Procesos industriales para materiales metálicos Julian Rodríguez Montes,Lucas Castro Martínez,Juan Carlos del Real Romero,2012-12-18 El objeto de este libro es proporcionar un texto visual sencillo, para introducir al alumno en los procesos de fabricación industriales, base fundamental para los futuros diseñadores y complemento para su formación artística. En general, los diseñadores piensan que no es su responsabilidad la selección de los materiales o la especificación de sus procesos de manufactura, pero por el contrario son muy determinantes, de hecho se podría llegar más lejos afirmando: "Cada material, su proceso". La forma del producto es el resultado de cómo fue fabricado y debería responder a como fue diseñado, para lo cual, la persona encargada de su fabricación debe conocer todos los procesos posibles, para elegir el más adecuado desde el punto de vista económico.
