Grammar in ELT and ELT Materials Graham Burton, 2023-06-06 This book investigates the content of the grammar syllabus typically employed in mainstream English Language Teaching. Using a mixed-methods approach, the author examines how the syllabuses used in coursebooks are actually constructed, how they evolved and how valid their contents are as a basis for teaching. The research reported consists of a broad exploration of primary sources in order to outline the evolution of ELT pedagogical grammar; ten interviews with key ELT authors and publishing professionals, which allows for the investigation of the decision-making processes underlying the choice of grammar content in ELT teaching materials; and finally, the presentation of case studies which examine three areas of grammar, analysing the evolution of their treatment in ELT materials (both historical and contemporary) and comparing their current treatment to data on real learner use. This book contributes to the literature on syllabus design and pedagogical grammar and builds on existing research into materials design. It will be of interest to researchers and professionals working in the fields of applied linguistics, pedagogical grammar, curriculum design and materials design.

English File Intermediate Plus Mike S. Boyle, Christina Latham-Koenig, Clive Oxenden, 2014-03-20 English File Intermediate Plus Student's Book is suitable for CEFR level B1 - B2 English File, third edition, provides a balance of grammar, vocabulary, pronunciation and skills to give students the right mix of language and motivation to get them talking. Applied Linguistics and Materials Development Brian Tomlinson, 2012-12-06 Focuses for the first time on materials development and applications of current research and theory for the main areas of applied linguistics (e.g. second language acquisition, pragmatics, vocabulary studies). There are many books on applied linguistic theory and research and there are now a number of books on the principled development of materials for language learning, but this book takes a new approach by connecting the two concerns. Each of its chapters first of all presents relevant theories and research conclusions for its area and then considers practical applications for materials development. The chapters achieve these applications by reporting and commenting on current theory and research, by analysing the match between current published materials and current theory and by suggesting and exemplifying applications of current theory to materials development. This will be an essential resource both for those studying or teaching materials development and for those studying or teaching applied linguistics.

Addressing Cultural Bias in Contemporary English Language Teaching Stephen Branigan, 2025-06-26 For all EFL teachers wishing to embark on an international career, this book examines the traditional over-focus on Anglophone culture in English language teaching (ELT). Mainstream methodology and course content tend to assume that learners' main objectives are to communicate in an Anglophone country with native speakers. Times have changed. Nowadays, most English language communications actually occur as a lingua franca between non-native speakers. Teacher-training courses and EFL course content neglect this changed nature of ELT. This potentially leaves teachers underprepared for the fact that the actual needs of their students may not necessarily include all things Anglophone. The book aims to raise awareness of the cultural bias that continues to exist in ELT. It offers an approach which includes content and methodology which rebalances cultural content to include more localised and multicultural context. It considers the skills needed by contemporary learners whose motivation is to interact interculturally with both native and non-native speakers of the language.
