The Digital Double Bind Mohamed Zayani,Joe F. Khalil,2024 The Middle East's digital turn has renewed hopes of socio-economic development and political change across the region, but it is also marked by stark contradictions and historical tensions. In this book, Mohamed Zayani and Joe F. Khalil contend that the region is caught in a digital double bind in which the same conditions that drive the state, market, and public immersion in the digital also inhibit change and perpetuate stasis. The Digital Double Bind offers a path-breaking analysis of how the Middle East negotiates its relation to the digital and provides a roadmap for a critical engagement with technology and change in the Global South.

Black Movement Jeffrey O. G. Ogbar, 2025-04-15 The Great Migration of African Americans from the South to northern and western cities between 1915 and 1970 fundamentally altered the political, social, and cultural landscapes of major urban centers like New York, Chicago, Philadelphia, and Detroit, and changed the country as well. By the late twentieth century, Black people were mayors, police chiefs, and school superintendents, often at parity and sometimes overrepresented in municipal jobs in these and other cities, which were also hubs for Black literature, music, film, and politics. Since the 1970s, migration patterns have significantly shifted away from the major sites of the Great Migration, where some iconic Black communities have been replaced by mostly non-Black residents. Although many books have examined Black urban experiences in America, this is the first written by historians focusing on the post-Great Migration era. It is centered on numerous facets of Black life, including popular culture, policing, suburbanization, and political organizing across multiple cities. In this landmark volume, Jeffrey O. G. Ogbar and his contributors explore the last half century of African American urban history, covering a landscape transformed since the end of the Great Migration and demonstrating how cities remain dynamic into the twenty-first century. Contributors are Stefan M. Bradley, Scot Brown, Tatiana M. F. Cruz, Tom Adam Davies, LaShawn Harris, Maurice J. Hobson, Shannon King, Melanie D. Newport, Jeffrey O. G. Ogbar, Brian Purnell, J. T. Roane, Chanelle Rose, Benjamin H. Saracco, and Fiona Vernal.

Victimology William G. Doerner, Steven P. Lab, 2017-03-16 Victimology, Eighth Edition, shows how to transform the current criminal's justice system into a victim's justice system. Doerner and Lab, both well-regarded scholars, write compellingly about the true scope of crime victims' suffering in the United States. They lay out the sources of evidence available to victimology researchers. In later chapters, theory is woven together with the description of each topic and illustrated with specific examples. The second part of the book addresses the full impact of victimization. Part III, Types of Victimization, details specific problems ranging from violent crimes, child and elder abuse, and property crime to crime in the workplace. The authors emphasize their concern with the extent of criminal victimization, explain how obstacles hinder the pursuit of justice, and introduce the idea that reforms have rendered the system much more victim-friendly. Appropriate for undergraduate as well as early graduate students in Victimology courses in Criminology, Criminal Justice, and Sociology programs, as well as Justice Studies, this book offers an instructor's manual with a test bank, as well as PowerPoint lecture slides and a companion site with student resources.

Florida's Rivers Charles Boning,2016-12-01 Florida's rivers comprise a tapestry of natural wonders. They support rich ecosystems. They define the landscape and lend character to the regions through which they pass.
