Bpm Buenas Prácticas de Manufactura Carlos H. Hernandez,2018-12-27 Las Buenas Prácticas de Manufactura, son el primer paso obligatorio cuando una organización requiere implementar un sistema de inocuidad de los alimentos, crean cultura preventiva, conciencia, compromiso y enfoque hacia el cumplimiento de requisitos. El sistema HACCP y las BPM trabajan totalmente en forma simultánea para asegurar la inocuidad de los procesos relacionados con la inocuidad de los productos. Un sistema HACCP con unas BPM robustas es un sistema ligero totalmente enfocado en los puntos críticos de control. Este libro presenta de forma práctica el alcance que deben tener las Buenas Prácticas de Manufactura y al final encontrarán una lista de verificación y monitoreo de las BPM.

*Buenas Prácticas Para la Producción en Pequeña Escala de Agua de Coco Embotellada* Rosa Rolle,Food and Agriculture Organization of the United Nations,2007-11-30 Tradicionalmente, el agua de coco se consume como una bebida refrescante en muchas regiones. El creciente interés del consumidor por este producto, como bebida refrescante y como bebida para deportistas, ha ampliado considerablemente sus oportunidades de mercado. La naturaleza proporciona una envoltura estéril ideal para el agua de coco: el coco o fruto del cocotero. Sin embargo, al partir el coco, el agua de coco queda expuesta a los elementos responsables de su descomposición y rápidamente esta se deteriora. La aplicación del proceso de conservación en frío descrito en esta guía puede atrasar considerablemente este rápido deterioro del agua de coco, a la vez que permite conservar el delicado sabor de este producto. De este modo el agua de coco embotellada, cuando se almacena entre 0 y 4 °C, puede tener una conservación de 10 días a tres semanas. Esta guía ha sido diseñada como un recurso de aprendizaje a nivel de micro y pequeña empresas que embotellan agua de coco, así también como un material de capacitación muy útil para educadores y divulgadores técnicos. Publicado también en inglés y francés.

Las buenas prácticas en la industria de los alimentos Santiago Pablo Baggini,2021-05-25 Las personas tienen derecho a consumir alimentos aptos para el consumo humano. Las Buenas Prácticas de Manufactura son una herramienta básica para la obtención de productos inocuos. Las mismas se centran en la higiene y manipulación de alimentos.

**Producción más limpia** Bart Van Hoof,Néstor Monroy,Alex Saer,2018-01-16 Este libro busca contribuir a la difusión y la investigación de la Producción más Limpia (PML), como estrategia de gestión ambiental proactiva en empresas latinoamericanas. Mediante el desarrollo de sus diferentes capítulos se introducen los conceptos, estrategias, herramientas y casos que orientan la implementación de innovaciones preventivas en empresas. Desde la década de 1990, la Producción más Limpia ha sido promovida a nivel mundial, como una visión novedosa para involucrar la actividad empresarial a los programas y proyectos relacionados con la conservación y protección ambiental. Por medio de su enfoque preventivo, distinto a los esquemas tradicionales de comando y control, la Producción más Limpia busca implementar proyectos que generen beneficios económicos, tangibles para las empresas y que a la vez lleven a beneficios ambientales. Este modelo gana-gana parte del concepto de que la contaminación ambiental generada por las actividades empresariales es el resultado de ineficiencias en sus procesos productivos. En la medida en que la empresa logre optimizar la eficiencia de sus procesos y productos, automáticamente reduce sus niveles de afectación al medio ambiente.
