**Retiring** Teresa M. Amabile,Lotte Bailyn,Marcy Crary,Douglas T. Hall,Kathy E. Kram,2024-10-02 Retirement, as a major life transition, can be both thrilling and challenging in unexpected ways. Written by acclaimed authors in the fields of business leadership, careers, and work, this book goes beyond the typical financial and health-related advice on retirement, providing insights to guide you in broader areas of your life - identity issues, relationship challenges, and questions about creating a new retirement life structure that works for you. With lively, engaging writing, the book tells the detailed retirement transition stories of 14 people - and draws on over 200 interviews with 120 people - to explore how retiring involves a reconstruction of both the person and their life structure. You'll gain wisdom on the common themes and the wildly different approaches people take to the four big tasks of retiring: making the retirement decision, detaching from work both tangibly and psychologically, building a new life structure for retirement, and settling into a relatively stable retirement life - but prepared to restructure again as life unfolds into the future. Throughout each chapter, you'll see how the dynamic interplay of self, life structure, and external context affect a retiring person's day-to-day experience in the final months of their career, as well as their early years of retirement - and how life satisfaction depends largely on alignment among the three. At the same time, you'll learn how family, friends, and colleagues, as well as the organization the person is retiring from, can play a crucial role. This book is for you if you are seeking deep, nuanced insight into - and practical advice on - the psychological, social, and life-restructuring aspects of retirement that can make all the difference for life satisfaction. It is also for you if you are a family member or friend of a retiring person, a helping professional, or an organizational leader who

cares about your older workers and the value they bring to your organization even as they depart.

The Essential Sheehan George Sheehan,David Willey,2013-10-29 Runners and readers whose connections to the sport date back to the 1970s surely remember Dr. George Sheehan, the New Jersey cardiologist and writer whose unique approach to the joy of exercise helped spark America's fitness boom. As a columnist for his local Red Bank Register and later as the medical editor of Runner's World and through eight bestselling books, Sheehan became, through the influence of his example and writing, the spokesperson for an entire generation of runners and the manifold benefits they discovered through the running lifestyle. Sadly, several of Sheehan's books are now out of print, and the hundreds of newspaper magazine columns he penned over the last 25 years of his life have been lost to time. Until now. The Essential Sheehan is a collection of the best running pieces George Sheehan wrote in his lifetime, many of which ran in Runner's World when Sheehan was a columnist there. This collection illuminates Sheehan's lasting influence on running culture and is a reintroduction of George Sheehan to a new generation of runners and readers.

**Think Green, Take Action** Daniel A. Kriesberg, 2010-08-16 This book provides an annotated bibliography of age-appropriate literature and activities, showing children the importance of environmental issues and teaching them the skills to take action. In past years, teaching children about conservation and environmental issues might have been an optional side topic to complement an earth science curriculum, but in today's educational climate, being green is a subject with great relevance and importance. This book combines a wide variety of techniques to help students understand environmental issues and gain the skills needed to take action. The children's literature and classroom activities suggested in *Think Green, Take Action: Books and Activities for Kids* are appropriate for elementary school students from grades three through seven, covering three major environmental issues: endangered species, resource depletion, and pollution. After students have a grasp of the causes of these environmental problems, the final chapter presents ways to take easy action that can create ripples of change across the world. Educators in museums and nature centers, home-schooled children, and their parents comprise an appropriate secondary audience for this instructive text.
