In the Beginning Carolyn North, 2010-03-10 IN THE BEGINNING: CREATION MYTHS FROM AROUND THE WORLD is a beautifully illustrated and informative collection of creation stories from 15 cultures, using indigenous sources. These stories demonstrate that creation is ongoing, everywhere and always, and that all of us are creators all of the time. This engaging book of images and stories is ultimately about creativity in all its forms. Originally an exhibition, IN THE BEGINNING has appeared in museums, galleries, churches, and schools in several U.S. cities. An audio version of the book, in which the myths are read by Amy Walker, is available from Findhorn Press.

Creation Myths of the World David A. Leeming, 2009-12-18 The most comprehensive resource available on creation myths from around the world—their narratives, themes, motifs, similarities, and differences—and what they reveal about their cultures of origin. ABC-CLIO's breakthrough reference work on creation beliefs from around the world returns in a richly updated and expanded new edition. From the Garden of Eden, to the female creators of Acoma Indians, to the rival creators of the Basonge tribe in the Congo, *Creation Myths of the World: An Encyclopedia, Second Edition* examines how different cultures explain the origins of their existence. Expanded into two volumes, the new edition of *Creation Myths of the World* begins with introductory essays on the five basic types of creation stories, analyzing their nature and significance. Following are over 200 creation myths, each introduced with a brief discussion of its culture of origin. At the core of the new edition is its enhanced focus on creation mythology as a global human phenomenon, with greatly expanded coverage of recurring motifs, comparative themes, the influence of geography, the social impact of myths, and more.

Strugglebook Robert Thornborough, 2008-08-05 *Strugglebook: A Logical Search for the Truth of GOD* explores the

probability for the existence of God based primarily on the logic derived from science. While it addresses issues applicable to theology, it is not a theological work. There are literally hundreds of books on this subject, most detailing a standard set of arguments. This book follows that pattern for the first part but then extends itself into a series of coalescing arguments built on the latest science, all of which results in a unique presentation on the subject. Forming a conclusion respecting the reality of God on something as cold as logic is contrary to approaches generally considered acceptable to religious organizations that favor perhaps more ephemeral means based on redemption and faith. Those approaches based on other than logic have proven very successful for many individuals. That notwithstanding, the author is representative of that very large group of people who live in environments replete with corporate missions, budget building and spreadsheets, strength, weakness, opportunity and threat exercises, performance yields, compensation management, management by objective, measuring outcomes, and mini-MBA courses. The resulting objectivity built through vocation, results for many individuals, including the author, in a need to question the rationale behind faith and God. This book is the record of a search for the reality of God consistent with satisfying the needs dictated by the logic often demanded by the modern mind. Do world and personal events result in a questioning of your faith? Do you wonder about a God that could allow 9/11 or the deaths of tens of thousands in a cyclone? Have you watched as someone you love suffers, and as a result, questioned the very existence of God? Have the truths of modern science served to displace your belief in God? Does your working life consumed with spreadsheets, schedules, logical analysis, objectives, investment returns, getting the job done on time, and all the other appendages of working life impose an atmosphere that works against belief in God? Do you feel unsure about sharing your beliefs with others because you may be ridiculed? Have you been exposed to the views of Richard Dawkins through his book *The God Delusion*, or other well known atheists who attempt seemingly with some success to use science to prove God doesn't exist and in so doing, relegate your beliefs as unworthy? These questions and situations imposed themselves on the author of this book, an educator and computer application designer who decided to take a year out of his life and find the answers. This book chronicles his search for the truth of God. Calling on history and using the very latest scientific knowledge, coupled with related philosophy, and sometimes delivered somewhat irreverently, the book delves into the issues, presenting positive and dissenting views respecting the existence of God and then argues the case from the data presented. The reader shares the full rationale for decisions made.

Creation Ann Pilling, 1997 This volume includes creation stories from all over the world. There are tales from China, the Cameroons, Sri Lanka, Norway, Ghana and Kenya; Greek and Norse Myths; stories from the Australian Aboriginals, the Inuit

people and three separate North American Indian tribes.

The Power of Stars Bryan E. Penprase, 2017-05-05 Completely revised and updated, this new edition provides a readable, beautifully illustrated journey through world cultures and the vibrant array of sky mythology, creation stories, models of the universe, temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky. Sections on the archaeoastronomy of South Asia and South East Asia have been expanded, with original photography and new research on temple alignments in Southern India, and new material describing the astronomical practices of Indonesia, Malaysia and other Southeast Asian countries. Beautiful photographs of temples in India and Asia have been added, as well as new diagrams explaining the alignment of these structures and the astronomical underpinnings of temples within the Pallava and Chola cultures. From new fieldwork in the Four Corners region of North America, Dr. Penprase has included accounts of Pueblo skywatching and photographs of ceremonial kivas that help elucidate the rich astronomical knowledge of the Pueblo people. The popular "Archaeoastronomy of Skyscrapers" section of the book has been updated as well, with new interpretations of skyscrapers in Indonesia, Taiwan and China. With the rapid pace of discovery in astronomy and astrophysics, entirely new perspectives are emerging about dark matter, inflation and the future of the universe. *The Power of Stars* puts these discoveries in context and describes how they fit into the modern perspective of cosmology, which has arisen from the universal human response to the sky that has inspired both ancient and modern cultures.

Econarrative Arran Stibbe, 2023-12-14 Econarratives are all around us, describing and shaping human interactions with other species and the physical environment. This book provides a foundational theory of econarrative, drawing from narratology, human ecology, critical discourse analysis, and ecolinguistics, and offering insights from a rich variety of texts including: · Creation myths · Indigenous podcasts · Ethical leadership speeches · Haiku poetry · Documentary films · New nature writing · Advertisements and campaigns · Apocalyptic stories Adopting a global, transdisciplinary approach, it conducts in-depth analysis of specific works, including the Cherokee myth *How the World Was Made*, the speeches of Vandana Shiva, *Nightwalk* by Chris Yates, Naomi Klein's documentary *This Changes Everything*, the podcasts of Mohawk seed-keeper Rowen White, the *Book of Revelation*, and *The Dark Mountain Manifesto*. Raising awareness of the powerful role that language plays in structuring our lives and society, the book reveals narratological and linguistic features that convey activation, emotion, empathy, identity, placefulness, enchantment, compassion and other key factors that shape interactions with the natural world. If we want real, fundamental change, then we must search for new econarratives to live by.

Honour of Kings Ancient and American History 1 FULL COLOR TEXT Ellen Gerwitz,2013-01-10 This FULL COLOR textbook is based on the premise that God created the world approximately 6,000 years ago. It takes key events from both the Bible and world history and places them into a single time line. Great care is taken to separate fact from myth so that students can clearly understand how history unfolded during the world's first 3,000 years. Photographs throughout the text enhance the student's learning. After completing the ancient history section, students will embark on a journey through an American history timeline beginning with Native Americans in the 1500s and ending with the Declaration of Independence in 1776. - Multi-level for grades 1 to 6. - Non-consumable. - Chronological timeline. - Biblical worldview. - Integrates both Bible and world history. - American History timeline - Hands-on learning activities. - Encourages understanding of overall historical timeline. - Covers the history of all continents.

The E.T. Chronicles Rita Louise,Wayne Laliberté,2023-06-23 The E.T. Chronicles is a startling and comprehensive examination of ancient myths and legends that describe extraterrestrial visitors and their encounters with humanity since the dawn of time. Organized into a chronology that starts with in the beginning and ends with the advent of civilization, it brings together myths from many cultures (including the Sumerians, the Greek, the Maya and the Aborigines of Australia) and explores them in the context of current scientific discoveries. The result is a mind-blowing re-visioning of human origins through close reading of ancient texts relating to: • creation• gods and goddesses• heaven• the gods and their toys (space ships or chariots?)• the quest for immortality Could it be that those ancient stories of the gods were more than just the product of someone's fanciful imagination? Is it possible that the writers, chroniclers, and scribes of our distant past actually record an accurate view of our origin? Could it be that we are really children of the stars?

The Big Argument John F. Ashton,Michael Westacott,2006 Today, some of the world's best minds - in a variety of disciplines - grapple with whether there is any real purpose to our lives. Yet not only do many scientists believe in the God who created us with purpose, they also understand that what we do in the here and now has consequences in the next life.John Ashton has compiled a group of essayists who specialize in fields such as archaeology, astronomy, biblical scholarship, and more. The result is a fascinating exploration of an age-old question, sure to intrigue believers and skeptics alike.

Teaching the Bible Mark Roncace,Patrick Gray,2012-11-05 While books on pedagogy in a theoretical mode have proliferated in recent years, there have been few that offer practical, specific ideas for teaching particular biblical texts. To address this need, Teaching the Bible, a collection of ideas and activities written by dozens of innovative college and seminary professors, outlines effective classroom strategies—with a focus on active learning—for the new teacher and

veteran professor alike. It includes everything from ways to incorporate film, literature, art, and music to classroom writing assignments and exercises for groups and individuals. The book assumes an academic approach to the Bible but represents a wide range of methodological, theological, and ideological perspectives. This volume is an indispensable resource for anyone who teaches classes on the Bible.

Medicine for the Earth Sandra Ingerman, 2010-05-05 From cross-cultural legends recounting shamanic cures to the biblical accounts of the parting of the Red Sea and Jesus multiplying the loaves and fishes, many spiritual traditions are rich in stories about seemingly inexplicable transformations of the natural world. The ancient healing art of transmutation, in which toxic substances are transformed into safe substances, is mentioned in all the world's great spiritual traditions, including Hinduism and Taoism. And while many have tapped this body of work to heal the self, it has yet to be used to heal our environment. For twenty years, Sandra Ingerman has studied alternative ways to reverse environmental pollution. In this book, Ingerman takes us on a remarkable journey through the history of transmutation, teaching us how we can use this forgotten technique to change ourselves and our environment. She provides us with creative visualizations, ceremonies, rituals, and chants derived from ancient healing practices that produce miraculous, scientifically proven results. In one dramatic illustration of what can be accomplished when consciousness and awareness fuel our actions, Ingerman describes her own success in transforming the nature of chemically polluted water.

Myths and Hero Tales Agnes Regan Perkins, 1997-11-25 This one-stop cross-cultural selective guide to recent retellings of myths and hero tales for children and young adults will enable teachers and library media specialists to select comparative myths and tales from various, mostly non-European cultures. The focus is on stories from Native America, Asia, Africa, the Middle East, Central and South America, and Oceania. The Guide contains extensively annotated entries on 189 books of retellings of myths and hero tales, both ancient and modern, from around the world published between 1985 and 1996. Represented are 1,455 stories suitable for use with young people from mid-elementary through high school. The entries, arranged alphabetically by writer, contain complete bibliographic data, age and grade levels, and evaluative annotations. Seven indexes—title, author, illustrator, culture, story type, name, and grade level—make searching easy. The story type index will enable teachers to select comparative myths and tales from different cultures on more than 50 types of myths and hero tales. Among the many myth types cited are origin of human beings and the world, comparative social customs and rituals, natural and heavenly phenomena, animal appearance and behavior, searches and quests, and tricksters. Among the hero tale types are fools and buffoons, kings and queens, warriors, monster slayers, important female figures, magicians, voyagers and adventurers, and spiritual leaders. The Guide concludes with a bibliography of retellings published earlier that have come to be considered standard works.
