Current Status of and Future Directions for Assessing Technology Acceptance for Digital (Mental) Health Interventions Jennifer Apolinário-Hagen ,Silvia Simbula,Giulia Paganin,2024-09-02 Recently, digital interventions have proliferated and show promising results in preventing and treating common mental health disorders, such as depression, in different settings (e.g., workplaces). Digital interventions may have advantages over face-to-face interventions (e.g., more accessible; easily customisable; real-time monitoring). However, despite efforts made by healthcare systems worldwide (e.g., apps on prescription in Germany), actual adoption is still rather low in many countries. It is essential to understand innovation acceptance in order to tailor digital interventions and to measure user technology acceptance. In this way, determinants can be identified to derive strategies to promote acceptance. Technology acceptance has been studied extensively, resulting in the development of various theoretical models (e.g., Technology Acceptance Model-TAM; Unified Theory of Acceptance and Use of Technology-UTAUT, UTAUT2). Besides several methodological strengths, technology acceptance models also have various limitations, which makes it difficult to investigate causality or to generalize findings across different contexts, populations, and cultures.

Future T/Issues Ruth Gehrmann,2024-07-01 Transplant practices are discussed in the medical realm, in fictional texts and in popular advertisement. Yet how do these sectors intersect and influence each other? How can the accounts of surgeons invested in transplant practice be brought into conversation with fictional voices? Future T/Issues positions transplantation at the intersection of natural science and the humanities and adds to the discussion of organ transplantation by focusing on one specific aspect that is commonly overlooked: the idea of speculation. By engaging with speculative fiction in conversation with life writing, it contributes to a more thorough understanding of transplantation as a cultural practice, showcasing that transplantation is imagined as part of the future both within and beyond the literary sphere. Hereby, this book establishes the relationship between literary and medical narratives as reciprocal, in effect eroding boundaries between the life sciences and literary studies. As an interdisciplinary endeavor, this study contributes to literary studies, specifically to the fields of life writing, speculative fiction, and young adult fiction, it offers insights for the study of transplantation in the popular realm and adds to the medical humanities.

Brave New World by Aldous Huxley and Blade Runner: the Director's Cut Directed by Ridley Scott Megan De Kantzow,2001

Legal Tech and the Future of Civil Justice David Freeman Engstrom,2023-02-09 New digital technologies, from AI-fired 'legal tech' tools to virtual proceedings, are transforming the legal system. But much of the debate surrounding legal tech has zoomed out to a nebulous future of 'robo-judges' and 'robo-lawyers.' This volume is an antidote. Zeroing in on the near- to medium-term, it provides a concrete, empirically minded synthesis of the impact of new digital technologies on litigation and access to justice. How far and fast can legal tech advance given regulatory, organizational, and technological

constraints? How will new technologies affect lawyers and litigants, and how should procedural rules adapt? How can technology expand - or curtail - access to justice? And how must judicial administration change to promote healthy technological development and open courthouse doors for all? By engaging these essential questions, this volume helps to map the opportunities and the perils of a rapidly digitizing legal system - and provides grounded advice for a sensible path forward. This book is available as Open Access on Cambridge Core.

Collaborative Networks in Digitalization and Society 5.0 Luis M. Camarinha-Matos, Angel Ortiz, Xavier Boucher, A. Luís Osório, 2022-09-12 This book constitutes the refereed proceedings of the 23rd IFIP WG 5.5 Working Conference on Virtual Enterprises, PRO-VE 2022, held in Lisbon, Portugal, in September 2022. They provide a comprehensive overview of major challenges and recent advances in various domains related to the digital transformation and collaborative networks and their applications with a strong focus on the following areas related to the main theme of the conference: sustainable collaborative networks; sustainability via digitalization; analysis and assessment of business ecosystems; human factors in collaboration 4.0; maintenance and life-cycle management; policies and new digital services; safety and collaboration management; simulation and optimization; complex collaborative systems and ontologies; value co-creation in digitally enabled ecosystems; digitalization strategy in collaborative enterprises' networks; pathways and tools for DIHs; socio-technical perspectives on smart product-service systems; knowledge transfer and accelerated innovation in FoF; interoperability of IoT and CPS for industrial CNs; sentient immersive response network; digital tools and applications for collaborative healthcare; collaborative networks and open innovation in education 4.0; collaborative learning networks with industry and academia; and industrial workshop.

Human-Centred Technology Management for a Sustainable Future Ricardo Zimmermann, José Coelho Rodrigues, Ana Simoes, Gustavo Dalmarco, 2025-03-26 This proceedings volume contains selected papers from the 33rd International Association for Management of Technology (IAMOT) Conference, held from July 8-11, 2024, in Porto, Portugal. It is the second volume of a three-volume set of conference proceedings focused on technologies for a sustainable future. The book explores the challenges and opportunities in today's social and business landscapes, delving into innovative and disruptive concepts. With a special emphasis on the role of technologies, it sheds light on how they enable novel approaches to address current issues. The volume demonstrates that, following the principles of Industry 5.0, technologies can go far beyond productivity and economic gains, contributing to the benefit and comfort of human workers. It also elucidates the necessity of adopting a human-centered approach in utilizing technology to adapt production processes to workers' needs, while ensuring that the implementation of new technologies does not infringe upon the fundamental rights of workers.

Skuland,2024-12-12 Providing a theoretically informed discussion of the specificities of sociology of consumption, *Consumers and Consumption in Comparison* focuses on three main approaches: Consumption and social inequality; Consumption and gender; and Consumption and social movements.

2030: How Today's Biggest Trends Will Collide and Reshape the Future of Everything Mauro F.

Guillén,2020-08-25 AN INTERNATIONAL BESTSELLER Wall Street Journal Bestseller A Porchlight Book Bestseller Financial Times Best Books of 2020 Yahoo Finance Favorite Business Books of 2020 JP Morgan NextList 2021 selection Bold, provocative...illuminates why we're having fewer babies, the middle class is stagnating, unemployment is shifting, and new powers are rising." —ADAM GRANT The world is changing drastically before our eyes—will you be prepared for what comes next? A groundbreaking analysis from one of the world's foremost experts on global trends, including analysis on how COVID-19 will amplify and accelerate each of these changes. Once upon a time, the world was neatly divided into prosperous and backward economies. Babies were plentiful, workers outnumbered retirees, and people aspiring towards the middle class yearned to own homes and cars. Companies didn't need to see any further than Europe and the United States to do well. Printed money was legal tender for all debts, public and private. We grew up learning how to play the game, and we expected the rules to remain the same as we took our first job, started a family, saw our children grow up, and went into retirement with our finances secure. That world—and those rules—are over. By 2030, a new reality will take hold, and before you know it: - There will be more grandparents than grandchildren - The middle-class in Asia and Sub-Saharan Africa will outnumber the US and Europe combined - The global economy will be driven by the non-Western consumer for the first time in modern history - There will be more global wealth owned by women than men - There will be more robots than workers - There will be more computers than human brains - There will be more currencies than countries All these trends, currently underway, will converge in the year 2030 and change everything you know about culture, the economy, and the world. According to Mauro F. Guillen, the only way to truly understand the global transformations underway—and their impacts—is to think laterally. That is, using “peripheral vision,” or approaching problems creatively and from unorthodox points of view. Rather than focusing on a single trend—climate-change or the rise of illiberal regimes, for example—Guillen encourages us to consider the dynamic inter-play between a range of forces that will converge on a single tipping point—2030—that will be, for better or worse, the point of no return. 2030 is both a remarkable guide to the coming changes and an exercise in the power of “lateral thinking,” thereby revolutionizing the way you think about cataclysmic change and its consequences.

relationships, clients, and revenue. Once you've learned the Quote 3 method, you will be working less and making more—much more!

Beyond: Our Future in Space Chris Impey, 2015-04-13 “Expansive and enlightening. . . . Impey packs his prose with wonderful anecdotes and weird factoids.”—New York Times Book Review Human exploration has been an unceasing engine of technological progress, from the first homo sapiens to leave our African cradle to a future in which mankind promises to settle another world. Beyond tells the epic story of humanity leaving home—and how humans will soon thrive in the vast universe beyond the earth. A dazzling and propulsive voyage through space and time, Beyond reveals how centuries of space explorers—from the earliest stargazers to today's cutting-edge researchers—all draw inspiration from an innate human emotion: wanderlust. This urge to explore led us to multiply around the globe, and it can be traced in our DNA. Today, the urge to discover manifests itself in jaw-dropping ways: plans for space elevators poised to replace rockets at a fraction of the cost; experiments in suspending and reanimating life for ultra-long-distance travel; prototypes for solar sails that coast through space on the momentum of microwaves released from the Earth. With these ventures, private companies and entrepreneurs have the potential to outpace NASA as the leaders in a new space race. Combining expert knowledge of astronomy and avant-garde technology, Chris Impey guides us through the heady possibilities for the next century of exploration. In twenty years, a vibrant commercial space industry will be operating. In thirty years, there will be small but viable colonies on the Moon and Mars. In fifty years, mining technology will have advanced enough to harvest resources from asteroids. In a hundred years, a cohort of humans born off-Earth will come of age without ever visiting humanity's home planet. This is not the stuff of science fiction but rather the logical extension of already available technologies. Beyond shows that space exploration is not just the domain of technocrats, but the birthright of everyone and the destiny of generations to come. To continue exploration is to ensure our survival. Outer space, a limitless unknown, awaits us.

Technology Training for Educators From Past to Present Krishnan, Chitra, Al-Harthi, Fatma Nasser, Singh, Gurinder, 2022-06-10 In the past decade, rapid digitalization has changed many elements of society, and education is no exception. The tradition of teacher-centered education has been long-held in education and is still extremely well established. Due to the access of technology for knowledge and education, however, the teacher's function in many classrooms has been to advise and guide as students take greater responsibility for their own learning using technology to collect information. Schools and universities across the world are beginning to redesign their learning spaces to enable this new model of education, foster more interaction and small group work, and use technology as an enabler of knowledge. Technology Training for Educators From Past to Present addresses the issues facing our education systems today and the role of technology and innovation in the global transformation of education. This book focuses on the fundamental need for educators at all levels to become knowledgeable with the technological teaching and learning tools at their disposal in order

to best support student learning. Covering topics such as inclusion promotion in education, technology professional development, and online learning environments, this premier reference source is a valuable resource for educational administration and faculty, educators of K-12 and higher education, educational software developers, IT consultants, pre-service teachers, libraries, teaching colleges, researchers, and academicians.

Managing Online Risk Deborah Gonzalez, 2014-09-25 In recent years, building a corporate online presence has become nonnegotiable for businesses, as consumers expect to connect with them in as many ways as possible. There are benefits to companies that use online technology, but there are risks as well. *Managing Online Risk* presents the tools and resources needed to better understand the security and reputational risks of online and digital activity, and how to mitigate those risks to minimize potential losses. *Managing Online Risk* highlights security and risk management best practices that address concerns such as data collection and storage, liability, recruitment, employee communications, compliance violations, security of devices (in contexts like mobile, apps, and cloud computing), and more. Additionally, this book offers a companion website that was developed in parallel with the book and includes the latest updates and resources for topics covered in the book. Explores the risks associated with online and digital activity and covers the latest technologies, such as social media and mobile devices Includes interviews with risk management experts and company executives, case studies, checklists, and policy samples A website with related content and updates (including video) is also available

Warriors' Words Pasquale De Marco, In *Warriors' Words*, an extraordinary collection of military quotations, readers are invited on a historical journey spanning four millennia of warfare. With contributions from over 800 soldiers, commanders, military theorists, and commentators, this anthology offers a profound exploration of the complexities and realities of armed conflict. Through these powerful words, readers gain a glimpse into the human experience of war, encompassing both the courage and resilience of those who serve and the suffering and devastation that war inflicts. Quotes on leadership, strategy, honor, and sacrifice provide timeless wisdom, while reflections on the human cost of war and the pursuit of peace provoke deep contemplation. This comprehensive collection delves into various aspects of war, including the art of strategy and tactics, the challenges of logistics and morale, and the ethical dilemmas that arise in armed conflicts. From ancient military leaders like Sun Tzu and Julius Caesar to modern-day generals and politicians, *Warriors' Words* presents a diverse range of perspectives on the nature of war and its impact on humanity. Furthermore, the book examines the relationship between war and society, exploring the political, economic, cultural, and technological factors that shape conflicts. It also delves into the personal experiences of soldiers, prisoners of war, refugees, and civilians caught in the crossfire, offering a poignant glimpse into the human toll of war. *Warriors' Words* is more than just a collection of quotations; it is a testament to the indomitable spirit of those who have fought and sacrificed in wars throughout history. It is a valuable resource for military professionals, historians, and anyone seeking a deeper understanding of war and its enduring legacy on our world. If you like this book,

Future of Intelligent and Extelligent Health Environment R.G. Bushko,2005-11-28 The technology on our body, in our body and all around us enhances our health and well-being from conception to death. This environment is emerging now with intelligent caring machines, cyborgs, wireless embedded continuous computing, healthwear, sensors, healthons, nanomedicine, adaptive process control, mathematical modeling and common sense systems. The human body and the world in which it functions is a continuously changing complex adaptive system. We are able to collect more and more data about it but the real challenge is to infer local dynamics from that data. Intelligent Caring Biomechatronic Creatures and Healthmaticians (mathematicians serving human health) have a better chance of inferring the dynamics that needs to be understood than human physicians. Humans can only process comfortably three dimensions while computers can see infinite number of dimensions. We will need to trust the distributed network of healthons, Intelligent Caring Creatures, and NURSES (New Unified Resource System Engineers) to create Health Extelligence. We need new vocabulary to push forward in a new way. For instance; healthons are tools combining prevention with diagnosis and treatment, based on continuous monitoring and analyzing of our vital signs and biochemistry. The 'Healthon Era' is just beginning. We are closer and closer to the world with healthons on your body, in your body and all around you; where not a doctor but your primary care healthmatician warns you about an approaching headache; and where NURSE programs your intelligent caring creatures so they can talk to your cells and stop disease in its tracks.
