From Quantum Paraelectric/Ferroelectric Perovskite Oxides to High Temperature Superconducting Copper Oxides -- In Honor of Professor K.A. Müller for His Lifework Annette Bussmann-Holder,Hugo Keller,Antonio Bianconi,2021-03-15 With this book, we wish to honor the lifework of K. Alex Müller and present him with this book on the occasion of his 94th birthday. We are convinced that he will very much enjoy reading it. We would like to thank all contributors to this book, who addressed topics complementary and related to his work. The articles of the book represent the efforts in solid state physics – spanning more than 60 years – which have been groundbreaking in scientific and applied sciences. Many of the current hot topics are derived from this earlier work which has pioneered the way toward new experimental tools and/or refined techniques. From this point of view, the book presents, on one hand, a historical review and, on the other hand, a directory of possible future research.

Four Centuries of Dutch-American Relations Hans Krabbendam,Cornelis A. van Minnen,Giles Scott-Smith,2009-09-09 Since Henry Hudson landed on Manhattan in 1609, the peoples of the Netherlands and North America have been inextricably linked. Four Centuries of Dutch-American Relations, written by a team of nearly one hundred Dutch and American scholars, is the first book to offer a comprehensive history of this bilateral relationship. This volume covers the main paths of contacts, conflicts, and common plans, from the first exploratory contacts in the early seventeenth century to the intense and multifaceted exchanges in the early twenty-first. Based on the most up-to-date research, Four Centuries of Dutch-American Relations will be for years to come a valuable and much-used reference work for anyone interested in the history and culture of the United States and the Netherlands and the larger transatlantic interdependent framework in which

they are embedded.

Oxford Studies in Normative Ethics Volume 12 Mark Timmons,2022-06-30 Oxford Studies in Normative Ethics is an annual forum for new work in normative ethical theory. Leading philosophers present original contributions to our understanding of a wide range of moral issues and positions, from analysis of competing approaches to normative ethics (including moral realism, constructivism, and expressivism) to questions of how we should act and live well. OSNE is an essential resource for scholars and students working in moral philosophy.
