Inner Mastery, Outer Impact Hitendra Wadhwa,2022-06-07 Based on his highly popular Columbia Business School course "Personal Leadership & Success", Dr. Hitendra Wadhwa shares key principles for how to pursue success by letting your true self shine through in everything you do. In our pursuit of success, we often struggle to balance the world's demands with our own dreams. Some of us pursue Outer Success, wanting to be liked and loved, supported and promoted. But in our quest for worldly glory, we may ignore the subtle stirring of our spirit, waking up one day to realize just how far we have drifted from our personal ideals. Others among us seek Inner Success, wanting the freedom to pursue our own calling. But in our quest to be true to ourselves, we may end up hurting, disappointing, or antagonizing others, straining relationships and being sidelined. It seems that our drives for Outer and Inner Success are destined to clash. But perhaps that's only because we've been searching for success in the wrong places. We can pursue from the place where our greatest potential is held, our Inner Core, by activating Five Core Energies: Purpose, Wisdom, Growth, Love, and Self-Realization.

Through extensive scientific research and masterful storytelling about exemplary figures like Mahatma Gandhi, Abraham Lincoln, Mother Theresa, Eleanor Roosevelt, and Nelson Mandela—and everyday heroes drawn from Dr. Hitendra Wadhwa's class at Columbia Business School and client workshops at Mentora Institute—readers arrive at timeless principles of success in life and leadership. Empowered by your Five Core Energies, you discover how to create outer impact from a place of inner mastery. With a PhD in Management Science from MIT and a lifelong study of the world's mystic traditions, Wadhwa brings a mathematician's rigor and a truth-seeker's spirit to some of today's most vexing questions about authenticity, success, leadership, and human potential. This book shows how by activating your Inner Core and expressing it in everything you do, you create the conditions where Inner Success and Outer Success can flourish in mutual harmony.

Cosmopsychology Gene F. Collins Jr. Ph.D., 2009-11-21 Cosmopsychology The Psychology of Humans as Spiritual Beings Cosmopsychology assumes that human beings are essentially spiritual beings who are multi-dimensional, composed of many parts and connected to many dimensions of the Cosmos. It has been defined as astrology, as the study of psychospiritual development, and as the psychology of extraterrestrial beings. Cosmopsychology is the study of the relationship between the mind and the Cosmos. Cosmopsychology refers both to the correspondences between the human mind and the external

universe and to the growth or evolution of the mind as it moves to higher forms of consciousness. It examines those parts, links, and dimensions that are not found in traditional, academic psychology. Cosmopsychology provides insights into your personality and your destiny through the contributions of astrology, numerology, the I Ching, Jungs Analytical psychology, Hartmanns Ego psychology, Bernes Transactional Analysis, Assagiolis Psychosynthesis, Hermeticism, Idealism, New Thought, and the Perennial Philosophy. The mysteries of karma are laid out as they are found in the ancient Indian philosophy of Vedanta. Psychology was built on classical physics. Cosmopsychology is built on quantum physics, the holographic universe, string theory, M-theory, and F-theory. Physics has come full circle, returning to the science of vibrations and the philosophy of idealism as taught by Pythagoras, Socrates, and Plato. Everything is connected both spatially and temporally. At this deep level of Being, consciousness chooses what manifests. Cosmopsychology encompasses the nature of consciousness, meditation, karma, and rebirth and examines their roles in Individuation, Self-Actualization, and Self-Realization.
