The Tao of Pooh Benjamin Hoff, 1982 Explains the basic concepts of the Chinese philosophy of Taoism through a discussion of how Winnie-the-Pooh lives by its principles.

The Tao of Alibaba Brian A Wong, 2022-11-01 From a long-time Alibaba executive and former special assistant to Jack Ma, this is the first book to articulate how Alibaba's unique culture and “tai chi” management principles are providing a business and economic development model for the rest of the world. If you took the economic might of Amazon, and added the penetration of Facebook, the ubiquity of Google, and the cultural significance of YouTube, you might have something starting to resemble Alibaba. Commonly mischaracterized as a kind of Chinese eBay for businesses, Alibaba and its interlinked network of products and services have exploded into global markets, disrupting conventional businesses and creating previously unimaginable opportunities for millions of small businesses worldwide. This book reveals the Tao of Alibaba—the company's “secret sauce”—a consciously cultivated ethos and spirit that has enabled Alibaba to weather tough times and setbacks, and persist toward a common mission. It is a blueprint of the company's management philosophy, crystalized into the most important elements that have driven its success, and it provides a road map for how to incorporate these principles into any organization's operations. Wong distills his nearly two decades of experience inside the company to show readers how to align their organization's capabilities with performance-maximizing tools in order to achieve success. But most importantly, the Tao of Alibaba teaches the pursuit of greater purpose and meaning, steering entrepreneurs to view their ventures as a vehicle for having profound and lasting impacts on their communities. Ultimately, the lessons shared in

The Tao of Alibaba will serve as timeless tools for any entrepreneur seeking to configure their organization toward purpose and impact.

Therapeutic Metaphors for Children and the Child Within Joyce C. Mills, Richard J. Crowley, 2014-07-11 Winner of the 1988 Clark Vincent Award for an outstanding contribution to the profession through a literary work and translated into four languages, the original edition of *Therapeutic Metaphors for Children and the Child Within* was considered a groundbreaking addition to the field of child and adolescent psychotherapy. The 1986 edition was the first—and to this day the only—book that solely intertwines the extraordinary foundational teachings and philosophies of Milton H. Erickson and creative healing approaches for children and adolescents. With resiliency at its core, this revision now brings forward important topics related to neurobiology and cultural value of metaphor and play, along with fresh case examples and creative activities to a new generation of mental health, education, and coaching professionals.

Wild Life Stefan Batorij, 2024-07-18 In an increasingly urbanised world, the need to reconnect with nature is more important than ever. Originating from Japan, Shinrin-Yoku (translated to 'Forest Bathing') is a therapeutic invitation to immerse oneself in the embrace of the woods and wild places. Covering both the philosophy and the practicalities, this is an evidence-based guide for practitioners seeking to increase their ecological awareness, explore the mental, emotional, and immunological healing capabilities of Shinrin-Yoku, and learn how to incorporate it into their practice. Building on the necessary in-person training, this book will help practitioners feel confident in guiding others in the woods as they discover their own connection to nature and is underpinned by a thorough understanding of the science behind the healing. Practical in its approach but spiritual and poetic in its nature, this timely book provides the knowledge and skills required to adopt Shinrin-Yoku into any therapist's toolbox.

The Good Web Guide for Book Lovers Susan Osborne, 2003 The birth of the internet heralded several theories about the demise of the book and of reading in general. Contrary to this, books are thriving on the internet and the author recommends the best websites to cut your searching time. This guide includes information on: the best internet bookshops, both small and large; rare and specialist bookshops; book clubs; literary magazines; reading group resources; author and fan websites and publisher's own websites; websites for budding writers to develop their own talents.

The Dao of Translation Douglas Robinson, 2015-06-12 The Dao of Translation sets up an East-West dialogue on the nature of language and translation, and specifically on the unknown forces that shape the act of translation. To that end it mobilizes two radically different readings of the Daodejing (formerly romanized as the Tao Te Ching): the traditional mystical reading according to which the Dao is a mysterious force that cannot be known, and a more recent reading put forward by Sinologists Roger T. Ames and David L. Hall, to the effect that the Dao is simply the way things happen. Key to Ames and Hall's reading is that what makes the Dao seem both powerful and mysterious is that it channels habit into action—or what the author calls social ecologies, or icoses. The author puts Daoism (and ancient Confucianism) into dialogue with nineteenth-century Western theorists of the sign, Charles Sanders Peirce and Ferdinand de Saussure (and their followers), in order to develop an icotic understanding of the tensions between habit and surprise in the activity of translating. The Dao of Translation will interest linguists and translation scholars. This book will also engage researchers of ancient Chinese philosophy and provide Western scholars with a thought-provoking cross-examination of Eastern and Western perspectives.

Teaching Language as Action in the ELA Classroom Richard Beach, Faythe Beauchemin, 2019-03-14 This book explores English language arts instruction from the perspective of language as social actions that students and teachers enact with and toward one another to create supportive, trusting relations between students and teachers, and among students as peers. Departing from a code-based view of language as a set of systems or structures, the perspective of languaging as social actions takes up language as emotive, embodied, and inseparable from the intellectual life of the classroom. Through extensive classroom examples, the book demonstrates how elementary and secondary ELA teachers can apply a languaging perspective. Beach and Beauchemin employ pedagogical cases and activities to illustrate how to enhance students' engagement in open-ended discussions, responses to literature, writing for audiences, drama activities, and online interactions. The authors also offer methods for fostering students' self-reflection to improve their sense of agency associated with enhancing relations in face-to-face, rhetorical, and online contexts.

Pedagogies and Curriculums to (Re)imagine Public Education Encarna Rodríguez, 2015-06-04 This book discusses current market-based educational discourses and how they have undermined the notion of “the public” in public education by allowing private visions of education to define the public democratic imagination. Against this discouraging background, this text embraces Freire's understanding of hope as an ontological need and calls for finding new public grounds for our public imagination. It further articulates Freire's mandate to unveil historically concrete practices to sustain democratic educational visions, no matter how difficult this task may be, by (1) presenting an indepth description of the pedagogies and curriculums of eleven schools across historical and geographical locations that have worked or are still working with disenfranchised communities and that have publicly hoped for a better future for their students, and by (2) reflecting on how the stories of

these schools offer us new opportunities to rethink our own pedagogical commitment to public visions of education. To promote this reflection, this book offers the notion of publicly imagined public education as a conceptual tool to help understand the historical and discursive specificity of schools' hopes and to (re)claim public schools as legitimate sites of public imagination.

Emotional Intelligence for Religious Leaders John Lee West, Roy M. Oswald, Nadyne Guzmán, 2018-08-24 Religious leaders require tremendous skill in emotional intelligence, yet their training very rarely addresses how to develop the practical skills needed—from self-awareness to resilience. *Emotional Intelligence Religious Leaders* draws on the latest research in business, psychology, and theology to offer religious leaders the information and tools they need to increase their emotional intelligence and enhance their relationships, communication and conflict management skills, spirituality, and overall well-being. The book offers both a deep understanding of how to develop emotional intelligence and also prescriptive insights about how to practice it that will be helpful for religious leaders in many settings, including congregational ministry, lay ministry, spiritual direction, pastoral counseling, and more.

Canine Confidential Marc Bekoff, 2018-04-13 Get to know your best friend better: “Everyone who owns a dog, breeds or trains dogs, or works with dogs should read this informative book.” —Library Journal Just think about the different behaviors you see at a dog park. We have a good understanding of what it means when dogs wag their tails—but what about when they sniff and roll on a stinky spot? Why do they play tug-of-war with one dog, while showing their bellies to another? Why are some dogs shy, while others are bold? What goes on in dogs’ heads and hearts—and how much can we know and understand? Written by award-winning scientist—and lifelong dog lover—Marc Bekoff, *Canine Confidential* not only brilliantly opens up the world of dog behavior, but also helps us understand how we can make our dogs’ lives better. Rooted in the most up-to-date science on cognition and emotion—fields that have exploded in recent years—*Canine Confidential* is a wonderfully accessible treasure trove of new information and myth-busting. Peeing, we learn, isn’t always marking; grass-eating isn’t always an attempt to trigger vomiting; it’s okay to hug a dog—on their terms; and so much more. There’s still much we don’t know, but at the core of the book is the certainty that dogs do have deep emotional lives, and that as their companions and trainers we must recognize them as the unique, complex individuals they are—so we can keep them as happy and healthy as possible. “Bekoff shares his own studies and others’ research, along with real-life stories, in a winning tone.” —Booklist

The Art and Science of Personalising Care with Older People with Diabetes Trisha Dunning, 2018-08-06 This unique book is intended for all health professionals caring for older people with diabetes such as specialist and general nurses, doctors, primary care practitioners and dietiticians. Although there is an increasing body of work about personalised care, no

publications were identified that encompass the focus and scope of the proposed book. The global population is ageing and increasing age is a key risk factor for diabetes. Older people with diabetes are often vulnerable, have complex care needs and often have cognitive changes, which makes personalising care challenging for health professionals. Thus, this is an internationally relevant book filling a gap in the current literature. This is a practical and updated book that will use an engaging and easy to read narrative style. It challenges readers to reflect in and on their practice. It encompasses people with diabetes' and authors' stories, which are known to have a special interest to readers, make it easier to apply the information to practice, enhance learning, and hence the relevance and value of the book. It is relevant to advocacy organisations as well as managers and service planners. Researchers and scientists may find relevant information on grant and ethics applications, research protocols, plain language statements for potential participants and operationalising research protocols.

poverty to ethnic conflict to climate change, "are not working. These problems are incredibly dynamic and complex, involving an ever-shifting array of factors, actors, and circumstances. They demand a highly fluid and adaptive approach, yet we address them by devising fixed, long-term plans. Social labs, says Zaid Hassan, are a dramatically more effective response. Social labs bring together a diverse group of stakeholders, "not to create yet another five-year plan but to develop a portfolio of prototype solutions, test those solutions in the real world, use the data to further refine them, and test them again. Hassan builds on a decade of experience, "as well as drawing from cutting-edge research in complexity science, networking theory, and sociology, "to explain the core principles and daily functioning of social labs, using examples of pioneering labs from around the world. He offers a new generation of problem solvers an effective, practical, and exciting new vision and guide.
