Uruk Nicola Crüsemann, Margarete van Ess, Markus Hilgert, Beate Salje, Timothy Potts, 2019-11-05 This abundantly illustrated volume explores the genesis and flourishing of Uruk, the first known metropolis in the history of humankind. More than one hundred years ago, discoveries from a German archaeological dig at Uruk, roughly two hundred miles south of present-day Baghdad, sent shock waves through the scholarly world. Founded at the end of the fifth millennium BCE, Uruk was the main force for urbanization in what has come to be called the Uruk period (4000–3200 BCE), during which small, agricultural villages gave way to a larger urban center with a stratified society, complex governmental bureaucracy, and monumental architecture and art. It was here that proto-cuneiform script—the earliest known form of writing—was developed around 3400 BCE. Uruk is known too for the epic tale of its hero-king Gilgamesh, among the earliest masterpieces of world literature. Containing 480 images, this volume represents the most comprehensive and up-to-date assessment of the archaeological evidence gathered at Uruk. More than sixty essays by renowned scholars provide glimpses into the life, culture, and art of the first great city of the ancient world. This volume will be an indispensable reference for readers interested in the ancient Near East and the origins of urbanism.

space.time.narrative Frank den Ouden, 2016-12-05 Making exhibitions is a collaborative art, producing is a multi-layered unity of ideas and objects, of invention and manifestation, of content and form. However, there is an antagonistic dimension to it, because content and form are traditionally represented by the entirely different realms of curator and designer. Future successful developments in exhibition-making are dependent on whether this gap of antagonism can be bridged. *space.time.narrative* calls for a paradigmatic shift of focus. It puts forward a unique approach, breaking down traditional barriers and offering a wide-ranging theoretical context, redefining and expanding the parameters and the dynamics of the exhibition-format in terms of an open, narrative environment, which at its roots displays deep similarities with performance on stage, or installation in urban and rural space. The book breaks new ground by looking at the exhibition as a cultural format firstly within a great sweep of the arts in general, weaving a web of philosophical, museological, linguistic and media-theoretical references, which expands the contextual field of the profession. It then offers unique and important insights from within, in extreme close-up, by bringing together interviews with six of the leading exhibition designers who discuss the dynamics of the medium, its interactive dimensions, the soft parameters of the exhibition, and how

to get to grips with the format as a complex narrative space, in which the public takes part. Curator and designer should reposition themselves professionally at the heart of the axis, which divides (or connects) content and form.

Digital Heritage. Progress in Cultural Heritage: Documentation, Preservation, and Protection Marinos Ioannides, Eleanor Fink, Raffaella Brumana, Petros Patias, Anastasios Doulamis, João Martins, Manolis Wallace, 2018-10-15 This two-volume set LNCS 11196 and LNCS 11197 constitutes the refereed proceedings of the 7th International Conference on Digital Heritage, EuroMed 2018, held in Nicosia, Cyprus, in October/November 2018. The 21 full papers, 47 project papers, and 29 short papers presented were carefully reviewed and selected from 537 submissions. The papers are organized in topical sections on 3D Digitalization, Reconstruction, Modeling, and HBIM; Innovative Technologies in Digital Cultural Heritage; Digital Cultural Heritage - Smart Technologies; The New Era of Museums and Exhibitions; Digital Cultural Heritage Infrastructure; Non Destructive Techniques in Cultural Heritage Conservation; E-Humanities; Reconstructing the Past; Visualization, VR and AR Methods and Applications; Digital Applications for Materials Preservation in Cultural Heritage; and Digital Cultural Heritage Learning and Experiences.

Museums of the World Marco Schulze, 2007-05-15 Museums of the World covers in its 13th edition 52,953 museums in 201 countries, listed hierarchically by country and place, and within places, alphabetically by name. A separate chapter records 504 museum organizations in 131 countries with addresses. The museums are coded by 22 categories identifying the focus and type of each institution. A typical entry contains the following details: name of the museum in the original language with English translation where necessary, address, telephone number, fax, eMail address and URL, museum type, year of foundation, name of the director and museum staff, special collections and equipment, number of the entry. In addition, there is an alphabetical index of museums, a subject index, an index of persons covering academic staff working in museums, and a personality index, recording artists whose works are shown predominantly in a specific museum and/or referring to memorabilia of famous individuals.

Fake Heritage John Darlington, 2020-10-02 The first survey of the many redesigned and imitation historical landmarks and objects that dot the globe John Darlington shows . . . it is not just written history that is malleable; it is also history on the ground, heritage in brick and stone, wood and metal.--Simon Jenkins, Times Literary Supplement What happens when the past--or, more specifically, a piece of cultural heritage--is fabricated? From 50 replica Eiffel Towers located around the world to Saddam Hussein's reconstructions of ancient cities, examples of forged heritage are widespread. Some are easy to dismiss as blatant frauds (the Piltdown Man), while others adhere to honest copying or respectful homage (the Parthenon in Nashville, Tennessee). This compelling book examines copies of historic buildings, faux archaeological sites, and other false artifacts, using them to explore the ethics and consequences of reconstructing the past; it also tackles the issues involved with faithful, above-board re-creations of ancient landmarks. John Darlington probes questions of historical authenticity, seeking the lessons that lurk when history is twisted to tell an untrue story. Amplified by stunning images, the narrative underscores how the issue of duplicating heritage is both intriguing and incredibly complex, especially in the twenty-first century--as communication and technology flourish, so too do our opportunities to be deceived.

The Grotte du Placard at 150: New Considerations on an Exceptional Prehistoric Site Christophe Delage, 2018-09-30 The prehistoric site of Le Placard, Southwest France, was first explored 150 years. 19th-century excavations almost emptied the cavity, now surprisingly ill-known. This 150-year milestone grants an opportunity to look back at this exceptional site and what it can tell us about the Late Pleistocene hunting and gathering societies who dwelt there.

The Oxford Handbook of the Archaeology of Childhood Sally Crawford, Dawn Hadley, Gillian Shepherd, 2018-05-10 Real understanding of past societies is not possible without including children, and yet they have been strangely invisible in the archaeological record. Compelling explanation about past societies cannot be achieved without including and investigating children and childhood. However marginal the traces of children's bodies and bricolage may seem compared to adults, archaeological evidence of children and childhood can be found in the most astonishing places and spaces. The archaeology of childhood is one of the most exciting and challenging areas for new discovery about past societies. Children are part of every human society, but childhood is a cultural construct. Each society develops its own idea about what a childhood should be, what children can or should do, and how they are trained to take their place in the world. Children also play a part in creating the archaeological record itself. In this volume, experts from around the world ask questions about childhood - thresholds of age and growth, childhood in the material culture, the death of children, and the intersection of the childhood and the social, economic, religious, and political worlds of societies in the past.

The Roman Impact on the Economy of the Lower Germanic Limes Region Erik Timmerman, 2023-09-25 The remarkable economic performance of the Roman Empire is now widely acknowledged. Yet there is still much debate about its interpretation. Although this debate is mainly conducted at the empire-wide level, regional syntheses are indispensable to its further advancement. This book contributes to that purpose by providing a comprehensive account of the Roman impact on the economy of the Lower Germanic Limes region. By drawing on a large number of scattered publications and (archaeological) datasets, the work demonstrates that Roman rule also led to important economic developments in a part of the empire that was remote from its Mediterranean heartland.

Die Pest Roland Gschlößl, 2020-08-27 Die Corona-Pandemie hält die Menschheit fest im Griff. Heft 3/2020 betrachtet daher die Geschichte der Seuchen. Immer wieder gab es verheerende Epidemien: Von den historisch bezeugten Seuchen Griechenlands und des Römischen Reiches, der seit kurzem auch archäologisch in Bayern nachgewiesenen Justinianischen Pest des 6. Jhs. n. Chr., über den sogenannten Schwarzen Tod des 14. Jhs. bis zur Spanischen Grippe vor rund 100 Jahren. In Bayern zeugen nicht nur historische Berichte, sondern auch religiöse Kultorte wie z. B. Pestsäulen vom Gottvertrauen der Bevölkerung. Bei aller Tragik kehrte aber immer auch die Lebensfreude wieder zurück – wie etwa die Legende vom Ursprung des Schäfflertanzes zeigt.

Climate Extremes and Their Implications for Impact and Risk Assessment Jana Sillmann, Sebastian Sippel, Simone Russo, 2019-11-20 Climate extremes often imply significant impacts on human and natural systems, and these extreme events are anticipated to be among the potentially most harmful consequences of a changing climate. However, while extreme event impacts are increasingly recognized, methodologies to address such impacts and the degree of our understanding and prediction capabilities vary widely among different sectors and disciplines. Moreover, traditional climate extreme indices and large-scale multi-model intercomparisons that are used for future projections of extreme events and associated impacts often fall short in capturing the full complexity of impact systems. *Climate Extremes and Their Implications for Impact and Risk Assessment* describes challenges, opportunities and methodologies for the analysis of the impacts of climate extremes across various sectors to support their impact and risk assessment. It thereby also facilitates cross-sectoral and cross-disciplinary discussions and exchange among climate and impact scientists. The sectors covered include agriculture, terrestrial ecosystems, human health, transport, conflict, and more broadly covering the human-environment nexus. The book concludes with an outlook on the need for more transdisciplinary work and international collaboration between scientists and practitioners to address emergent risks and extreme events towards risk reduction and strengthened societal resilience.

A Mind Set on Flint Dick Stapert,2012 This volume comprises papers presented to Dick Stapert on the occasion of his retirement from the Groningen Institute of Archaeology (University of Groningen) in 2011 and celebrates his scientific career. The contributions cover nearly 300,000 years of Human History and were written by colleagues, former students and friends. Topics include the making and use of fire, children in the Stone Age, spatial analysis, and other themes related to the study of the Palaeolithic, Mesolithic and beyond.

Atelier Bruckner Conway Lloyd Morgan,2002-04 Atelier Bruckner brings the language of the theatre to their design vocabulary. Based in Stuttgart, their recent work features the CycleBowl event at Hanover 2000, the Titanic exhibition and stands for Kodak and Panasonic. Current projects include the new Archaeological Museum in Herne and the Borders project for EXPO 2002. Their inclusive approach to design is based on the concept of form follows content.

God and the History of the Universe Jarvis Streeter,2016-03-22 The popular belief that a scientific understanding of reality is incompatible with a Christian one is simply wrong. Some Christian understandings of reality do conflict with some scientific understandings. But a thoroughly rational Christian understanding of the origin and history of the universe will be informed by the best scientific theories and the facts founded on them. This book weaves a narrative of the origin and history of the universe from the perspective of contemporary science with a Christian understanding of God and of God's role in the origin and history of the universe. At the center of this integrated narrative is the view that God, who is pure, unbounded Love, is Creator: the zest for life in the universe comes from God, and God is the source of Truth, Beauty, and Goodness in the universe. God is amazed and delighted at what God-and-the-world has created; God is saddened by ways creatures have fallen short of pure, unbounded Love, Truth, Beauty, and Goodness; and God's pure, unbounded Love keeps on trying to persuade all creatures toward Truth, Beauty, and Goodness.

The Routledge Handbook of the Bioarchaeology of Human Conflict Christopher Knüsel,Martin Smith,2013-12-17 If human burials were our only window onto the past, what story would they tell? Skeletal injuries constitute the most direct and unambiguous evidence for violence in the past. Whereas weapons or defenses may simply be statements of prestige or status and written sources are characteristically biased and incomplete, human remains offer clear and unequivocal evidence of physical aggression reaching as far back as we have burials to examine. Warfare is often described as 'senseless' and as having no place in society. Consequently, its place in social relations and societal change remains obscure. The studies in The Routledge Handbook of the Bioarchaeology of Human Conflict present an overview of the nature and development of human conflict from prehistory to recent times as evidenced by the remains of past people themselves in order to explore the social contexts in which such injuries were inflicted. A broadly chronological approach is taken from prehistory through to recent conflicts, however this book is not simply a catalogue of injuries illustrating weapon development or a narrative detailing 'progress' in warfare but rather provides a framework in which to explore both continuity and change based on a range of

important themes which hold continuing relevance throughout human development.
