Thinking Through Breast Cancer Mary Ann G. Cutter, 2018-03-06 Anyone who has been diagnosed with breast cancer or knows someone who has been diagnosed with breast cancer recognizes that cancer raises a host of questions concerning its nature and how we treat it. Such questions frame the difficult decisions that patients must make about their treatment and care. Thinking Through Breast Cancer is a philosophical investigation of how breast cancer is described, explained, evaluated, and socialized in medicine. Written by a breast cancer survivor, the book interweaves personal experience with a systematic breakdown of key and highly pertinent philosophical concepts, and brings to light insights that emerge in metaphysics, epistemology, ethics, social and political philosophy, and bioethics. Further, it is an investigation of the ethical implications of understanding breast cancer. Cutter seamlessly combines clinical information with philosophical analysis and makes recommendations as to how we can navigate the complex and, at times, uncertain terrain of breast cancer knowledge and care. In this way, the book is not simply a survey of what we know about breast cancer, but a personal search for guidance about navigating the complex, confusing, and frightening terrain of breast cancer diagnosis, treatment, and survival.

Catalogus Librorum Impressorum Bibliothecae Bodleianae in Academia Oxoniensi Bodleian Library, 1851

Breast Cancer Umberto Veronesi, Aron Goldhirsch, Paolo Veronesi, Oreste Davide Gentilini, Maria Cristina Leonardi, 2017-11-03 This book provides the reader with up-to-date information on important advances in the understanding of breast cancer and innovative approaches to its management. Current and emerging perspectives on genetics, biology, and prevention are first discussed in depth, and individual sections are then devoted to pathology, imaging, oncological surgery, plastic and reconstructive surgery, medical oncology, and radiotherapy. In each case the focus is on the most recent progress and/or state of the art therapies and techniques. Further topics to receive detailed consideration include particular conditions requiring multidisciplinary approaches, the investigation of new drugs and immunological agents, lifestyle and psychological aspects, and biostatistics and informatics. The book will be an excellent reference for practitioners, interns and residents in medical oncology, oncologic surgery, radiotherapy, pathology, and human genetics, researchers, and advanced medical students.

Breast Cancer Management for Surgeons Lynda Wyld, Christos Markopoulos, Marjut Leidenius, Elżbieta Senkus-

Konefka,2017-11-29 This textbook provides a comprehensive overview of the state of the art knowledge of breast cancer management for the modern breast surgeon. It covers all aspects of multidisciplinary care including primary breast and axillary surgery, reconstruction and oncoplastic techniques, external beam radiotherapy and newer techniques such as tomotherapy, intraoperative radiotherapy and brachytherapy. In addition, systemic therapies including chemotherapy, the latest biological targeted therapies and endocrine therapies are covered. Readers can find out about other important aspects of breast cancer such as genetics, screening, imaging and long-term health among others. Chapters take the reader through the basics up to the highest levels of knowledge in an easy to understand format with management algorithms to aid clinical care, generous referencing of the best literature and figures and photographs to illustrate each section. Published with the official approval of the European Society of Surgical Oncology (ESSO) and the European Society of Breast Cancer Specialists (EUSOMA), the book is written by a panel of recognised leaders in the field and is an indispensable guide for the practicing breast specialist and senior specialists in training, wishing to update their knowledge with the latest trends or polish off their training before accreditation.
