Proyectos arquitectónicos habitacionales José Manuel Falcón Meraz,2012 Este libro interactivo consta de cuatro partes. Primero se abordan conceptos fundamentales para el estudiante como el significado de la vivienda a través del tiempo, su cometido y su valor en las diferentes culturas. Tras esa sensibilización teórica, se presenta la etapa de análisis -en el capítulo 2-, donde se muestran al lector los factores a evaluar, exhaustivamente, antes de desarrollar los primeros pasos: desde el clima y la topografía, hasta las medidas adecuadas a los diferentes locales de la vivienda y la relación entre ellos, expresada en un diagrama. Con estas bases, en la tercera sección se trata el diseño a detalle. Se aborda un proceso creativo iterativo que parte de una idea maestra y define la función y la forma de manera integral, logrando la articulación de la planta -área por área- a la par de la configuración plástica espacial. En esta sección, además, se tratan temas como el uso de estrategias bioclimáticas y el interiorismo. Si bien, se sabe que son áreas de especialidad muy complejas, aun así se busca mostrar sus bases -y su importancia- al novel diseñador. En la última parte del eBook se expone la parte técnica de la arquitectura habitacional. Se ofrece un acercamiento a los criterios estructurales, a sus elementos y materiales, para que el estudiante incremente su potencial en este campo a través del conocimiento y la intuición. Complementariamente se tratan las diferentes instalaciones necesarias para la habitabilidad de la vivienda. Estos aspectos son parte integral de la arquitectura habitacional.
