Gods of the Upper Air Charles King, 2020-07-14 NEW YORK TIMES BESTSELLER 2020 Anisfield-Wolf Book Award Winner Finalist for the National Book Critics Circle Award From an award-winning historian comes a dazzling history of the birth of cultural anthropology and the adventurous scientists who pioneered it—a sweeping chronicle of discovery and the fascinating origin story of our multicultural world. A century ago, everyone knew that people were fated by their race, sex, and nationality to be more or less intelligent, nurturing, or warlike. But Columbia University professor Franz Boas looked at the data and decided everyone was wrong. Racial categories, he insisted, were biological fictions. Cultures did not come in neat packages labeled primitive or advanced. What counted as a family, a good meal, or even common sense was a product of history and circumstance, not of nature. In *Gods of the Upper Air*, a masterful narrative history of radical ideas and passionate lives, Charles King shows how these intuitions led to a fundamental reimagining of human diversity. Boas's students were some of the century's most colorful figures and unsung visionaries: Margaret Mead, the outspoken field researcher whose *Coming of Age in Samoa* is among the most widely read works of social science of all time; Ruth Benedict, the great love of Mead's life, whose research shaped post-Second World War Japan; Ella Deloria, the Dakota Sioux activist who preserved the traditions of Native Americans on the Great Plains; and Zora Neale Hurston, whose studies under Boas fed directly into her now classic novel, *Their Eyes Were Watching God*. Together, they mapped civilizations from the American South to the South Pacific and from Caribbean islands to Manhattan's city streets, and unearthed an essential fact buried by centuries of prejudice: that humanity is an undivided whole. Their revolutionary findings would go on to inspire the fluid conceptions of identity we know today. Rich in drama, conflict, friendship, and love, *Gods of the Upper Air* is a brilliant and groundbreaking history of American progress and the opening of the modern mind.

*The Unnaming of Kroeber Hall* Andrew Garrett,2023-12-12 A critical examination of the complex legacies of early Californian anthropology and linguistics for twenty-first-century communities. In January 2021, at a time when many institutions were reevaluating fraught histories, the University of California removed anthropologist and linguist Alfred Kroeber's name from a building on its Berkeley campus. Critics accused Kroeber of racist and dehumanizing practices that harmed Indigenous people; university leaders repudiated his values. In *The Unnaming of Kroeber Hall*, Andrew Garrett examines Kroeber's work in the early twentieth century and his legacy today, asking how a vigorous opponent of racism and advocate for Indigenous rights in his own era became a symbol of his university's failed relationships with Native communities. Garrett argues that Kroeber's most important work has been overlooked: his collaborations with Indigenous people throughout California to record their languages and stories. *The Unnaming of Kroeber Hall* offers new perspectives on the early practice of anthropology and linguistics and on its significance today and in the future. Kroeber's documentation was broader and more collaborative and multifaceted than is usually recognized. As a result, the records Indigenous people created while working with him are relevant throughout California as communities revive languages, names, songs, and stories. Garrett asks readers to consider these legacies, arguing that the University of California chose to reject critical self-examination when it unnamed Kroeber Hall.

**World Education Patterns in the Global North** C. C. Wolhuter,2022-09-01 *World Education Patterns in the Global North* surveys the educational responses and new educational landscapes being developed as a consequence of powerful global forces demanding change within the Global North's educational contexts, including North America, Central and South-East Europe, and East Asia.

*Before Crips* John C. Quicker,Akil S. Batani-Khalfani,2022-07-15 This book describes the rise, features, and behavior of street groups in mid-century South Los Angeles. It charts the influence of social factors on the changing culture of neighborhood street sets, describing their behaviors, customs, and values, as remembered by interviewees who were members of these groups in the 1950s and 1960s--

**Disinformation in the Global South** Herman Wasserman,Dani Madrid-Morales,2022-04-19 A timely and incisive

exploration of disinformation and its impact in the Global South In *Disinformation in the Global South*, media and communications scholars Herman Wasserman and Dani Madrid-Morales deliver a unique and geographically diverse collection of perspectives on the phenomenon of disinformation as it manifests in the Global South. In many parts of the Global South, coordinated political disinformation campaigns, rumor, and propaganda have long been a part of the social fabric, even before disinformation has become an area of scholarship in the Global North. The way disinformation manifests in this region, and responses to it, can therefore be highly instructive for readers around the world. Through case studies and comparative analyses, the book explores the impact of disinformation in Africa, Latin America, the Arab World and Asia. The chapters in this book discuss the similarities and differences of disinformation in different regions and provide a broad thematic overview of the phenomenon as it manifests across the Global South. After analyzing core concepts, theories and histories from Southern perspectives, contributors explore the experiences of media users and the responses to disinformation by various social actors drawing on examples from a dozen countries. *Disinformation in the Global South* also includes: A thorough introduction to Southern perspectives on national histories, theories of disinformation, and research methods in disinformation studies Global case studies of cultures of disinformation, including ethnographic insights into how audiences engage with disinformation Comprehensive explorations of responses to online and offline disinformation, including discussions of news literacy and the management of disinformation A valuable resource for scholars of disinformation everywhere, as well as senior undergraduate and graduate students in courses covering transnational or global perspectives to communication studies, *Disinformation in the Global South* is also an ideal reference for anyone studying or working in media or journalism.

Get Involved! Kim Williams-Pulfer, 2024-06-14 Philanthropy is commonly depicted as a universal practice and is either valued for supporting community transformation or critiqued for limiting social justice. However, dominant definitions and even popular connotations tend to privilege wealthy Western approaches. Using the Caribbean as a rich site of observance and concentrating on the island nation-state of The Bahamas, *Get Involved!* uncovers the hidden and under-documented activities of “philanthropy from below,” revealing a broader conception of philanthropy and civil society, especially within Black and other historically marginalized populations. Kim Williams-Pulfer draws on narrative analysis from enslavement to the current post-post-colonial moment, depicting the repertoires and practices of primarily Afro-Bahamians through the stories emerging from history (including the transnational observations of Zora Neale Hurston, social movements, and political and social institution building), the arts (from Junkanoo, literature, and visual practices), to the lived experiences of contemporary civil society leaders. *Get Involved!* shows the long history and continued significance of civil society and philanthropic engagement in The Bahamas, the circum-Caribbean, and the wider African Diaspora. Junkanoo is the national cultural festival of The Bahamas. It fosters a sense of community pride, identity, companionship, spirituality and unity. Watch

**Population Trends in New Jersey** James W. Hughes, David Listokin, 2022-01-14 To fully understand New Jersey in the 2020s and beyond, it is crucial to understand its ever-changing population. This book examines the twenty-first century demographic trends that are reshaping the state now and will continue to do so in the future. But trend analysis requires a deep historical context. Present-day New Jersey is the result of a long demographic and economic journey that has taken place over centuries, constantly influenced by national and global forces. This book provides a detailed examination of this journey. The result is present-day New Jersey. The authors also highlight key trends that will continue to transform the state: domestic migration out of the state and immigration into it; increasing diversity; slower overall population growth; contracting fertility; the household revolution and changing living arrangements; generational disruptions; and suburbanization versus re-urbanization. All of these factors help place in context the result of the 2020 decennial U.S. Census. While the book focuses on New Jersey, the Garden State is a template of demographic, economic, social, and other forces characterizing the United States in the twenty-first century.

Engaging Anthropological Theory Mark Moberg, 2024-09-30 The updated third edition of this book critically reconsiders the history of anthropological theory. Covering key concepts and theorists in a lively style, Engaging Anthropological Theory examines the historical context of anthropological ideas and the contested nature of anthropology itself. The book illustrates how anthropological ideas about human diversity are rooted in historical conditions, including the West's relationship with colonized societies and the politics of scholarly inquiry itself. Exploring anthropological ideas in context helps students understand how they evolved and how they relate to society and history. This new edition pays close attention to non-canonical figures and scholars of color whose contributions are too often bypassed in disciplinary histories. Students and instructors will also appreciate the open-ended review questions for each chapter that stimulate critical thought and discussion. Extensively illustrated throughout, this engaging text moves away from the dry recitation of past viewpoints in anthropology and shows their continued relevance to modern life.

**The Battle for Birth Control** Jessica L. Furgerson, 2022-03-29 The Battle for Birth Control delves into the complex rhetorical history of the American birth control movement in its formative years. In just four decades, advocates, under the strategic guidance of Margaret Sanger, transitioned the fight for contraception from fringe radical movement to a respectable mainstream cause endorsed by powerful professionals and politicians alike. Eschewing their early ideological commitments to obtain widespread acceptance, birth controllers adopted a strategy of political accommodation characterized by deferential rhetoric and careful posturing. This strategy secured significant victories for the movement but at what cost? Informed by a deep commitment to reproductive justice, The Battle for Birth Control traces the duplicity of the movement's early rhetoric and argues that their accommodationist strategy yielded increased contraceptive access solely because of their

willingness to endorse the neoliberal regime of reproductive control largely responsible for the current threats to reproductive autonomy in the 21st century.

**Being Human and a Buddha Too** Anne Klein, 2023-08-15 In writing that sparkles and inspires, Anne Klein (Lama Rigzin Drolma) shows us how to liberate our buddha nature to be both human and a buddha too. This first volume in the House of Adzom series centers on Longchenpa's seven trainings in bodhicitta, our awakened mind, the ultimate purpose of our practice and training. Anne Klein's original composition masterfully weaves in Adzom Paylo Rinpoche's commentary and Jigme Lingpa's five pith practices and commentary on the trainings, in keeping with Longchenpa's skillful integration of sutra, tantra, and Dzogchen, to resolve our most challenging questions about what awakening involves and how it relates to the truth of our human situation right now. As foundational teachings for Dzogchen practitioners, the seven trainings are framed as contemplations on impermanence, the adventitiousness of happiness and its short duration, the multiple causes of death, the meaninglessness of our worldly activities, reliance on the Buddha's good qualities, the teacher's pith instructions, and, ultimately, nonconceptual meditation on bliss and emptiness, clarity and emptiness, and reality itself.

**The Political Uses of Literature** Benjamin Kohlmann, Ivana Perica, 2024-01-11 Drawing on a global history of politicized writing, this book explores literature's utility as a mode of activism and aesthetic engagement with the political challenges of the current moment. The question of literature's 'uses' has recently become a key topic of academic and public debate. Paradoxically, however, these conversations often tend to bypass the rich history of engagements with literature's distinctly political uses that form such a powerful current of 20th- and 21st-century artistic production and critical-theoretical reflection. The Political Uses of Literature reopens discussion of literature's political and activist genealogies along several interrelated lines: As a foundational moment, it draws attention to the important body of interwar politicized literature and to debates about literature's ability to intervene in social reality. It then traces the mobilization of related conversations and artistic practices across several historical conjunctures, most notably the committed literature of the 1960s and our own present. In mapping out these geographically and artistically diverse traditions – including case studies from the Americas, Europe, Africa, India and Russia – contributors advance critical discussions in the field, making questions pertaining to politicized art newly compelling to a broader and more diverse readership. Most importantly, this volume insists on the need to think about literature's political uses today – at a time when it has become increasingly difficult to imagine any kind of political efficacy for art, even as the need to do so is growing more and more acute. Literature may not proffer easy answers to our political problems, but as this collection suggests, the writing of the 20th century holds out aesthetic resources for a renewed engagement with the dilemmas that face us now.

**The Dark Past** William M. Wiecek, 2024 The Dark Past offers a historical overview and interpretive guide to all the major cases decided by US Supreme Court that have affected the freedom and rights of Black Americans since 1800. It lends

desinformação sobre os procedimentos cabíveis nos casos de crimes da palavra praticados on-line incentivam as falas e práticas racistas, xenofóbicas, homofóbicas, misóginas e transfóbicas, e o quanto esse discurso, travestido de liberdade de expressão na era da internet e dos discursos da ONU, é na verdade um velho conhecido.

*Explanatory Models, Unit Standards, and Personalized Learning in Educational Measurement* William P. Fisher Jr., Paula J. Massengill, 2022-10-15 The papers by Jack Stenner included in this book document the technical details of an art and science of measurement that creates new entrepreneurial business opportunities. Jack brought theory, instruments, and data together in ways that are applicable not only in the context of a given test of reading or mathematics ability, but which more importantly catalyzed literacy and numeracy capital in new fungible expressions. Though Jack did not reflect in writing on the inferential, constructive processes in which he engaged, much can be learned by reviewing his work with his accomplishments in mind. A Foreword by Stenner's colleague and co-author on multiple works, William P. Fisher, Jr., provides key clues concerning (a) how Jack's understanding of measurement and its values aligns with social and historical studies of science and technology, and (b) how recent developments in collaborations of psychometricians and metrologists are building on and expanding Jack's accomplishments. This is an open access book.
