**Legal Form and the End of Law** Cosmin Cercel, Gian-Giacomo Fusco, Przemyslaw Tacik, 2024-10-14 Following the 100th anniversary of Pashukanis' General Theory of Law and Marxism (1924), this volume aims to breathe new life into the main category of Pashukanian legacy, the concept of legal form. This book offers new, deeper and more general, ways in which the concept of legal form can be used to push forward Marxist – post-Marxist or hauntingly Marxist – legal theory. Accordingly, this book does not pledge allegiance to reconstructing and reconsidering the official interpretative legacy of the legal form. Instead, it mobilises the revolutionary conceptual potentialities that this term contains. When investigated thoroughly, and in many dimensions, the legal form becomes a privileged vantage point not only into the greatest law-related riddles of Marxism (such as the relation between economy and the state or withering away of statal apparatuses), but the whole of modernity as the epoch determined by – if not overlapping with – capitalism. This book aims to think with the legal form rather than explain this concept. In so doing, it offers a panoply of theoretical perspectives that address legal subjectivity, abstraction, autonomy of the law and, last but not least, withering away of the law. This contemporary interrogation of the relevance of the concept of legal form will be of considerable interest to scholars and students of legal and political theory.

*Modern Labour Economics* Peter Sloane, Paul Latreille, Nigel O'Leary, 2013-03-05 Labour economics as a discipline has changed dramatically in recent years. Gone are the days of a job for life. These days, firms and employees are part of a less regulated, more fluid, and more international labour market. Knowledge, training, human resource development and human capital are all major factors on the contemporary scene. This new textbook is the first properly international textbook to reflect these swingeing changes. Its key areas of concentration include: the increasing importance of human capital including education and occupational choice the major subdivision of personnel economics including economic inactivity and absenteeism comparative cross country studies and the impact of globalization and migration on national labour markets equal opportunities and issues of discrimination on the basis of race, gender and disability conflict at work, including both strikes and, uniquely, individual disputes. Other issues explored include the supply and demand of labour, wages, the current role of trade unions, bargaining and conflict, and working time. The book is written in a clear, accessible way with some mathematical exposition, reflecting the text's grounding in current microeconomic theory. The book also contains case studies designed to illuminate theoretical concepts and exercises and discussion questions to test the students understanding

of the various concepts outlined in the text.

**Legal Form** Cosmin Cercel,Gian-Giacomo Fusco,Przemyslaw Tacik,2024-10-14 A century after the publication of Evgeny Pashukanis' pivotal book *General Theory of Law and Marxism*, this collection presents a comprehensive account and analysis of his key concept of legal form. Evgeny Pashukanis' *General Theory*, born amidst the fervour of the first socialist revolution, remains still a crucial reference point in Marxist theories of the law and critical legal theory. Its theoretical depth paved the way for new understandings of the relationship between Marxism and the law. Its crucial virtue continues to be, even after a century, the ability to articulate epochal concerns in the context of a socialist revolution that turned hitherto theoretical problems into dilemmas of practice. This book returns to Pashukanis' main concept: 'legal form'. Through this jurisprudential category Pashukanis aimed to grasp the dependence of the law on the economy, and at the same time, to enquire into the degree to which the law preserves its autonomy from economic relations. In other words, the legal form as a concept conveys both the law's dependence on the economic sphere of exchange and its greatest inherent specificity: the way it translates economic relations into its proper language and set of legal/ideological constructs. The contributions to this volume provide a range of perspectives on how the concept of legal form has been developed and reinterpreted. Including the first English translation of Pashukanis' essay, 'Hegel, State and Law', this collection will be of considerable interest to scholars and students of legal and political theory.

*The Collective Dimensions of Employment Relations* Tindara Addabbo,Edoardo Ales,Ylenia Curzi,Tommaso Fabbri,Olga Rymkevich,Iacopo Senatori,2021-08-09 This edited volume explores the old and new "collective dimensions" of employment relations. It examines specific challenges stemming from new forms of work of the digital and sharing economy, such as measurement, monitoring, assessment, and remuneration of work, the protection of work-life balance, the impact of new technologies on health and safety, the adaptation of occupational skills to new work processes, and the responses to the digital restructuring of undertakings. It addresses a series of questions such as how the representational action of unions and works councils can adapt to the challenges posed by new production systems and whether the legislative framework needs to be reformed to ensure that digital workers enjoy the right to collective representation. This important collection offers readers a renewed theoretical perspective and justification of the role that the dialogue between workers (representatives) and companies could play in an increasingly complex world of work.

*Social Exclusion in Later Life* Kieran Walsh,Thomas Scharf,Sofie Van Regenmortel,Anna Wanka,2021-03-30 Drawing on interdisciplinary, cross-national perspectives, this open access book contributes to the development of a coherent scientific discourse on social exclusion of older people. The book considers five domains of exclusion (services; economic; social

relations; civic and socio-cultural; and community and spatial domains), with three chapters dedicated to analysing different dimensions of each exclusion domain. The book also examines the interrelationships between different forms of exclusion, and how outcomes and processes of different kinds of exclusion can be related to one another. In doing so, major cross-cutting themes, such as rights and identity, inclusive service infrastructures, and displacement of marginalised older adult groups, are considered. Finally, in a series of chapters written by international policy stakeholders and policy researchers, the book analyses key policies relevant to social exclusion and older people, including debates linked to sustainable development, EU policy and social rights, welfare and pensions systems, and planning and development. The book's approach helps to illuminate the comprehensive multidimensionality of social exclusion, and provides insight into the relative nature of disadvantage in later life. With 77 contributors working across 28 nations, the book presents a forward-looking research agenda for social exclusion amongst older people, and will be an important resource for students, researchers and policy stakeholders working on ageing.

**Performance Appraisal in Modern Employment Relations** Tindara Addabbo, Edoardo Ales, Ylenia Curzi, Tommaso Fabbri, Olga Rymkevich, Iacopo Senatori, 2019-12-10 Contributing to the debate on work performance evaluation in a time of technological transformation, this book explores the impact of digitisation on production and organisation models, as well as on the rights and interests of the stakeholders involved. As organisations down-size, merge with other companies and become decentralised, the boundaries in employer-employee-customer relationships are blurred and new models for the organisation and assessment of work performance have emerged. With these new models, innovative regulatory approaches are sorely needed. Taking an interdisciplinary approach and drawing on theoretical concepts from organisation studies, human resource management, sociology and labour economics, this all-encompassing collection is not only essential reading for academics and students, but also for policy-makers and employers who are looking for innovative and practical solutions to the challenges of modern employment relations.

**The Slave in Legal and Political Philosophy** Tom Frost, 2025-02-18 This book explores how the figure of the slave has been used to construct ideas of freedom in Western political and legal philosophy. The figure of the slave has supported philosophical and legal defences of colonialism, coloniality and the supremacy of the white subject. Yet for Giorgio Agamben, the slave stands (almost counterintuitively) as an exemplar of a potential form of future positive political existence. Developing this line of thought, the book reads key thinkers Agamben engages with in his thought and writings - including Aristotle, Saint Paul and G W F Hegel - and draws on decolonial theory to argue that the lives of people who were enslaved and unfree, and their actions and gestures, can point towards a paradigmatic form of political belonging. By reading Agamben in a decolonial direction, we can imagine alternative forms of agency, recognition and subjectivity, which can

challenge the necropolitical world of racial capitalism in which we live. This study will appeal to scholars, researchers and graduate students with an interest in the thought of Giorgio Agamben, radical politics, legal and political philosophy and decolonial theory.

**The Human Sustainable City** Bruno Forte,Maria Cerreta,Pasquale De Toro,2019-06-04 This title was first published in 2003. Seven years after Habitat II culminated with the Istanbul agreement on Sustainable Urban Development, this book brings together many of the world's leading experts from the fields of architecture, urban planning, economics, sociology, politics, environment and geography to assess the successes and failures in fulfilling the objectives decided upon at this historic meeting. Illustrated with a wide range of case studies, this volume is divided into three main sections; firstly examining the challenges, secondly, the approaches, and finally, the practices. The book represents a critical appraisal not only of the issues related to urban development but also of the modalities to face these issues from real examples, these in return can be used as starting points to construct new 'real utopias' or at least, to future 'best practices'.

Yearbook of the United Nations, 50th Anniversary Edition (1945-1995) United Nations,2023-07-24 'Through a combination of narrative and key historical documents, this Special Edition of the Yearbook offers a picture of the United Nations' extraordinary achievements over the past fifty years', observes Secretary-General of the UN, Dr Boutros Boutros-Ghali in his Foreword to the book. Fully indexed, this Special Edition of the Yearbook recounts the early initiatives that led to the adoption of the Charter of the UN on 25 June 1945 at San Francisco. It captures the major issues and more, and highlights the lasting milestones of the 50 years of UN history, projecting the imperatives of the organization into the next century.

**Place and Politics in Latin American Digital Culture** Claire Taylor,2014-05-09 This volume explores one of the central issues that has been debated in internet studies in recent years: locality, and the extent to which cultural production online can be embedded in a specific place. The particular focus of the book is on the practices of net artists in Latin America, and how their work interrogates some of the central place-based concerns of Latin(o) American identity through their on- and offline cultural practice. Six particular works by artists of different countries in Latin America and within Latina/o communities in the US are studied in detail, with one each from Uruguay, Chile, Argentina, Colombia, the US-

Mexico border, and the US. Each chapter explores how each artist represents place in their works, and, in particular how traditional place-based affiliations, or notions of territorial identity, end up reproduced, re-affirmed, or even transformed online. At the same time, the book explores how these net.artists make use of new media technologies to express alternative viewpoints about the locations they represent, and use the internet as a space for the recuperation of cultural memory.

**Giorgio Agamben** Tom Frost,2013-11-20 This book collects new contributions from an international group of leading scholars - including many who have worked closely with Agamben - to consider the impact of Agamben's thought on research in the humanities and social sciences. Giorgio Agamben: Legal, Political and Philosophical Perspectives addresses the potential of Agamben's thought by re-focusing attention away from his critiques of Western politics and towards his scheme for a political future. Part I of the book draws upon a wide range of issues such as legal oaths, legal reasoning and Christian conceptions of love in order to examine the potential for Agamben's work to impact upon future legal scholarship. Part II focuses on political perspectives that include references to Marx, Rousseau and Agamben's conception of the 'messianic'. Theology, biology, and the thought of Gilles Deleuze, Walter Benjamin and Antonin Artaud are all drawn upon in Part III to explore philosophical perspectives in Agamben's thought. This book demonstrates the importance and originality of Giorgio Agamben, who has articulated a vision of politics that must be recognised as an influential contribution to modern philosophical and political thinking. It is a book that will be of considerable interest to many working across the humanities and social sciences.
