytics. This book is easily understood by all readers. Rather than a how to for hands-on techies, the book entices lay-readers and experts alike by covering new case studies and the latest state-of-the-art techniques.

Impossible Worlds, Impossible Things Melissa Beattie, Ross P. Garner, Una McCormack, 2010-02-19 The successful regeneration of Doctor Who in the twenty-first century has sparked unprecedented popular success and renewed interest within the academy. The ten essays assembled in this volume draw on a variety of critical approaches—from cultural theory to audience studies, to classical reception and musicology—to form a wide-ranging interdisciplinary discussion of Doctor Who, classic and new, and its spin-off series, Torchwood and The Sarah Jane Adventures. With additional contributions from Andrew Pixley, Robert Shearman, Barnaby Edwards, and Matt Hills, the volume is intended to be accessible to everyone, from interested academics in relevant fields to the general public.

Speaking of Information Rory Litwin, Martin Wallace, 2009 A compilation of quotations originally collected for the 'Quotes of the Week' section of Library Juice, an electronic magazine that dealt with philosophical and political dimensions of librarianship.

Your Voice Speaks Volumes Jane Setter, 2019-10-24 Why do we speak the way we do, and what do our voices tell

others about us? What is the truth behind the myths that surround how we speak? Jane Setter explores these and other fascinating questions in this engaging introduction to the power and the science of the voice. The book first takes us on a tour of the sounds in our language and how we produce them, as well as how and why those sounds vary in different varieties of English. The origins of our vast range of accents are explained, along with the prejudices associated with them: why do we feel such loyalty to our own accent, and what's behind our attitudes to others? We learn that much of what we believe about how we speak may not be true: is it really the case, for instance, that only young people use 'uptalk', or that only women use vocal fry? Our voices can also be used as criminal evidence, and to help us wear different social and professional hats. Throughout the book, Professor Setter draws on examples from the media and from her own professional and personal experience, from her work on the provenance of the terrorist 'Jihadi John' to why the Rolling Stones sounded American.
