Think for Yourself Vikram Mansharamani, 2020-06-16 We've outsourced too much of our thinking. How do we get it back? Have you ever followed your GPS device to a deserted parking lot? Or unquestioningly followed the advice of an expert—perhaps a doctor or financial adviser—only to learn later that your own thoughts and doubts were correct? And what about the stories we've all heard over the years about sick patients—whether infected with Ebola or COVID-19—who were sent home or allowed to travel because busy staff people were following a protocol to the letter rather than using common sense? Why and how do these kinds of things happen? As Harvard lecturer and global trend watcher Vikram Mansharamani shows in this eye-opening and perspective-shifting book, our complex, data-flooded world has made us ever more reliant on experts, protocols, and technology. Too often, we've stopped thinking for ourselves. With stark and compelling examples drawn from business, sports, and everyday life, Mansharamani illustrates how in a very real sense we have outsourced our thinking to a troubling degree, relinquishing our autonomy. Of course, experts, protocols, and computer-based systems are essential to helping us make informed decisions. What we need is a new approach for integrating these information sources more effectively, harnessing the value they provide without undermining our ability to think for ourselves. The author provides principles and techniques for doing just that, empowering readers with a more critical and nuanced approach to making decisions. Think for Yourself is an indispensable guide for those looking to restore self-reliant thinking in a data-driven and technology-dependent yet overwhelmingly uncertain world.

Leveling the Playing Field Rod Scher,2016-08-01 Leveling the Playing Field explores the technologies that “trickle down” to the rest of us, those that were once the domain of the wealthy and powerful--and which therefore tended to make them even more wealthy and powerful. Now, though, these technologies--from books to computers to 3D printing and beyond--have become part of a common toolkit, one accessible to almost anyone, or at least to many more than had heretofore had access. This is what happens with most technologies: They begin in the hands of the few, and they end up in the hands of the many. Along the way, they sometimes transform the world.

LOS BARCOS OLÍMPICOS Y LA CARRERA TRANSATLÁNTICA Carlos A. Tafurt Loll, 2018-03-27 Tres buques hermanos constituyeron la clase Olympic de transatlánticos. Solo uno, tristemente por su tragedia, ha quedado en la memoria colectiva, el Royal Mail Ship (RMS) Titanic. Sin embargo, el viaje del famoso gran barco que concluyó con su naufragio en la noche del 14 y al 15 de abril de 1912, mientras realizaba el trayecto inaugural entre Southampton y Nueva York, nos invita a recapitular la interesante y dinámica histórica de notables y famosos navíos que influyeron en el concepto y la construcción de la clase Olympic.

Maritime Legacies and the Law Craig Forrest, 2019 The recent centenary of WWI has prompted a shift in the way attention is focused on legacy shipwrecks. This timely book considers the development of the laws that apply to these wrecks and the issues that surround them, and deftly analyses the adequacy of the existing legal framework to fulfil its promise of protecting legacy wrecks for future generations as historical and archaeological resources, memorials and, most importantly, as maritime war graves. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial}

The Wreck of the Titan Or, Futility Morgan Robertson, 2018-08-12 The Wreck of the Titan or, Futility: Large print by Morgan Robertson Port your wheel--hard over, repeated the first officer to the quartermaster at the helm--who answered and obeyed. Nothing as yet could be seen from the bridge. The powerful steering-engine in the stern ground the rudder over; but before three degrees on the compass card were traversed by the lubber's-point, a seeming thickening of the darkness and fog

ahead resolved itself into the square sails of a deep-laden ship, crossing the Titan's bow, not half her length away. Marine Geography Barbara Bischof, 2025-02-06 Marine Geography: Ocean Space and Sense of Place offers an innovative and comprehensive exploration of ocean spaces through the lens of geographic thought, establishing marine geography as a unique subdiscipline. It addresses the historical neglect of oceans in geography, providing core theories and approaches that can be applied to address geographic issues unique to this space, such as fisheries, blue economies, coastal development and management, mobilities and shipping, and maritime governance. Expanding traditional geographic concepts and incorporating the more-than-human elements inherent to this space, this work tweaks ways that geographic analysis can be applied to ocean systems in meaningful ways. This book explores mapping techniques and lays out the physical dynamics and scientific models that provide the contextual realities with which we engage these complex environments and explores how our land-based perspectives shape our interactions with the marine world. It assembles the innovative theoretical geographical frameworks being applied to address ocean spaces and provides the building blocks for establishing an ocean point of view. Filled with practical examples and foundational theories, this book serves as a vital resource for students, researchers, and anyone interested in bridging the gap between marine science and geography. - Offers ways to define ocean geographies from within contexts of ocean systems rather than a view from land that is simply extended seaward - Establishes a strategy to adapt or reframe core theories in both human and physical geography and proposes a start to a formal subdiscipline of marine and coastal geography - Provides a picture of geographic features unique to ocean systems and lays the foundation for a distinct geography of marine spaces with which to confront issues in oceans (natural resource management, marine science and exploration, communication and trade, boundaries, governance, etc.)
