

Dinamismo Di Un Ciclista

Christina Bartosch

The Culture of Fragments Clara Orban, 2023-11-20 Works of art such as paintings with words on them or poems shaped as images communicate to the viewer by means of more than one medium. Here is presented a particular group of hybrid art works from the early twentieth century, to discover in what way words and images can function together to create meaning. The four central artists considered in this study investigate word/image forms in their work. F.T. Marinetti invented parole in libertà, among other ideas, to free language from syntactic connections. Umberto Boccioni experimented with newspaper clippings on the canvas from 1912-1915, and these collages constitute an important exploration into word/image forms. André Breton's collection of poems *Clair de terre* (1923) contains several typographical variations for iconographic effect. René Magritte explored the relationship between words and images, juxtaposing signifiers to contradictory signifieds on the canvas. A final chapter introduces media other than poetry and painting on which words and images appear. Posters, the theater, and the relatively new medium of cinema foreground words and images constantly. This volume will be of interest to scholars of twentieth-century French or Italian literature or painting, and to scholars of word and image studies.

Boccioni, a Retrospective Ester Coen, Umberto Boccioni, 1988 Traces the life and career of the Italian artist, discusses his connection to the Futurist movement, and looks at his paintings, drawings, and sculpture.

Exhibiting Abstraction Christina Bartosch, 2025-05-20 The time around 1910 has entered art history as the moment when «abstraction was invented». However, where and when works of non-figurative art became present in the public eye has been afforded little attention to date. *Exhibiting Abstraction* is the first publication to be devoted entirely to the presentation of abstract art between 1908 and 1915. It uncovers strategies for the dissemination of early abstract painting in exhibitions with the aid of a register of exhibited works by Giacomo Balla, Umberto Boccioni, Wassily Kandinsky, Frantisek Kupka, Kazimir Malevich, Piet Mondrian and Francis Picabia shown to the public within this period, and an analysis of the artists' exhibition activities. The key role played by art exhibitions in the works' introduction and dissemination is highlighted.

Faster, Higher, Stronger, Comrades! Tim Harte, 2020-07-07 The revival of the Olympic games in 1896 and the subsequent rise of modern athletics prompted a new, energetic movement away from more sedentary habits. In Russia, this ethos soon became a key facet of the Bolsheviks' shared vision for the future. In the aftermath of the revolution, glorification of exercise persevered, pointing the way toward a stronger, healthier populace and a vibrant Socialist society. With

interdisciplinary analysis of literature, painting, and film, *Faster, Higher, Stronger, Comrades!* traces how physical fitness had an even broader impact on culture and ideology in the Soviet Union than previously realized. From prerevolutionary writers and painters glorifying popular circus wrestlers to Soviet photographers capturing unprecedented athleticism as a means of satisfying their aesthetic ideals, the nation's artists embraced sports in profound, inventive ways. Though athletics were used for doctrinaire purposes, Tim Harte demonstrates that at their core, they remained playful, joyous physical activities capable of stirring imaginations and transforming everyday realities.

The Visual in Sport Mike Huggins, Mike O'Mahony, 2013-10-18 This comprehensive, novel and exciting interdisciplinary collection brings together leading international authorities from the history of sport, social history, art history, film history, design history, cultural studies and related fields to explore the ways in which visual culture has shaped, and continues to impact upon, our understanding of sport as an integral element within popular culture. Visual representations of sport have previously been little examined and under-exploited by historians, with little focused and rigorous scrutiny of these vital historical documents. This study seeks to redress this balance by engaging with a wide variety of cultural products, ranging from sports stadia and monuments in the public arena, to paintings, prints, photographs, posters, stamps, design artefacts, films and political cartoons. By examining the contexts of both the production and reception of this historical evidence, and highlighting the multiple meanings and social significance of this body of work, the collection provides original, powerful and stimulating insights into the ways in which visual material assists our knowledge and understanding of sport. This collection will facilitate researchers, publishers and others with an interest in sport to move beyond traditional text-based scholarship and appreciate the powerful imagery of sport in new ways. This book was previously published as a special issue of the *International Journal of the History of Sport*.

Flann O'Brien & Modernism Julian Murphet, Ronan McDonald, Sascha Morrell, 2014-07-31 *Flann O'Brien & Modernism* brings a much-needed refreshment to the state of scholarship on this increasingly recognised but still widely misunderstood 'second generation' modernist. Rather than construe him as a postmodernist, it correctly locates O'Brien's work as the product of a late modernist sensibility and cultural context. Similarly, while there should be no doubt of his Irishness, and his profound debts to Irish language, history and culture, this collection seeks to understand O'Brien's nationally sensitive achievement as the work of an internationalist whose preoccupations reflect global modernist trends. The distinct themes and concerns tracked in *Flann O'Brien & Modernism* include characterization in branching narrative forms; the ethics and paradoxes of naming; parody and homage; lies and deception; theatricality; sexuality; technology and transport; and the inevitable matter of drink and intoxication. Taken together, these specific topics construct a mosaic image of O'Brien as an exemplary modernist auteur, abreast of all the most salient philosophical and technical concerns affecting literary production in the period immediately before and after World War Two.

Moving Modernisms David Bradshaw, Laura Marcus, Rebecca Roach, 2016-07-07 The essays in *Moving Modernisms: Motion, Technology, and Modernity*, written by renowned international scholars, open up the many dimensions and arenas of modernist movement and movements: spatial, geographical and political; affective and physiological; temporal and epochal; technological, locomotive and metropolitan; aesthetic and representational. Individual essays explore modernism's complex geographies, focusing on Anglo-European modernisms while also engaging with the debates engendered by recent models of world literatures and global modernisms. From questions of space and place, the volume moves to a focus on movement and motion, with topics ranging from modernity and bodily energies to issues of scale and quantity. The final chapters in the volume examine modernist film and the moving image, and travel and transport in the modern metropolis. 'Movement is reality itself', the philosopher Henri Bergson wrote: the original and illuminating essays in *Moving Modernisms* point in new ways to the realities, and the fantasies, of movement in modernist culture.

Star Born Andre Norton, 2019-11-24T20:35:18Z This sequel to *The Stars Are Ours!* was first published in 1957 by the World Publishing Company. It continues the tale of the humans who escaped an anti-intellectual Earth and founded a colony on Astra, a planet across the galaxy. Astra has a vibrant, intelligent species, as well as the ruins of a much older civilization. Norton weaves two stories together by alternating points of view with each chapter. We follow a 4th generation colonist, as well as a mechanic-pilot newly arrived on Astra as a member of a research mission from a recently revived Earth. Each is on a journey of discovery, and they find themselves allied with opposing sides of an ongoing war between two intelligent, indigenous species. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

2020 Günter Berghaus, 2020-11-23 Volume 10 examines how the innovative impulses that came from Italy were creatively merged with indigenous traditions and how many national variants of Futurism emerged from this fusion. Ten essays investigate various aspects of Italian Futurism and its links to Austria, Georgia, France, Hungary and Portugal and in fields such as Typography, Olfaction, Photography. Section 2 examines seven examples of caricatures and satires of Futurism in the contemporary press, followed by Section 3, reporting on the Archiv der Avantgarden (AdA) in Dresden. Section 4 communicates bibliographic details of 120 book publications on Futurism in the period 2017-2020, including exhibition catalogues, conference proceedings and editions.

The Art of Objects Luca Cottini, 2018-06-12 The *Art of Objects* is a cultural history of early Italian industrialism, set against the political, social, and intellectual background of post-unification Italy, and a cutting-edge investigation of the

formation of Italy's industrial culture at the turn of the twentieth century. Providing a close examination of several objects of mass consumption, including watches, photographs, bicycles, gramophones, cigarettes, and toys, author Luca Cottini explores the transformation of these objects from commercial items into aesthetic and philosophical icons. By focusing on the cultural significance of these objects as they enter the market and appear in contemporary works of art and literature, *The Art of Objects* outlines a comprehensive view of the age between the unification of Italy and Fascism, encompassing production and consumption, aesthetics and entrepreneurship, industry and the humanistic tradition. The observation of the slow formation of new languages, practices, and experiences around these objects also provides valuable insight into the creative laboratory of Italy's early industrial culture. By reconstructing the origins of the Italian culture of design, the book ultimately investigates Italy's critical reception of industrialism, the nation's so-called imperfect modernization, and its ongoing quest for an original way to modernity.

A Cultural History of Sport in the Age of Industry Mike Huggins, 2022-08-31 *A Cultural History of Sport in the Age of Industry* covers the period 1800 to 1920. Over this period, sport became increasingly global, some sports were radically altered, sports clubs proliferated, and new team games - such as baseball, basketball and the various forms of football - were created, codified, commercialized, and professionalized. Yet this was also an age of cultural and political tensions, when issues around the role of women, social class, ethnicity and race, imperial relationships, nation-building, and amateur and professional approaches were all shaping sport. At the same time, increasing urbanization, population, real wages and leisure time drove demand for sport ever higher, and the institutionalization and regulation of sport accelerated. The 6 volume set of the *Cultural History of Sport* presents the first comprehensive history from classical antiquity to today, covering all forms and aspects of sport and its ever-changing social, cultural, political, and economic context and impact. The themes covered in each volume are the purpose of sport; sporting time and sporting space; products, training and technology; rules and order; conflict and accommodation; inclusion, exclusion and segregation; minds, bodies and identities; representation. Mike Huggins is Emeritus Professor at the University of Cumbria, UK. Volume 5 in the *Cultural History of Sport* set General Editors: Wray Vamplew, Mark Dyreson, and John McClelland

In viaggio con i numeri Silvia Benvenuti, 2022-05-26T12:05:00+02:00 Silvia Benvenuti, docente di Matematica all'Università di Bologna, è stata fra i primi studiosi a condurre appassionanti "passeggiate matematiche" per non addetti ai lavori: è il cosiddetto mateturismo. L'idea è quella di visitare, con l'aiuto di una guida esperta, una città d'arte o un luogo

ricco di storia scoprendo quanto profonda sia la presenza dei numeri e della matematica nel suo tessuto architettonico e urbanistico. In dieci divertenti capitoli dedicati ad altrettante città questo libro coinvolge il lettore in un mondo di sorprese e rompicapo alla scoperta di quanto profonda sia la presenza dei numeri nel tessuto architettonico e urbanistico. Un libro che si può leggere camminando per il centro storico delle più belle città d'arte, o anche in poltrona, per tornare a giocare con i numeri e riflettere sulla ricchezza della nostra storia culturale.
