Historia natural. Libros XII-XVI Plinio el Viejo,2016-08-05 Por su amor a la naturaleza, Plinio conecta fácilmente con la sensibilidad del lector actual. Los libros XII-XVI de la Historia natural tratan de botánica -que, junto con la zoología del volumen anterior, constituye el verdadero núcleo de toda la obra-. Plinio orienta su tratamiento hacia la medicina y los

remedios salutíferos, como es propio de la tendencia práctica dominante en las producciones científicas de los romanos. Además, a Plinio le interesa destacar en qué momento se introduce el cultivo de los árboles en Roma, especialmente el de los frutales; cuándo comienzan a llegar productos de lujo importados de tierras lejanas, como el azúcar o la pimienta; cuál es la utilidad de los árboles en la alimentación o en diferentes industrias, desde la perfumería hasta la elaboración del papiro para la escritura, y qué función institucional desempeñan en la vida social, política y religiosa de Roma. El punto de vista que adopta Plinio es el del naturalista capaz de citar todas las variedades conocidas de cada especie, pero también el de un espíritu inquieto atento a subrayar todos los detalles culturales, históricos e incluso fabulosos que acompañan la llegada del árbol a Roma.

Historia de las plantas Teofrasto, 2016-08-05 Teofrasto, director del Liceo después de Aristóteles, compartió con éste el interés por los diversos reinos naturales, y nos ha legado la Historia de las plantas, que le ha valido la consideración de Padre de la Botánica. Nacido en Éreso (en la isla de Lesbos), Teofrasto acudió a Atenas para estudiar filosofía, primero con Platón, en la Academia, y después con Aristóteles. A la muerte de éste quedó como escolarca del Liceo y dirigió la escuela con gran éxito durante muchos años. Compartía con su maestro el interés por el estudio de la naturaleza. Escribió muchos tratados, pero sólo nos han llegado su Metafísica, dos tratados de botánica (la Historia de las plantas y Sobre los orígenes de las plantas) y sus Carácteres (en esta misma colección). La Historia de las plantas es una muestra del saber y la curiosidad enciclopédicos de Teofrasto. Se trata de un estudio sobre la flora mediterránea con multitud de datos, y presenta una interesante organización de su repertorio botánico; la obra era tan innovadora en su tratamiento sistemático y en la riqueza de su contenido que se considera a Teofrasto el padre de la Botánica.

El cultivo del pistacho - 2^a edición COUCEIRO LÓPEZ, JOSÉ FRANCISCO,2017-01-01 La nueva edición de El Cultivo del Pistacho pone de manifiesto el gran interés que este cultivo está suscitando en España y que podría relacionarse con la confianza que muchos agricultores han ido adquiriendo en esta alternativa con el paso de los años, con los recientes estudios elaborados por prestigiosas universidades de diferentes países y que relacionan el consumo de este fruto seco con los beneficios para la salud, aspecto que indudablemente incrementa todavía más el valor de la dieta mediterránea y sobre todo con sus excelentes expectativas de futuro a medio y largo plazo. Los motivos por los que los autores decidieron actualizar esta obra siguen siendo los mismos que les impulsaron a su elaboración, es decir, las innumerables peticiones de información por parte de agricultores, comercializadores, viveristas, técnicos y estudiantes en su afán de conocer de primera mano y con mayor detalle este frutal. Algunas de las novedades que ofrece, entre otras, esta edición, conciernen al manejo del cultivo en todas sus fases, a la nueva distribución de machos, a los productos específicos autorizados para el cultivo en los tratamientos fitosanitarios, a las conclusiones del último ensayo de regadío relacionadas con el comportamiento de los portainjertos y a un reajuste de los datos en el capítulo de los costes. En definitiva, el lector podrá comprobar la completa y exhaustiva visión que del pistachero se hace en todo el planeta, la profunda y detallada descripción de cada fase de cultivo a fin de llevar a buen término una plantación rentable en España, la teórica delimitación de las áreas geográficas más favorables para su desarrollo a medio y largo plazo en el territorio español, sus necesidades edafoclimáticas, comercialización, posibles utilidades, beneficios de su consumo, fenología, portainjertos, cultivares o variedades aconsejados para cada zona, producciones esperadas, poda, riego, las etapas por las que pasa el procesado del fruto y un código de buenas prácticas para la obtención de un pistacho de alta calidad.
