How to Think and Reason in Macroeconomics Frederick C. v. N. Fourie,Philippe Burger,2009 Geared to upper-level college students or MBA candidates, this economics textbook uses examples from Africa to explain why the rate of economic growth is higher in some countries than in others, why the inflation rate varies from year to year, why unemployment rates rise and fall, why the Zimbabwean dollar is weak compared to strong currencies such as Botswana's, and why imports of goods and services sometimes increase quite suddenly. The book also provides comments on the role of government and highlights ways to improve macroeconomic policies in developing countries.

Economics Stephen Ison,Stuart Wall,2006 Economics 4th edition is a concise introduction to the core principles of economics, aimed at students taking their first, and probably only, one semester course in Economics. These students may be taking a business related degree, or may be from other degree schemes in the university taking a service course in Introductory Economics. There is a balanced split between the micro and macro economics section and the use of case studies and numerous examples makes this a lively little book for the reader. The real difference that this book offers the student is the amount and variety of questioning material that will really test their understanding.
