**Business Forecasting** John E. Hanke, Dean W. Wichern, 2005 This top-selling book presents, in a straightforward, application-driven manner, the basic statistical techniques necessary for preparing individual business forecasts and long-range plans. The emphasis is on the application of techniques by management for decision-making. This essential book provides understandable coverage of several important topics, often omitted from other books, including econometrics; autocorrelation analysis and the use of Box-Jenkins techniques; judgmental forecasting techniques; and the means of selecting the correct forecasting technique and analyzing data. The book also reviews statistical concepts prior to introducing material that requires an understanding of those concepts. The sixth edition of Business Forecasting has been revised to include instructions on using Excel spreadsheets and the statistical package MINITAB in forecasting. An essential

reference for every professional in a business of any size, from large corporations to small family-run firms.

**Ciencias sociales, algunos conceptos básicos** Pablo González Casanova, 1999 Las ciencias sociales viven hoy una desmesura. La multiplicidad de temas y problemas tratados, la diversificación de sus enfoques y métodos, su fragmentación en múltiples y variadas especialidades constituyen un proceso al mismo tiempo depurador y vigorizante. Los trabajos de este libro registran los grandes cambios que condujeron a esa fragmentación teórica y disciplinaria y proponen, algunos, la construcción de un nuevo paradigma que corresponda a una sociedad hecha de muchas sociedades no excluyentes.
