Mario Barbagallo, Giuseppe Licata, James R. Sowers

Recent Advances in Geriatrics Mario Barbagallo, Giuseppe Licata, James R. Sowers, 2013-06-29 This book, *Recent Advances in Geriatrics*, is based on the proceedings of the 8th Course of the School of Gerontology and Geriatrics held in Erice (Trapani, Italy) at the International Centre for Scientific Culture Ettore Majorana on March 20-25, 1997. This international effort was organized jointly by professors from the University of Palermo (Italy) and from Wayne State University (Michigan, USA) as a result of a cross-cultural collaboration of several years. The increasing average age of the populations in industrialized countries has resulted in increased interest in the different biological, medical, psychological, and economic aspects related to the health and social care of the elderly. Physicians and health care practitioners are realizing the need for a revised approach to geriatric care. Comprising contributions of clinicians and scientists from Italy and North America, the present volume provides a multidisciplinary approach to many gerontological and geriatric problems, examined from a scientific and a practical point of view. Several of the most important aspects of the aging process - the genetics of aging, body composition modification, immunological, endocrinological, and renal physiology changes - have been addressed. Data from a multi-center Italian study on centenarians is reported, together with an update on clinical and pharmacological approaches to dementia syndromes and economic and social aspects related to the care of the elderly.

Geriatrics for Specialists Andrew G. Lee, Jane F. Potter, G. Michael Harper, 2021-08-31 This book aims to be a single point of reference for advances in the care of geriatric populations across medical and surgical specialties. The aging population is a unique demographic with its own health challenges. Geriatricians are specifically trained to address these challenges but few medical students or residents enter geriatrics, even as the demand for geriatric expertise increases. The practices of many medical and surgical specialists are dominated by older patients who may themselves see many specialists but rarely visit geriatricians. This updated edition elucidates the most common medical conditions seen in aging patients and translates approaches to those conditions for physicians across specialties. Divided into three sections that assemble crosscutting issues, medical specialties, and surgical and related specialties, this book serves as a guide for clinicians of all backgrounds who will work with older patients as the demographic ages further. This second edition of *Geriatrics for*

Specialists expands the number of specialist chapters to reflect growth in research in aging and clinical care for older people in dermatology, plastic surgery, and behavioral neurology. All original chapters from the first edition are extensively revised and updated to reflect the rapid growth of new knowledge in the field.

Essential Geriatrics, Third Edition Woodford Henry, 2019-07-04 This third edition has been comprehensively updated and expanded, and now includes over 200 questions and answers throughout the text in the best of five' format. Reichel's Care of the Elderly Jan Busby-Whitehead, Samuel C. Durso, Christine Arenson, Rebecca Elon, Mary H. Palmer, William Reichel, 2022-07-21 This eighth edition of Dr Reichel's formative text remains the go-to guide for practicing physicians and allied health staff confronted with the unique problems of an increasing elderly population. Fully updated and revised, it provides a practical guide for all health specialists, emphasizing the clinical management of the elderly patient with simple to complex problems. Featuring four new chapters and the incorporation of geriatric emergency medicine into

chapters. The book begins with a general approach to the management of older adults, followed by a review of common geriatric syndromes, and proceeding to an organ-based review of care. The final section addresses principles of care, including care in special situations, psychosocial aspects of our aging society, and organization of care. Particular emphasis is placed on cost-effective, patient-centered care, including a discussion of the Choosing Wisely campaign. A must-read for all practitioners seeking practical and relevant information in a comprehensive format.

Contemporary Geriatric Medicine Steven R. Gambert, 2012-04-04 This volume is the third in the Contemporary Geriatric Medicine series. As in previous volumes, information is presented in the form of easy-to read essays to bring the reader up to date on state-of-the-art developments in the area of geriatric medicine. Once again, a system approach is utilized. In addition, several new topics-including alcoholism, thromboembolic disease, and decubitus ulcer management-have been introduced to enhance this volume's usefulness to the busy clinician and student. Each chapter is not meant to be an exhaustive review of all topics in the field, but rather to focus on issues currently receiving a great deal of attention. Our goal continues to be to create an exciting approach to contemporary issues in geriatric medicine. The editors are once again appreciative for having been given the opportunity to develop this series. Appreciation is also expressed to our professional colleagues, families, and administrative assistants, who have enabled this volume to reach fruition. As in the past, we thank, most of all, our elderly patients for providing the inspiration and impetus to improve our knowledge and understanding of the health care needs of the elderly. Steven R. Clinical Education in Geriatrics Judith L. Howe, Thomas V. Caprio, 2020-05-21 This book highlights both recent innovations in professional health curricula and continuing education and interventions aimed at improving student attitudes towards geriatrics and aging. The contributors cover areas including simulation, online training, and standardized patients for evaluation, but also emphasize the important end-result of clinical training: to take care of real older adults outside the classroom. Importantly, this underscores the development of powerful learning experiences of students by sensitizing them to the frameworks of palliative care, cancer care, sexuality, and aging research, all of which serves as a powerful catalyst for creating a 'pipeline' of students who embrace aging as a central theme of their future work. As increased training in geriatrics is required to attune the health care workforce to the needs of older adults, this book will be of interest to those seeking to create a more age-friendly healthcare curriculum. This book was originally published as a special issue of the Gerontology & Geriatrics Education journal.

Contemporary Geriatric Medicine Steven R. Gambert, 1986-02-28 In the last two years, a wealth of new information has accumulated regarding both clinical and research aspects of health care for the elderly. Although many controversial issues have been resolved, many still remain. Volume 2 of Contemporary Geriatric Medicine is once again dedicated to the clinician who cares for the elderly on a continuing basis. Although, for the most part, general topics first introduced in Volume 1 have been retained, all information in this volume is new and represents the current state of the art. In addition, several new topics-including falls, interpretation of laboratory data, and oral health care-have been introduced to enhance this volume's usefulness to the busy clinician. Through these easy-to-read essays, we attempt once again to keep the non geriatrician abreast of the current state of the art regarding the special needs and problems of the elderly. Each chapter is not meant to be an exhaustive review of all topics in the field, but rather to focus on issues receiving a great deal of attention. Our goal is to create an exciting approach to contemporary issues in geriatric medicine.

Benefield, 2014-09-08 The articles appearing in this geriatrics-focused issue are consistent with the collaborative and translational concepts held by a life course perspective. Each supports interprofessional collaboration and some are either authored or coauthored by interdisciplinary colleagues. Three goals are reflected in these articles: keeping community-dwelling older adults safe, sensible, and secure with solutions that will enable them to stay healthy, wise, and aware. Topics include maintaining physical functions, benefits and consequences of weight-bearing exercise on foot health; cancer prevention; managing nocturia's effect on sleep quality and safety; protection from financial exploitation; and providing safe and affordable living environments. Several articles address physical or cognitive challenges that include monitoring medication adherence, threat of anxiety and stigma in dementia, and approaches to managing self-care in the home for persons with dementia. These evidence-based articles address emerging and best practices to support targeted interventions for persons in community-dwelling home settings.
