A mix of Hitchcockian suspense, Agatha Christie plotting, and Greek tragedy. —Entertainment Weekly The Silent Patient is a shocking psychological thriller of a woman's act of violence against her husband—and of the therapist obsessed with uncovering her motive. Alicia Berenson's life is seemingly perfect. A famous painter married to an in-demand fashion photographer, she lives in a grand house with big windows overlooking a park in one of London's most desirable areas. One evening her husband Gabriel returns home late from a fashion shoot, and Alicia shoots him five times in the face, and then never speaks another word. Alicia's refusal to talk, or give any kind of explanation, turns a domestic tragedy into something far grander, a mystery that captures the public imagination and casts Alicia into notoriety. The price of her art skyrockets, and she, the silent patient, is hidden away from the tabloids and spotlight at the Grove, a secure forensic unit in North London. Theo Faber is a criminal psychotherapist who has waited a long time for the opportunity to work with Alicia. His determination to get her to talk and unravel the mystery of why she shot her husband takes him down a twisting path into his own motivations—a search for the truth that threatens to consume him....

The Language of Patient Feedback Paul Baker,Gavin Brookes,Craig Evans,2019-04-05 The Language of Patient Feedback provides a unique insight into a diverse range of issues related to healthcare. Through the comprehensive and detailed interrogation of 29 million words of online patient feedback on the NHS in England, as well as 11 million words of responses to the feedback from NHS providers, this book: Uses a combination of computer-assisted and human analysis (Corpus-Assisted Discourse Analysis) to examine the extent to which characteristics like age and gender result in different types of evaluation. Investigates why nurses, doctors, dentists and receptionists are associated with very distinct types of feedback. Demonstrates the ways that NHS staff respond to comments and what this reveals about underlying institutional ideologies and practices. Concludes with suggestions for key recommendations that the NHS could act upon to improve the overall level of care it provides, as well as reflecting on what patient evaluation can actually tell us. The Language of Patient Feedback is key reading for anyone undertaking research within corpus linguistics, discourse analysis and health

communication.

Conflict of Interest and Medicine Boris Hauray,Henri Boullier,Jean-Paul Gaudillière,Hélène Michel,2021-09-06 In the context of a growing criticism on the influence of the pharmaceutical industry on physicians, scientists, or politicians,

Conflict of Interest and Medicine offers a comprehensive analysis of the conflict of interest in medicine anchored in the social sciences, with perspectives from sociology, history, political science, and law. Based on in-depth empirical investigations conducted within different territories (France, the European Union, and the United States) the contributions analyze the development of conflict of interest as a social issue and how it impacts the production of medical knowledge and expertise, physicians' work and their prescriptions, and also the framing of health crises and controversies. In doing so, they bring a new understanding of the transformations in the political economy of pharmaceutical knowledge, the politicization of public health risks, and the promotion of transparency in science and public life. Complementing the more normative and quantitative understandings of conflict of interest issues that dominate today, this book will be of interest to researchers in a broad range of areas including social studies of sciences and technology, sociology of health and illness, and political sociology and ethics. Innovation, Collective Intelligence and Resiliency in Healthcare Organizations Aline Courie-Lemur, 2024-02-21 Resilience in healthcare organizations is a complex issue, involving all stakeholders in the healthcare field. It is a highly topical issue, even more so in the wake of the recent health crisis. This book explores the impact of collective intelligence on the resilience of these organizations, and the role played by innovation. Health organizations comprise the structures and systems involved in treating patients, as well as healthcare professionals with medical, social or medico-social expertise, along with institutional and administrative players in the field. Innovation, Collective Intelligence and Resiliency in Healthcare Organizations alternates between theoretical readings and illustrative case studies. Their diversity is the result of their contributors: university researchers, institutional players from healthcare authorities, practicing caregivers in hospital structures or healthcare coordination support systems, and managers of healthcare structures and systems.

Law, Environmental Illness and Medical Uncertainty Tarryn Phillips, 2015-03-05 We've seen it before, with asbestos-related disease, leukaemia clusters and lung cancer caused by cigarettes. There tends to be a lag between the emergence of

environmental risks and chemical injuries, and their recognition and therapeutic treatment by medicine and the law. *Law, Environmental Illness and Medical Uncertainty* examines how our society governs new health concerns as they emerge, and the barriers that face new and uncertain theories seeking recognition in the law. In this book, Tarryn Phillips focuses her investigation on the struggle over the controversial condition multiple chemical sensitivities, or MCS (also known as environmental illness). Presenting nine case studies where workers sought compensation for MCS from their multinational employers, she captures a nuanced portrait of their embittered, unequal battles over the scientific, legal and insurance paradigms for understanding toxic risk, environmental illness and the regulation of industry. It draws on three years of fieldwork in Australia, including interview data with lay people and sympathetic and sceptical experts, participant observation in the courtroom and textual analysis of official reports. The book gives a unique, ethnographic insight into the governance of risk and uncertainty within a neoliberal economy, medico-scientific controversies and courtroom dramas. It highlights how a skeptical approach towards emergent environmental concerns is encouraged within the current regime, and decision-makers face disincentives for taking a sympathetic approach. Compellingly written and easy to read, it should appeal widely to interested lay people, and students and scholars of science and technology studies, medical anthropology, sociology of health and illness, and critical legal studies.

Health Communication and Mass Media Rukhsana Ahmed, Benjamin R. Bates, 2016-04-22 *Health Communication and Mass Media* is a much-needed resource for those with a professional or academic interest in the field of health communication. The chapters engage and expand upon significant theories informing efforts at mediated health communication and demonstrate the practical utility of these theories in on-going or completed projects. They consider how to balance the ethical and efficacy demands of mediated health communication efforts, and discuss both traditional media and communication systems and new web-based and mobile media. The book's treatment is broad, reflecting the topical and methodological diversity in the field. It offers an integrated approach to communication theory and application. Readers will be able to appreciate the ways that theory shapes health communication applications and how those applications inform the further construction of theory. They will find practical examples of mediated health communication that can serve as models for their own efforts. While the book serves as an introduction to mediated health communication for students, professionals, and practitioners with limited experience, researchers and advanced practitioners will also appreciate the exemplars and theoretical insights offered by the chapter authors. This book will be of interest to anyone involved in health communication programs or more generally with communication and allied studies, as well as to those in the health professions and their related fields.
