Canasta de cuentos mexicanos B. Traven,2022-06-14 Canasta de cuentos mexicanos es el resultado de la privilegiada visión de uno de los escritores más destacados del siglo xx: B. Traven, narrador que pudo entender e interpretar como nadie la realidad mexicana. En estos relatos nos describe la vida de los indígenas, resaltando su ingenio, agudeza y mordacidad. Estos textos de prosa sencilla y humor contundente han sido leídos y alabados por generaciones enteras en todo el mundo.

EL CRIMEN PERFECTO Luis Tamayo Pérez,2022-07-22 Contrariamente a lo que la mayoría de la humanidad supone, los verdaderos dirigentes de la tierra no son los gobiernos. Quienes actualmente gobernan el mundo —y se enriquecen desmesuradamente en el proceso— son las grandes corporaciones transnacionales. Tales corporaciones fueron, al principio, establecidas para realizar emprendimientos que implicaban un elevado riesgo y podrían ocasionar que sus dueños fuesen llevados a prisión por las externalidades que sus empresas producían. Con el objeto de evadir tal responsabilidad, se crearon entelequias —las corporaciones— que podían contratar personal, adquirir bienes e incluso quebrar pero que nunca podrían ir a la cárcel. Una corporación puede asesinar a decenas de miles de personas —como mostró la catástrofe de Bhopal, India, ocurrida en 1984— sin recibir castigo alguno. Eso ocurre porque las corporaciones, una especie de Alien en la tierra, poseen un objetivo único y muy preciso: el retorno, incrementado y en el menor tiempo posible, del capital invertido. Las grandes corporaciones, a la vez que se han adueñado del mundo, agotan los recursos naturales, contaminan aire, agua y suelo y realizan un crimen perfecto donde la humanidad es, a la vez, víctima y cómplice. Es víctima pues la catástrofe que el Corporoceno genera conduce a la Sexta extinción masiva de las especies. Es cómplice pues, al adquirir los productos que las corporaciones ofrecen, fortalece y enriquece a quienes depredan su planeta, su casa. La humanidad está a las puertas de un colapso civilizatorio global que amenaza terminar con las condiciones planetarias que permitieron la vida tal y como la conocemos. En este estudio se revisa tal fenómeno.

On Mexican Time Tony Cohan,2009-07-01 An American writer and his wife find a new home—and a new lease on life—in the charming sixteenth-century hill town of San Miguel de Allende, Mexico. When Los Angeles novelist Tony Cohan and his artist wife, Masako, visited central Mexico one winter they fell under the spell of a place where the pace of life is leisurely, the cobblestone streets and sun-splashed plazas are enchanting, and the sights and sounds of daily fiestas fill the air. Awakened to needs they didn't know they had, they returned to California, sold their house and cast off for a new life in San Miguel de Allende. On Mexican Time is Cohan's evocatively written memoir of how he and his wife absorb the town's sensual ambiance, eventually find and refurbish a crumbling 250-year-old house, and become entwined in the endless drama of Mexican life. Brimming with mystery, joy, and hilarity, On Mexican Time is a stirring, seductive celebration of another way of life—a tale of Americans who, finding a home in Mexico, find themselves anew.

Tecnología 1 Gabriel, Pablo,Navarro Góngora, Diana Alicia,Rangel Orduña, Macbeth Baruch,Sixtos Zaleta, Ma. De los Ángeles,2020-06-01 Tecnología 1. La asignatura Tecnología en el nivel secundaria se establece como un campo de estudio que va más allá del saber práctico de la especialidad técnica, para presentarlo desde una perspectiva humanista, al considerar no sólo los aspectos instrumentales de las técnicas (saber hacer), sino también sus procesos de cambio, gestión e innovación, y su relación con la sociedad y la naturaleza para la toma de decisiones en contextos diferentes; además, recurre a la participación social en el uso, creación y mejora de los productos técnicos, así como de las implicaciones de éstos en el entorno.

Leo, luego escribo Rojas Tapia, Antonio,2014-11-14 Esta obra ha sido planteada didácticamente por competencias. Más allá de modas pedagógicas y didácticas programáticas, más allá del apego a lineamientos globalizadores, por competencia debe entenderse aquella habilidad o cualidad integral que permite al educado la adquisición y aplicación de conocimientos, la comprensión y el desarrollo de facultades, el reconocimiento y la formación de hábitos, así como la crítica y al afianzamiento de valores éticos, cívicos e históricos a través del pasado, presente y futuro.

La reforma al artículo 27 y su impacto en el desarrollo económico y social del campo mexicano Marilu León Andrade,2021-12-21 México por albergar en el siglo XX el primer intento de revolución en el mundo, es uno de los casos más interesantes para estudiar y comprender el curso del desarrollo del capitalismo a través de la vía agraria. Y aunque parezca

que nuestro sector rural es poco significativo por el «poco aporte» que en términos de precios hace a la economía, la historia nos señala que las actividades productivas que se desarrollan en México en conjunción con la tierra, así como la gente que las realiza, han jugado un papel de primer orden en la conformación de las actuales estructuras productivas y de las relaciones de producción que de ella emanan. De esta manera la guerra de revolución de 1910, encabezada por las masas campesinas, sentó las bases para los posteriores ajustes estructurales que, con un marcado carácter campesino, configuraron la estructura productiva que predominaría en el sector agrícola mexicano por aproximadamente ochenta años. Esta estructura agraria no fue un hecho más, pues además de constituir un caso sin parangón en el mundo, contribuyó al desarrollo y creación del sector industrial del país. Desarrollo basado sobre un amplio número de productores y no en los grandes latifundios ni en las empresas agrícolas acaparadoras de recursos y expulsoras de mano de obra. Así, al tiempo que se desarrollan los sectores industrial y agrícola del país, también se resarce a las masas campesinas de los desastrosos efectos de la acumulación de capital realizada durante el porfiriato. Este proceso provocaría que a la poste México fuera no sólo el país más desarrollado entre los países de Latinoamérica, sino que además procurara crear un marco jurídico que le asegurara al campesino un mínimo de tierra con el cual pudiera sobrevivir: surge así el sistema ejidal en México, en gran parte responsable del gran auge económico de la economía mexicana en las décadas de 1940, 1950 y parte de la de 1960, y responsable del desarrollo industrial del país durante aquellos años. Sin embargo, la historia económica a inicios de la década de 1970 tomó un curso distinto y contrario a la tendencia progresiva del sector agrícola mexicano que lo conduciría, tanto a él como al sector ejidal, a una profunda crisis que se vio reflejada en un descenso de los niveles de producción y productividad. Crisis que vería su posible solución en la reforma al artículo 27 constitucional llevada a cabo durante 1992, que buscó reorientar las políticas de Estado para corregir los problemas productivos del sector.

La cofradía de la augusta maldad Jorge Olvera Vázquez,2024-05-21 La presente obra versa sobre uno de los escritores más singulares de la narrativa contemporánea: Augusto Monterroso. Se trata de un autor canónico de la ironía literaria, de prosapia borgeana que, aunque nació siendo un clásico con la publicación de Obras completas (y otros cuentos) (1959), sigue siendo un escritor poco estudiado, un autor de culto insuficientemente reconocido, motivo al que se debe el presente estudio.
