**The 2011 Guide to Free Or Nearly-Free E-Books**, 2011 One of the problems which face all librarians adding e-books to their collections is that of bibliographic control: there is no legal deposit for e-books and consequently there is no single place from which new titles can be found. If this is true of commercially published e-books, it is most certainly also true of free e-books... and there are many thousands of free e-books available over the Internet, many of which are of a quality such that librarians might wish to have them in their collections. The 2011 Guide to Free or Nearly-Free e-Books is offered as a tool for librarians and others involved in book selection (e.g. teachers in schools) in all sectors - school, further and higher education, public and special libraries - to facilitate easy access to free e-books and e-book collections which can enhance their digital library.

(It can even "return" checked-out ebooks before the expiration date, if you want.) **Using Graphic Novels in the English Language Arts Classroom** William Boerman-Cornell, Jung Kim, 2020-10-01 Shortlisted for the UK Literacy Association's Academic Book Award 2021 There is an increasing trend in teachers using graphic novels to get their students excited about reading and writing, using both original stories and adaptations of classic works by authors such as Homer, Shakespeare, and the Brontes. However, there is surprisingly little research available

about which pedagogies and classroom practices are proven to be effective. This book draws on cutting-edge research, surveys and classroom observations to provide a set of effective methods for teaching with graphic novels in the secondary English language arts classroom. These methods can be applied to a broad base of uses ranging from understanding literary criticism, critical reading, multimodal composition, to learning literary devices like foreshadowing and irony. The book begins by looking at what English language arts teachers hope to achieve in the classroom. It then considers the affordances and constraints of using graphic novels to achieve these specific goals, using some of the most successful graphic novels as examples, including *Maus*; *Persepolis*; *The Nameless City*; and *American Born Chinese* and series such as *Manga Shakespeare*. Finally, it helps the teacher navigate through the planning process to figure out how to best use graphic novels in their own classroom. Drawing on their extensive teaching experience, the authors offer examples from real classrooms, suggested lesson plans, and a list of teachable graphic novels organized by purpose of teaching.

Comic Books, Graphic Novels and the Holocaust Ewa Stańczyk, 2020-04-28 This book analyses the portrayals of the Holocaust in newspaper cartoons, educational pamphlets, short stories and graphic novels. Focusing on recognised and lesser-known illustrators from Europe and beyond, the volume looks at autobiographical and fictional accounts and seeks to paint a broader picture of Holocaust comic strips from the 1940s to the present. The book shows that the genre is a capacious one, not only dealing with the killing of millions of Jews but also with Jewish lives in war-torn Europe, the personal and transgenerational memory of the Second World War and the wider national and transnational legacies of the Shoah. The chapters in this collection point to the aesthetic diversity of the genre which uses figurative and allegorical representation, as well as applying different stylistics, from realism to fantasy. Finally, the contributions to this volume show new developments in comic books and graphic novels on the Holocaust, including the rise of alternative publications, aimed at the adult reader, and the emergence of state-funded educational comics written with young readers in mind. This book was originally published as a special issue of the Journal of Modern Jewish Studies.

**From Comic Strips to Graphic Novels** Daniel Stein, Jan-Noël Thon, 2015-04-24 This essay collection examines the theory and history of graphic narrative as one of the most interesting and versatile forms of storytelling in contemporary media culture. Its contributions test the applicability of narratological concepts to graphic narrative, examine aspects of graphic narrative beyond the 'single work', consider the development of particular narrative strategies within individual genres, and trace the forms and functions of graphic narrative across cultures. Analyzing a wide range of texts, genres, and narrative strategies from both theoretical and historical perspectives, the international group of scholars gathered here offers state-of-the-art research on graphic narrative in the context of an increasingly postclassical and transmedial narratology. This is the revised second edition of *From Comic Strips to Graphic Novels*, which was originally published in the *Narratologia* series.

Representing Multiculturalism in Comics and Graphic Novels Carolene Ayaka, Ian Hague, 2014-11-20 Multiculturalism, and its representation, has long presented challenges for the medium of comics. This book presents a wide ranging survey of the ways in which comics have dealt with the diversity of creators and characters and the (lack of) visibility for characters who don't conform to particular cultural stereotypes. Contributors engage with ethnicity and other cultural forms from Israel, Romania, North America, South Africa, Germany, Spain, U.S. Latino and Canada and consider the ways in which comics are able to represent multiculturalism through a focus on the formal elements of the medium. Discussion themes include education, countercultures, monstrosity, the quotidian, the notion of the 'other', anthropomorphism, and colonialism. Taking a truly international perspective, the book brings into dialogue a broad range of comics traditions.
