Investigación y conocimiento Jorge Sarquis,2021-06-01 Este libro intenta acompañar las nacientes investigaciones con las ya conocidas de la Filosofía como la madre que alberga y de la cual se desprenden la Ciencia como saber primero y luego a partir del Renacimiento como Ciencia Experimental y productiva que al mismo tiempo que comprende mejor el mundo natural, se cree en el deber y la responsabilidad de explotarla en beneficio del hombre y la humanidad sin medir las consecuencias.

*Investigación y transferencia de las ciencias sociales frente a un mundo en crisis.* Manuel Bermúdez Vázquez,Alfonso Chaves Montero,2022-07-18 La sociedad actual se sitúa en la era de la posmodernidad, donde se pone en duda y crea confusión de forma que conocer y creer la realidad actual es una situación muy complicada. Vivimos en continuas crisis sociales, económicas, políticas, bélicas, educativas, climáticas y sanitarias como la pandemia de la Covid-19. Los/as investigadores tienen mucho que decir ante los retos y crisis planteados en el siglo XXI, a través de la investigación entre las distintas disciplinas como la sociología, la antropología, la psicología, la filosofía, la comunicación, la educación, el trabajo social, la politología, la economía, etc.

**Investigación y documentación jurídica** Isabel Villaseñor Rodríguez,Juan Antonio Gómez García,2014-01-30 El libro que el lector tiene en sus manos es un manual que aborda todos los problemas fundamentales que atañen a la investigación y su metodología en el ámbito del Derecho, y al acceso a la información y documentación jurídicas, tanto desde un punto de vista teórico como práctico. Todo ello se enfoca desde una perspectiva metódica integral, en el sentido de considerar ambos aspectos (metodología de la investigación y documentación) como realidades estrechamente relacionadas. Se pretende así ofrecer una orientación didáctica básica en lo relativo a los criterios científicos-técnicos para la elaboración y desarrollo de

procesos y trabajos de investigación en Derecho. El objetivo del libro es convertirse en una herramienta útil para estudiantes de Ciencias de la Documentación, de Derecho y, en general, para profesionales tanto de un campo como del otro. Su aspiración principal es que los estudiantes estén en condiciones óptimas para preparar trabajos de investigación en estas ramas por sí mismos y para valorar los ajenos. En este sentido, sería un manual de uso recomendado en el contexto de los estudios de Grado y Posgrado (Master y Doctorado) en Biblioteconomía y Documentación y en Derecho, y en cualesquiera otros estudios relacionados con estas materias. Isabel Villaseñor Rodríguez es profesora titular y desempeña labores de gestión en la Facultad de Ciencias de la Documentación de la Universidad Complutense de Madrid. Es autora de distintas publicaciones de carácter académico, nacionales e internacionales, tanto individuales como colectivas. Ostenta el cargo honorífico de Cronista Oficial de la Villa de la localidad toledana de Quintanar de la Orden. Juan Antonio Gómez García es profesor titular de la Facultad de Derecho de la Universidad Nacional de Educación a Distancia. Es autor de numerosas publicaciones nacionales e internacionales especializadas en Derecho y en Filosofía. Compagina su actividad académica con la de historiador y crítico cinematográfico.

*Homo Sapiens* Antonio Vélez Montoya,2013-08-20 The themes discussed in this book, translated to English by Australian Kieran Tapsell, form part of a revolutionary discipline known under the name of evolutionary psychology, a discipline that has become the most powerful tool discovered to date for man to understand himself. Much of the knowledge revealed by human science is explained as a result of the evolutionary process, using as a premise the theory that the majority of modern man's desires, impulses, interests and inclinations, and mental faculties were designed by the evolutionary process of the species. This new focus allows us to synthesize a group of already established findings, coming from such diverse disciplines as genetics, evolution, ethology, anthropology, psychology, neurology and epistemology. In this way, it is possible to explain an important part of complex human behavior under one sole, unifying principle: the direct or indirect search for a greater reproductive efficacy. With this work, easily readable by the general public, the author completes a cycle of subjects that he had begun with From the Big Bang to Homo Sapiens (2004), a book published in Spanish by Villegas Editores.

**21 segundos contemplando el Universo** Mikel Rivero Marcos, 2016 Si comprimíramos la edad de nuestro universo en un año, ese sería el tiempo que llevaría la humanidad mirando al cielo. Y en ese tiempo hemos observado el Cosmos y nos hemos preguntado quiénes somos y de dónde venimos. Así, desde un punto de vista objetivo y puramente científico, el lector verá respondida muchas de esas preguntas aprendiendo el saber humano desde el mismísimo origen del universo al de muchas de las enfermedades de la civilización actual. Cada vez se es más consciente en la comunidad científica de que el universo pudo no necesitar de un creador para existir, ya que las leyes de la física habrían surgido de la nada en un multiverso inflacionario y, por pura probabilidad nos tocó que en el nuestro - uno entre infinitos - se establecieran de esta manera, hace más de 13.000 millones de años. Más tarde, hace 4.600 millones de años nacería nuestro planeta y, con él, surgiría la vida. Una vida únicamente microbiana al principio, sola en la Tierra durante más de 3.000 millones de años antes de que se desarrollara el primer ser vivo multicelular. Entonces explotó la vida y se diversificó, evolucionaron las especies bajo el motor de la selección natural y, hace 21 segundos tan solo, apareció un primate muy peculiar, el ser humano. Atrapado desde que se hizo sedentario en una sociedad cada vez más compleja, la naturaleza yace ya apartada de nosotros y es el mundo artificial - en el que no evolucionamos -, donde estamos atrapados por el consumismo y un sistema socioeconómico desigualitario y enloquecedor. Universo, Tierra, Vida y Humanos son las cuatro partes de las que se compone este libro y realmente nuestra propia biografía. Espero que lo disfruten.

*Panorama actual de la química farmacéutica* Juan Antonio Galbis Pérez, 2004 La Química Farmacéutica actual se configura, cada vez más, como una rama independiente de la Química con metodología propia, surgiendo de la integración de una serie de disciplinas como la Química Orgánica, la Bioquímica y, en menor medida, la Farmacología, la Fisiología, y la Toxicología. El presente libro intenta abarcar los conocimientos actuales sobre esta disciplina.
