**Nuclear Weapons Free Zones** Exequiel Lacovsky, 2021-03-09 This book explores the conditions under which Nuclear Weapons Free Zones (NWFZs) can be established. It analyzes four hypotheses that explain the factors contributing to the formation of NWFZs, building upon realist, constructivist and liberal theories from international relations. Through structured focused comparison, the book presents and compares the emergence of NWFZs in Latin America, the South Pacific, Southeast Asia, Africa, Central Asia, and the Middle East, which is a prospect for a NWFZ. The book argues that NWFZ projects depend on the following conditions: the security interest of regional states in avoiding nuclear threats, preexisting regional institutions and regional economic cooperation, leadership by a core of regional powers and shared interest in spreading non-proliferation norms. Democracy is not a necessary condition, but democratization can help overcome barriers presented by hesitant or opposed regional governments. As too many of the mentioned necessary conditions are lacking in the Middle East, a NWFZ project, thus, will be possible only after major political changes. This book will be of much interest to students of nuclear proliferation, arms control, security studies and International Relations.

**Negotiating the Nuclear Non-Proliferation Treaty** Roland Popp, Liviu Horovitz, Andreas Wenger, 2016-10-04 This volume offers a critical historical assessment of the negotiation of the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) and of the origins of the nonproliferation regime. The NPT has been signed by 190 states and was indefinitely extended in 1995, rendering it the most successful arms control treaty in history. Nevertheless, little is known about the motivations and strategic calculi of the various middle and small powers in regard to their ultimate decision to join the treaty despite its discriminatory nature. While the NPT continues to be central to current nonproliferation efforts, its underlying mechanisms remain under-researched. Based on newly declassified archival sources and using previously inaccessible evidence, the contributions in this volume examine the underlying rationales of the specific positions taken by various states during the NPT negotiations. Starting from a critical appraisal of our current knowledge of the genesis of the nonproliferation regime, contributors from diverse national and disciplinary backgrounds focus on both European and non-European states in order to enrich our understanding of how the global nuclear order came into being. This book will be of much interest to students of nuclear proliferation, Cold War history, security studies and IR.

*Total Cold War* Kenneth Osgood, 2006-02-23 When President Dwight Eisenhower spoke of waging total cold war, he was proposing nothing less than a global, all-embracing battle for hearts and minds. His wide-ranging propaganda campaign challenged world communism at every turn and left a lasting mark on the American psyche. Kenneth Osgood now chronicles the secret psychological warfare programs America developed at the height of the Cold War. These programs-which were often indistinguishable from CIA covert operations-went well beyond campaigns to foment unrest behind the Iron Curtain. The effort was global: U.S. propaganda campaigns targeted virtually every country in the free world. *Total Cold War* also shows that Eisenhower waged his propaganda war not just abroad, but also at home. U.S. psychological warfare programs blurred the lines between foreign and domestic propaganda with campaigns that both targeted the American people and enlisted them as active participants in global contest for public opinion. Osgood focuses on major campaigns such as Atoms for Peace, People-to-People, and cultural exchange programs. Drawing on recently declassified documents that record U.S. psychological operations in some three dozen countries, he tells how U.S. propaganda agencies presented everyday life in America to the world: its citizens living full, happy lives in a classless society where economic bounty was shared by all. Osgood further investigates the ways in which superpower disarmament negotiations were used as propaganda maneuvers in the battle for international public opinion. He also reexamines the early years of the space race, focusing especially on the challenge to American propagandists posed by the Soviet launch of Sputnik. Perhaps most telling, Osgood takes a new look at President Eisenhower's leadership. Believing that psychological warfare was a potent weapon in America's arsenal, Ike appears in these pages not as a disinterested figurehead, as he's often been portrayed, but as an activist president who left a profound mark on national security affairs. Osgood's distinctive interpretation places Cold War propaganda campaigns in the context of an international arena drastically changed by the communications revolution and the age of mass politics and total war. It provides a new perspective on the conduct of public diplomacy, even as Americans today continue to grapple with the challenges of winning other hearts and minds in another global struggle.
