Theory of Evolution - National Geographic Society Oct 19, 2023 · Darwin and a scientific contemporary of his, Alfred Russel Wallace, proposed that evolution occurs because of a phenomenon called natural selection. In the theory of natural selection, organisms produce more offspring than are able to survive in their environment. *Evolution Explained: How Species Change Over Time* Apr 28, 2025 · Evolution explains how microscopic single-celled organisms eventually gave rise to the vibrant explosion of life we see today. It tells us how species adapt, survive, diverge, and sometimes disappear. **Evolution | Definition, History, Types, & Examples | Britannica** Jul 31, 2025 · evolution, theory in biology postulating that the various types of plants, animals, and other living things on Earth have their origin in other preexisting types and that the distinguishable differences are due to modifications in successive generations. **Evolution - Wikipedia** The scientific theory of evolution by natural selection was conceived independently by two British naturalists, Charles Darwin and Alfred Russel Wallace, in the mid-19th century as an explanation for why organisms are adapted to their physical and biological environments. *An introduction to evolution* Evolution helps us to understand the living world around us, as well as its history. Biological evolution is not simply a matter of change over time. *evolution | Learn Science at Scitable - Nature* Evolution is a process that results in changes in the genetic material of a population over time. Evolution reflects the adaptations of organisms to their changing environments and can result in... **What is evolution? | Definition of evolution - YourGenome** In biology, evolution is the change in the characteristics of a species over several generations and relies on the process of natural selection. The theory of evolution is based on the idea that all species are related and gradually change over time. **EVOLUTION Definition & Meaning - Merriam-Webster** Evolution is a process of continuous branching and diversification from common trunks. This pattern of irreversible separation gives life's history its basic directionality. Evolution - Definition, Types, Advantages, Examples Nov 13, 2024 · Evolution is the process by which species change over time through the gradual accumulation of genetic variations, driven by mechanisms like natural selection, genetic drift, and mutation, leading to the development of new traits or species. *Evolution - Natural Selection, Adaptation, Genetics | Britannica* Jul 31, 2025 · Biological evolution is the process of change and diversification of living things over time, and it affects all aspects of their lives— morphology (form and structure), physiology, behaviour, and ecology.
