British Museum

StarGuides Plus Andre Heck, 2013-11-11 *StarGuides Plus* represents the most comprehensive and accurately validated collection of practical data on organizations involved in astronomy, related space sciences and other related fields. This invaluable reference source (and its companion volume, *StarBriefs Plus*) should be on the reference shelf of every library, organization or individual with any interest in these areas. The coverage includes relevant universities, scientific committees, institutions, associations, societies, agencies, companies, bibliographic services, data centers, museums, dealers, distributors, funding organizations, journals, manufacturers, meteorological services, national norms & standard institutes, parent associations & societies, publishers, software producers & distributors, and so on. Besides astronomy and associated space sciences, related fields such as aeronautics, aeronomy, astronautics, atmospheric sciences, chemistry, communications, computer sciences, data processing, education, electronics, engineering, energetics, environment, geodesy, geophysics, information handling, management, mathematics, meteorology, optics, physics, remote sensing, and so on, are also covered where appropriate. After some thirty years in continuous compilation, verification and updating, *StarGuides Plus* currently gathers together some 6,000 entries from 100 countries. The information is presented in a clear, uncluttered manner for direct and easy use.

Atti Della Fondazione Giorgio Ronchi Anno LXVI N.1 ,

Rivista marittima ,

Journal of the Italian Astronomical Society Società astronomica italiana, 1927

StarBriefs 2001 , 2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on. Yet nobody would wonder at someone taking a short walk every day - after twenty five years that person would have covered a surprisingly long distance. This is exactly the story behind this list, which appeared first as a few pages within the directory *StarGuides* (or whatever name it had at that time) and as a distinct sister publication since 1990. The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations, acronyms, contractions and symbols which they might encounter in all aspects of the vast range of their professional activities, including traveling. Perhaps it is a bit paradoxical, but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline, they will probably encounter more difficulties when dealing with adjacent

fields. It is for this purpose that this dictionary might be most often used. Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions.

Guida alla Dea Madre in Italia Andrea Romanazzi,2014-09-19 La penisola italiana ha accolto nei millenni numerosi riti, tradizioni e culti incentrati sulla Divinità Femminile, dei quali restano ampie e talora vistose tracce. Ed è proprio viaggiando alla loro ricerca, fraterra, acqua, aria e fuoco, che l'autore ha scoperto una serie diemozionanti itinerari in cui rivivere gli arcaici sapori della Grande Madre. La prefazione è di Syusy Blady, conduttrice e regista di *Turisti / Misteri per caso*.

All'interno, illustrazioni in b/n e 16 mappe con percorsi suggeriti per visitare i luoghi della Dea in Italia.

L'Esposizione italiana del 1884 in Torino ,1884

Gamma-Ray Bursts in the Afterglow Era Enrico Costa,Filippo Frontera,J. HJORTH (Ed),2001-12-14 The information received from BeppoSAX, Chandra and other instruments in the last two years has more than doubled the number of samples of Gamma-Ray Bursts localized and followed up for afterglow search. This has also increased the interest of astronomers in GRBs. This book reviews the research of the last two years and covers the global properties of GRBs, GRB afterglows, GRB host galaxies, cosmology using GRBs, and theories for GRBs and their afterglows. Theoretical and observational aspects are presented as well as tools for the analysis of the data.

StarBriefs Plus Andre Heck,2004-04-30 With about 200,000 entries, StarBriefs Plus represents the most comprehensive and accurately validated collection of abbreviations, acronyms, contractions and symbols within astronomy, related space sciences and other related fields. As such, this invaluable reference source (and its companion volume, StarGuides Plus) should be on the reference shelf of every library, organization or individual with any interest in these areas. Besides astronomy and associated space sciences, related fields such as aeronautics, aeronomy, astronautics, atmospheric sciences, chemistry, communications, computer sciences, data processing, education, electronics, engineering, energetics, environment, geodesy, geophysics, information handling, management, mathematics, meteorology, optics, physics, remote sensing, and so on, are also covered when justified. Terms in common use and/or of general interest have also been included where appropriate.

Global Change and Protected Areas Guido Visconti, Martin Beniston, Emilio D. Iannorelli, Diego Barba, 2006-04-11 High mountains can be considered as particularly appropriate environments to detect effects of climate change on natural biocoenoses in a global scale for the following reasons: Firstly, ecosystems at the temperature limits of plant life are generally thought to be especially sensitive to climate change [1][2][3]. An already ongoing upward shift of vascular plants at high summits in the Alps, determined by the Austrian IGBP-research [4][5][6][7][8], is most likely a response to the atmospheric warming since the 19th century. Secondly, high mountains still comprise the most natural ecosystems in many countries, being largely untouched by human settlements and agricultural influences. Therefore, climatic effects on ecosystems can be studied without masking effects from human land use. Thirdly, high mountain ranges are present in virtually every major zoniobiome of the earth. The research initiative GLORIA aims to establish an urgently needed global monitoring network, by using high mountain ecosystems as sensitive indicators, as required in the "IGBP-Mountain Workplan" [9]. Moreover, a deeper understanding of assemblage mechanisms and assemblage processes in vegetation patterns as a contribution to ecological theory can be expected. This paper gives a short general overview about GLORIA and a first outline about the concept, method, and some few results of the "Multi Summit-Approach", one of the basic intentions within the proposed network. It aims to encourage the involvement of high mountain researchers and research co-ordinators in a detailed discussion of the proposed research activities and in a co-operation within the planned global monitoring network.

Atti del XLIV Congresso nazionale SISFA : Firenze, 17-20 settembre 2024 Mauro Gargano, Antonella Gasperini, Samuele Straulino, 2025-07-14 Atti del XLIV Congresso Nazionale SISFA, tenutosi a Firenze nel settembre 2024, con la partecipazione di circa 90 studiosi italiani e internazionali. Il congresso ha indagato la storia della fisica e dell'astronomia, l'epistemologia, l'educazione scientifica e la conservazione del patrimonio storico e ha presentato quattro sessioni speciali: Dall'informazione all'intelligenza artificiale, tracciando l'evoluzione della comunicazione, da Marconi alla cibernetica e all'IA; Dalla statistica quantistica alla fisica della materia condensata: celebrando un secolo di statistica di Bose-Einstein e della sua influenza sulla fisica moderna; 1924-2024: Edwin Hubble e l'evoluzione della cosmologia moderna, ripercorrendo la scoperta di Hubble e il suo impatto sull'astrofisica; 100 anni dalla nascita dell'Università di Firenze e In memoria di Giuseppe Occhialini, onorando il centenario dell'Università e i contributi di Occhialini alla fisica italiana. Questo volume raccoglie studi accurati che esplorano l'evoluzione del pensiero scientifico e la storia delle scienze.
