Academic Language in Diverse Classrooms: English Language Arts, Grades 3-5 Margo Gottlieb, Gisela Ernst-Slavit, 2013-09-23 Make every student fluent in the language of learning. Language has always been the center of English Language Arts, but with most states adopting CCSS, the focus on language and literacy across the content areas is required. Today it's more essential than ever that English language learners and proficient English learners have the supports to access and achieve the language of school. The Common Core and ELD standards provide pathways to academic success through academic language. Using an integrated Curricular Framework, districts, schools and professional learning communities can: Design and implement thematic units for learning Draw from content and language standards to set targets for all students Examine standards-centered materials for academic language Collaborate in planning instruction and assessment within and across lessons Consider linguistic and cultural resources of the students Create differentiated content and language objectives Delve deeply into instructional strategies involving academic language Reflect on teaching and learning With dynamic classrooms and units of learning, this book gives you a streamlined path for designing and implementing curriculum that leads to student mastery of academic language—the key to school success. These volumes are packed with practical ideas that will help all teachers attend to language within their classrooms from the discourse level to

word/phrase levels. This is a road map for teaching Common Core content in language rich classrooms, and hence a resource every teacher needs within arm's reach! It's all here and clearly presented; this is pure gold for everyone who teaches students to speak, listen, read and write in school, with special attention to English language learners. —Tim Boals, Executive Director of WIDA

Managing Legitimacy Zhen Tao, 2024-12-31 From an out-of-school perspective, the book studies private supplementary tutoring, also widely known as shadow education within the Chinese education landscape. The author presents an organizational ethnography of Smart English, a private English tutoring center in Beijing. Using the concept of “organizational legitimacy” from organizational institutionalism as its framework, the study provides a detailed account of the center’s daily operations. It examines how the organization manages its legitimacy while navigating regulations, providing private supplementary tutoring, and addressing public skepticism. The book documents the typical operations of such institutions in Chinese mainland before stringent regulations disrupted their activities, serving as a “salvage” record. This book enriches educational ethnographies and will appeal to academics of shadow education, Chinese education, and ethnography.
