San Elders Speak Lucinda Backwell, Francesco d'Errico, 2021-07-01 This richly illustrated book documents indigenous knowledge and uses of San material culture and artefacts collected a century ago, as described by KhoiSan elders to the authors.

The Lost City of Solomon and Sheba Robin Brown-Lowe, 2003-04-03 In the heart of south-central Africa there are remains of monuments, ruined cities, temples, forts, irrigation terraces reminiscent of the classic civilizations of the Egyptians and Phoenicians. Yet despite having first been investigated by the Royal Geographical Society a century ago the Zimbabwe (stone courts) culture remains all but unknown to the world at large. This book reveals how the truth about the Zimbabwe culture has been radically influenced, indeed suppressed, throughout history by white and black political interests, struggling to redefine Zimbabwe's identity.

Rethinking Khoe and San Indigeneity, Language and Culture in Southern Africa Julie Grant, Keyan G. Tomaselli, 2022-09-19 The San (hunter-gatherers) and Khoe (herders) of southern Africa were dispossessed of their land before, during and after the European colonial period, which started in 1652. They were often enslaved and forbidden from practicing their culture and speaking their languages. In South Africa, under apartheid, after 1948, they were reclassified as "Coloured" which further undermined Khoe and San culture, forcing them to reconfigure and realign their identities and loyalties. Southern Africa is no longer under colonial or apartheid rule; the San and Khoe, however, continue in the struggle to maintain the remnants of their languages and cultures, and are marginalised by the dominant peoples of the region. The San in particular, continue to command very extensive research attention from a variety of disciplines, from anthropology and linguistics to genetics. They are, however, usually studied as static historical objects but they are not merely peoples of the past, as is often assumed; they are very much alive in contemporary society with cultural and language needs. This book brings together studies from a range of disciplines to examine what it means to be Indigenous Khoe and San in contemporary southern Africa. It considers the current constraints on Khoe and San identity, language and culture, constantly negotiating an indeterminate social positioning where they are treated as the inconvenient indigenous. Usually studied as original anthropos, but out of their time, this book shifts attention from the past to the present, and how the San have negotiated

language, literacy and identity for coping in the period of modernity. It reveals that Afrikaans is indeed an African language, incubated not only by Cape Malay slaves working in the kitchens of the early Dutch settlers, but also by the Khoe and San who interacted with sailors from passing ships plying the West coast of southern Africa from the 14th century. The book re-examines the idea of literacy, its relationship to language, and how these shape identity. The chapters in this book were originally published in the journal *Critical Arts: South-North Cultural and Media Studies*.

Introduction to South Africa Gilad James, PhD, South Africa is a country located at the southernmost tip of Africa, and it has a population of around 58 million. The land is incredibly diverse, ranging from beaches and mountains to savannas and forests, and it is home to many different cultures and languages. South Africa has a rich history, with evidence of human habitation dating back over 100,000 years. In the 19th and early 20th centuries, the country was colonized by the British and the Dutch, which led to the oppression and segregation of the native population. This system, known as apartheid, was officially dismantled in the early 1990s when Nelson Mandela became the first black president of South Africa. Today, South Africa is a democratic country with a diverse economy that is largely driven by mining, agriculture, and tourism. The country is grappling with many of the same issues facing other developing nations, such as income inequality, unemployment, and social inequality. Despite these challenges, South Africa is a vibrant and dynamic nation with a rich cultural heritage and a bright future. The people of South Africa are determined to build a better future for themselves and their children, and they are working hard to make their country a more prosperous and just society.

Indigenous Studies: Breakthroughs in Research and Practice Management Association, Information Resources, 2019-10-11 Global interest in indigenous studies has been rapidly growing as researchers realize the importance of understanding the impact indigenous communities can have on the economy, development, education, and more. As the use, acceptance, and popularity of indigenous knowledge increases, it is crucial to explore how this community-based knowledge provides deeper insights, understanding, and influence on such things as decision making and problem solving. *Indigenous Studies: Breakthroughs in Research and Practice* examines the politics, culture, language, history, socio-economic development, methodologies, and contemporary experiences of indigenous peoples from around the world, as well as how contemporary issues impact these indigenous communities on a local, national, and global scale. Highlighting a range of topics such as local narratives, intergenerational cultural transfer, and ethnicity and identity, this publication is an ideal reference source for sociologists, policymakers, anthropologists, instructors, researchers, academicians, and graduate-level students in a variety of fields.

Encyclopedia of Africa Anthony Appiah, Henry Louis Gates (Jr.), 2010 The *Encyclopedia of Africa* presents the most up-to-date and thorough reference on this region of ever-growing importance in world history, politics, and culture. Its core is comprised of the entries focusing on African history and culture from 2005's acclaimed five-volume *Africana* - nearly two-

thirds of these 1,300 entries have been updated, revised, and expanded to reflect the most recent scholarship. Organized in an A-Z format, the articles cover prominent individuals, events, trends, places, political movements, art forms, business and trade, religions, ethnic groups, organizations, and countries throughout Africa. There are articles on contemporary nations of sub-Saharan Africa, ethnic groups from various regions of Africa, and European colonial powers. Other examples include Congo River, Ivory trade, Mau Mau rebellion, and Pastoralism. The Encyclopedia of Africa is sure to become the essential resource in the field.

Handbook of Research on Social, Cultural, and Educational Considerations of Indigenous Knowledge in Developing Countries Ngulube, Patrick, 2016-09-29 Knowledge systems are an essential aspect to the preservation of a community's culture. In developing countries, this community-based knowledge has significant influence on such things as decision making and problem solving. The Handbook of Research on Social, Cultural, and Educational Considerations of Indigenous Knowledge in Developing Countries is an authoritative reference source for the latest scholarly research on the importance of knowledge and value systems at the community level and ways indigenous people utilize this information. Highlighting impacts on culture and education in developing nations, this book is ideally designed for researchers, academicians, policy makers, students, and professionals interested in contemporary debates on indigenous knowledge systems.

Twelve Days In Botswana Through the Eyes of a Traveler Kathryn J. Hardy, 2017-01-30 Charging elephants, hungry leopards, and spitting cobras could not stop five determined travelers as they made their way through Botswana on safari, following their hearts in search of a life-changing adventure. Twelve Days in Botswana through the Eyes of a Traveler presents an informative, detailed journal depicting day-to-day descriptions of a journey into Botswana that led author Kathryn Hardy, her husband, and three friends on a path less traveled. This personal narrative shares the constant potential dangers of the daily trials and tribulations facing the African wildlife thriving in one of the most natural, unspoiled, and stunningly beautiful places on earth. Through remote camps and lodges found in the most desolate areas of Africa, Hardy shares the group's unforgettable memories of an incredible journey. This travelogue in journal form offers a firsthand account of five travelers' remarkable experiences while on safari in Botswana.

The History of South Africa Roger B. Beck, 2013-11-12 South Africa's history stretches back to the beginnings of human existence. This book provides an overview to South Africa's multiple millennia of history, covering its long and often troubled past to its current status in the 21st century. A newly revised and thoroughly updated version of a popular Greenwood publication, The History of South Africa: Second Edition provides readers with readable, accessible information on the nation's prehistory, early history and colonial past, its unfortunate apartheid era, as well as new coverage of South Africa's

more recent events in the 20th and 21st centuries. This work presents unique, extended coverage of South Africa's prehistory, beginning 3.5 million years ago and incorporating information gleaned from the most recent archaeological finds. The text reflects the most current historiography on African settlement and life before the arrival of Europeans, accurately describes the colonial era as a period of European hegemony and intense African resistance, and discusses in great detail the apartheid years and the events leading up to majority rule in 1994. This second edition also includes an updated timeline, new biographical sketches of notable people, and supplies recent print and electronic resources in the bibliography.

Indigenous Peoples Victoria R. Williams, 2020-02-24 The book is an essential resource for those interested in investigating the lives, histories, and futures of indigenous peoples around the world. Perfect for readers looking to learn more about cultural groups around the world, this four-volume work examines approximately 400 indigenous groups globally. The encyclopedia investigates the history, social structure, and culture of peoples from all corners of the world, including their role in the world, their politics, and their customs and traditions. Alphabetically arranged entries focus on groups living in all world regions, some of which are well-known with large populations, and others that are lesser-known with only a handful of surviving members. Each entry includes sections on the group's geography and environment; history and politics; society, culture, and tradition; access to health care and education; and threats to survival. Each entry concludes with See Also cross-references and a list of Further Reading resources to guide readers in their research. Also included in the encyclopedia are Native Voices inset boxes, allowing readers a glimpse into the daily lives of members of these indigenous groups, as well as an appendix featuring the United Nations Declaration on the Rights of Indigenous Peoples.

People, Parks, and Power Maria Sapignoli, Robert K. Hitchcock, 2023-11-08 This book presents a critical review of the ethics of conservation-related resettlement. We examine what has become known as the "parks versus people" debate, also known as the "new conservation debate," which has pitted indigenous and other local people against nation states and social scientists against ecologists and conservationists for the past several decades. Aiming to promote biodiversity conservation and habitat preservation, some biologists, park planners, and conservation organizations have recommended that indigenous and other people should be removed from protected areas. Local people, for their part, have argued that residents of the areas that were turned into protected areas, national parks, game reserves and monuments had managed them in productive ways for generations and that they should have the right to remain there and to use natural resources as long as they do so sustainably. This position is often supported by indigenous rights organizations and social scientists, especially anthropologists. There are also some conservation-oriented NGOs that have policies involving a more human rights-oriented approach aimed at poverty alleviation, sustainable development, and social justice. The book discusses biodiversity conservation, indigenous peoples (those who are ethnic minorities and who are often marginalized politically), and protected areas, those categories of land set aside by nation-states that have various kinds of rules about land use and residence. The

focus initially is on case studies from protected areas in the United States including Yellowstone National Park, Yosemite National Park, and Glacier National Park and on national monuments and historical parks where resettlement took place. We then consider issues of coercive conservation in southern Africa, including Hwange National Park (Zimbabwe), the Central Kalahari Game Reserve (Botswana), Etosha National Park, and Bwabwata National Park (Namibia), and Kgalagadi Transfrontier Park (South Africa and Botswana). All of these cases involved involuntary resettlement at the hands of the governments. In the book we consider some of the social impacts of conservation-forced resettlement (CfR), many of which tend to be negative. After that, we assess some of the strategies employed by indigenous peoples in their efforts to recover rights of access to protected areas and the cultural and natural resources that they contain. Examples are drawn from cases in Asia, Africa, and South America. Conclusions are provided regarding the ethics of conservation-related resettlement and some of the best practices that could be followed, particularly with regard to indigenous peoples.

Contemporary Dance and Southern African Rock Art Sylvia "Magogo" Glasser, 2022-07-04 This book weaves archaeology, anthropology, culture, politics, colonial history, dance and choreography into a life-transforming tapestry. It charts the extraordinary story of the author's work in South Africa during the abhorrent system of Apartheid when she started a mixed-race dance company called Moving into Dance in the garage of her house. Her in-depth research into rock art, its meaning, the creation and performance of Tranceformations, the dancers' own transformative experiences, as well as issues of cultural appropriation, are at the core of this book. It straddles different disciplines, and shows in real terms how art, or specifically dance, can transform people's lives, not only in physical or cognitive parameters, but that it can change attitudes and perceptions of both participants and observers; that it can touch the human spirit and transcend the very essence of being human. This book also includes a link to a video of the 30-minute dance "Tranceformations", choreographed by the author.

Ordering the Human Eram Alam, Dorothy Roberts, Natalie Shibley, 2024-04-09 Modern science and ideas of race have long been entangled, sharing notions of order, classification, and hierarchy. Ordering the Human presents cutting-edge interdisciplinary scholarship that examines the racialization of science in various global contexts, illuminating how racial logics have been deployed to classify, marginalize, and oppress. These wide-ranging essays—written by experts in genetics, forensics, public health, history, sociology, and anthropology—investigate the influence of racial concepts in scientific knowledge production across regions and eras. Chapters excavate the mechanisms by which racialized science serves projects of power and domination, and they explore different forms of resistance. Topics range from skull collecting by eighteenth-century German and Dutch scientists to the use of biology to reinforce notions of purity in present-day South Korea and Brazil. The authors investigate the colonial legacies of the pathologization of weight for the Maori people, the scientific presumption of coronary artery disease risk among South Asians, and the role of racial categories in COVID-19 statistics and responses, among many other cases. Tracing the pernicious consequences of the racialization of science,

Ordering the Human shines a light on how the naturalization of racial categories continues to shape health and inequality today.

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2008-03-12 Here, at last, is the massively updated and augmented second edition of this landmark encyclopedia. It contains approximately 1000 entries dealing in depth with the history of the scientific, technological and medical accomplishments of cultures outside of the United States and Europe. The entries consist of fully updated articles together with hundreds of entirely new topics. This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non-Western Science, such as rationality, objectivity, and method. You'll also find material on religion and science, East and West, and magic and science.

The Bushman Myth Robert Gordon, Stuart Sholto-Douglas, 2018-02-07 The revised, updated version of this book includes an analysis of the sweeping political changes in South Africa since its original publication in 1992. Other new material covers more theoretical issues and contemporary developments in scholarship, including a reconsideration of the film 'The Gods Must Be Crazy?'; a discussion of 'expos thnography' and its attendant political/moral positioning; and an examination of the political situation in Namibia, with a close study of the near collapse of the Nyae Nyae Development Foundation.

Arcepathy the Whole Medical System Lynette Barnard, 2020 This is not a study on archaeology or the history of ancient civilisations! My foremost intention is not to inform you about Traditional Chinese Medicine, Indian Ayurvedic Medicine, shamanism, a Paleo diet, vegetarianism or raw foodism, but the emphasis is on the fact that those who exercise discipline in their particular fields, whether tradition or lifestyle, do so with all their might. I want you to radiate this attitude in your present lifestyle diet and future life expectancy! Pythagoras puts it so well, "salt is born of the purest of parents: the sun and the sea".

Language in South Africa Victor N. Webb, 2002-01-01 A discussion of the role which language, or, more properly, languages, can perform in the reconstruction and development of South Africa. The approach followed in this book is characterised by a numbers of features - its aim is to be factually based and theoretically informed.

HUMAN GEOGRAPHY Dr. Mangal Tekade, Dr. Madhav Rajpange, Dr. Dattatrya Narsale, 2022-01-01 The specific effects of evolutionary development on the subcontinent. Additionally, it lists many characteristics, details, and information on the various racial and cultural groups that live there. The book includes a thorough description of the culture and practises, including how they have changed and evolved over time. The study demonstrates the influence of geographical conditions, such as the availability of lakes and rivers with water supplies. The abundance of arable land has contributed to the

expansion and advancement of civilisation in this region. Human geography is the study of how the physical environment and sociocultural environment that people interact with one another to produce are related to one another. In class XI, they read the book Fundamentals of Physical Geography, which covered the aspects of the physical environment. These aspects, which humans have produced via their actions on the stage supplied by the physical environment, include landforms, soils, climate, water, natural vegetation, and a variety of flora and animals. Humans have constructed homes, towns, cities, road and rail networks, industries, farms, ports, everyday goods, and all other components of material culture utilising the resources made available by the natural world. Humans have significantly altered the physical environment, which has had an influence on human existence in turn. Complicating factors include the relationship between geography and human geography (the latter being seen by many as merely a subfield of the former); the discipline's relatively recent professionalisation; variations in human geography written in different languages; and the challenge—no, the sheer improbability—of being able to pinpoint clear research questions, sequential paradigms, or key thinkers.
