**Quests** Jeff Howard, 2022-04-24 Combining theory and practice, this updated new edition provides a complete overview of how to create deep and meaningful quests for games. It uses the Unity game engine in conjunction with Fungus and other free plugins to provide an accessible entry into quest design. The book begins with an introduction to the theory and history of quests in games, before covering four theoretical components of quests: their spaces, objects, actors, and challenges. Each chapter also includes a practical section, with accompanying exercises and suggestions for the use of specific technologies for four crucial aspects of quest design: • level design • quest item creation • NPC and dialogue construction • scripting This book will be of great interest to all game designers looking to create new, innovative quests in their games. It will also appeal to new media researchers, as well as humanities scholars in the fields of mythology and depth-psychology that want to bring computer-assisted instruction into their classroom in an innovative way. The companion website includes lecture and workshop slides, and can be accessed at: [www.designingquests.com](http://www.designingquests.com)

**Games and Rules** Beat Suter, Mela Kocher, René Bauer, 2019-03-20 Why do we play games and why do we play them on computers? The contributors of »Games and Rules« take a closer look at the core of each game and the motivational system that is the game mechanics. Games are control circuits that organize the game world with their (joint) players and establish motivations in a dedicated space, a »Magic Circle«, whereas game mechanics are constructs of rules designed for interactions that provide gameplay. Those rules form the base for all the excitement and frustration we experience in games. This anthology contains individual essays by experts and authors with backgrounds in Game Design and Game Studies, who lead the discourse to get to the bottom of game mechanics in video games and the real world – among them Miguel Sicart and Carlo Fabricatore.

*The Maps of Spotsylvania Through Cold Harbor* Bradley M. Gottfried, 2023-01-04 The Maps of Spotsylvania through Cold Harbor continues Bradley M. Gottfried's efforts to study and illustrate the major campaigns of the Civil War's Eastern Theater. This is the ninth book in the ongoing Savas Beatie Military Atlas Series. After three years of bloody combat in Virginia, President Abraham Lincoln promoted Ulysses S. Grant to general-in-chief in early 1864. Grant immediately went to work planning a comprehensive strategy to bring an end to the war. He hungered to remain with the Western armies, but realized his place was in Washington. Unwilling to be stuck in an office, Grant joined George Meade's Army of the Potomac. His presence complicated Meade's ability to direct his army, but Grant promised to stay out of his way and give only strategic directives. This arrangement lasted through the Wilderness Campaign, the first action in what is now referred to as the "Overland Campaign." This book continues the actions of both armies through the completion of the Overland Campaign. After the Wilderness fighting, the Army of the Potomac attempted to swing around the right flank of Gen. Robert E. Lee's Army of Northern Virginia and shoot straight for Richmond. The Confederate capital was never the goal; the move was intended to force Lee out into the open, where the larger and well-stocked Union army could destroy it. The head of Lee's

army blunted the enemy at Spotsylvania Court House, where both sides dug in. Days and men were wasted on fruitless attacks until Col. Emery Upton designed an audacious strike that temporarily penetrated Lee's works. A much larger offensive against the "Mule Shoe" two days later tore the line open, destroyed a Rebel division, and triggered a long day of fighting. More fighting convinced Grant of the folly of further attempts to crush Lee at Spotsylvania and again he swung around the Rebel right flank. The march ignited almost continuous fighting at the North Anna, Bethesda Church, and Cold Harbor, where this volume ends. This study includes the various cavalry actions, including those at Spotsylvania Court House, Yellow Tavern, Haw's Tavern, and Matadequin Creek. The Maps of Spotsylvania through Cold Harbor breaks down the entire operation into thirty-five map sets or "action sections" enriched with 134 detailed full-page color maps. These cartographic originals bore down to the regimental and battery level and include the march to and from the battlefields and virtually every significant event in between. At least two, and as many as ten maps accompany each map set. Keyed to each piece of cartography is a full facing page of detailed footnoted text describing the units, personalities, movements, and combat (including quotes from eyewitnesses) depicted on the accompanying map, all of which make the Spotsylvania story come alive. This unique presentation allows readers to easily and quickly find a map and text on any portion of the campaign, from the march to Spotsylvania to Cold Harbor. Serious students will appreciate the extensive and authoritative endnotes and complete order of battle. Everyone will want to take the book along on trips to these battlefields. Perfect for the easy chair or for stomping the hallowed ground, The Maps of Spotsylvania through Cold Harbor is a seminal work that belongs on the bookshelf of every serious student of the battle.

The Maps of the Cavalry at Gettysburg Bradley M. Gottfried, 2020-04-21 An overview of generations of Italians in the Big Apple, weaving together numerous stories from different epochs and different backgrounds. "If you want to learn something about Italian creativity, come to New York. Here, you will find the pride of flying the Italian colors at the Fifth Avenue Columbus Day Parade, the American patriotism of those who perished at Ground Zero, the courage of firefighters and marines on the frontline of the war against terrorism, the babel of dialects at the Arthur Avenue market, portrayals of social change in the writings of Gay Talese, stories of successful business ventures on the TV shows of Maria Bartiromo and Charles Gasparino, political passion in the battles of Mario Cuomo and Rudy Giuliani, creative imagination in the works of Gaetano Pesce, Renzo Piano and Matteo Pericoli, and provocation in the attire of Lady Gaga . . . The Midtown top managers, who arrived in the past twenty years, operate in the XXI century, while on Fresh Pond Road in Ridgewood the panelle are still prepared according to the Sicilian recipes transmitted from one generation to the next." —From the Introduction

**The Maps of Second Bull Run** Bradley M. Gottfried, 2024-11-21 A map-based analysis of the Second Bull Run Campaign, detailing troop movements, battles, and strategies with full-color cartography and insightful commentary. The

Maps of Second Bull Run: An Atlas of the Second Bull Run (Manassas) Campaign from the Formation of the Army of Virginia Through Chantilly, June 26–September 1, 1862 continues Bradley M. Gottfried's efforts to study and illustrate the major campaigns of the Civil War. This is the tenth book in the ongoing Savas Beatie Military Atlas Series. President Abraham Lincoln's frustration with George B. McClellan's inability to defeat Robert E. Lee and capture Richmond dramatically increased after the unsuccessful Seven Days' Battles. In response, Lincoln combined three small armies into the new Army of Virginia and placed it under Maj. Gen. John Pope, who had overseen several successes in the Western Theater. Pope's aggressiveness and McClellan's passivity on the Peninsula convinced Lee to send Thomas "Stonewall" Jackson's wing of the Army of Northern Virginia to confront Pope. A bloody battle at Cedar Mountain on August 9 halted Pope's move south, and Jackson's raid on the vast stores at Manassas Junction triggered another confrontation, this time at Kettle Run. When McClellan's troops abandoned the Peninsula, Lee moved his other wing under James Longstreet rapidly north. Pope missed an opportunity to prevent the junction of Lee's wings by not stopping Longstreet at Thoroughfare Gap. The battle of Second Bull Run began on the evening of August 28 when Jackson tangled with Union troops at the Brawner Farm. Pope spent much of the next day hammering Jackson's front, with no idea that Longstreet was arriving on the field. The Union assaults continued on August 30 until Longstreet launched a massive assault that rolled up the Union left flank and collapsed Pope's army. The retreat was briefly interrupted by some of Jackson's units at Chantilly, which ended the campaign. The Maps of Second Bull Run plows new ground by breaking down the entire campaign into 24 map sets or "action sections," enriched with 122 detailed full-page color maps. These cartographic originals bore down to the regimental and battery level. They include the march to and from the battlefields and virtually every significant event in between, including cavalry actions. At least two—and as many as ten—maps accompany each map set. Keyed to each piece of cartography is a full-facing page of detailed text describing the units, personalities, movements, and combat (including quotes from eyewitnesses) depicted on the accompanying map, all of which make the cavalry actions come alive. This presentation allows readers to easily find a map and text on any portion of the sprawling campaign. Serious students will appreciate the extensive endnotes and complete orders of battle and take the book with them to the battlefields. A final bonus is that the maps unlock every other book or article written on any aspect of the campaign. Perfect for the easy chair or for stomping the hallowed grounds, The Maps of Second Bull Run is a seminal work that belongs on the bookshelf of every serious and casual student of the battle.

**The Maps of Gettysburg** Bradley M. Gottfried, 2010-06-15 A comprehensive collection of Civil War maps and battle plans that brought Union and Confederate forces to the largest battle ever fought on American soil. Thousands of books and

articles have been written about Gettysburg—but the military operation itself remains one of the most complex and difficult to understand. Here, Bradley M. Gottfried gives readers a unique and thorough study of the campaign that decided the fate of a nation. Enriched with 144 detailed, full-page color maps comprising the entire campaign, *The Maps of Gettysburg* shows the action as it happened—down to the regimental and battery level, including the marches to and from the battlefield, and virtually every significant event in-between. Paired with each map is a fully detailed text describing the units, personalities, movements, and combat it depicts—including quotes from eyewitnesses—all of which bring the Gettysburg story to life. Perfect for the armchair historian or first-hand visitor to the hallowed ground, “no academic library can afford not to include *The Maps of Gettysburg* as part of their American Civil War Reference collections” (Midwest Book Review).

Navigating Imaginary Worlds Mark J.P. Wolf,2025-06-16 This edited anthology offers a collection of essays that each look at various types of wayfinding. Together they explore a variety of wayfinding tools and techniques and their applications, as well as ways of keeping track of the construction of worlds too. With transmedial worlds extending over multiple media, multiple authors, and sometimes even multiple decades of creation, a wealth of different issues can arise; worlds need to direct audience members into how to organize them conceptually. Edited by Mark J. P Wolf and featuring contributions from a distinguished set of authors from interdisciplinary backgrounds, this book enriches the theory, history, and practice of world-building, through the exploration of navigation. The essays have many overlapping concerns and together they provide the reader with a range of discussions regarding wayfinding and the many ways it intersects with world-building - and world-experiencing - activities. Thus, rather than just analyzing worlds themselves, the anthology also asks the reader to consider analyzing the act of world-building itself. This collection will be of interest to students and scholars in a variety of fields including Subcreation Studies, Transmedia Studies, Popular Culture, Comparative Media Studies, Video Game Studies, Film Studies, and Interdisciplinary Literary Studies.

**Gaming and Geography** Michael Morawski,Sebastian Wolff-Seidel,2024-09-25 This book explores the uncharted territory where gaming and geography intersect in Gaming and Geography (Education). This book bridges the gap between video games and geography, delving into the constructivist creative processes of game development, gameplay, and critical

reflections on video games' role in geographical discourses. Through a multi-perspective lens, the book examines how video games can facilitate the exploration of geographic questions and act as catalysts for critical discourses. Scholars shed light on the geographies presented in video games, including their representations, spatial images, and policies. By viewing video games as cultural and critical geography practices, the authors enrich the political, socio-cultural, and critical geographies associated with this medium. A key argument of the book is that video games can foster systemic competence and networked thinking, particularly in addressing complex socio-ecological challenges like climate change and migration. In contrast to traditional geography classes, digital games provide valuable simulations of complex systems, enhancing students' understanding and skills. The book also explores other possibilities such as digital field trips and language support to enhance the educational experience. *Gaming and Geography (Education)* offers a compelling narrative that highlights the diverse roles video games can play in geographic education. By exploring the intersection of gaming and geography, this book deepens our understanding of this dynamic relationship and its impact on critical geographies within the realm of video games.
