Michael Hoelscher

Cultivo en invernadero ALPI, A., TOGNONI, F., 1991-01-01 Esta obra, en su tercera edición, ampliada y puesta al día, trata de ofrecer, de forma clara y concisa, los conocimientos básicos sobre el cultivo forzado, cultivo protegido o cultivo en invernadero. Contiene los temas básicos sobre la construcción de túneles, invernaderos y otros tipos de protecciones, así como sobre los materiales con los que éstos se realizan. Incluye seguidamente conocimientos básicos y técnicas aplicadas sobre los factores ambientales en el interior de los invernaderos, el crecimiento y desarrollo de las plantas y las técnicas culturales actuales. Se ha incluido además un interesante capítulo sobre la utilización de la informática en la tecnología de los cultivos protegidos. Todo ello hace que esta obra sea de gran utilidad para especialistas, técnicos y productores interesados en este área, de enorme importancia y actualmente en expansión creciente.

Guía completa del cultivo de las fresas P. G. Bianchi, 2018-05-25 Muy apreciada por los gourmets, fácil de cultivar y rentable, la fresa puede seducir a todos aquellos que deseen diversificar su producción a mayor o menor escala. Debemos conocer las exigencias de este fruto frágil, proporcionarle el suelo más adecuado, un riego que se corresponda con sus necesidades y una buena protección contra la intemperie, las enfermedades y los insectos, con el fin de que maduren en las condiciones óptimas. Todas estas cuestiones se plantean claramente en esta obra, que cataloga las distintas variedades de fresas adaptables a nuestro clima. Dos capítulos, uno dedicado al cultivo biológico y otro a la reglamentación relativa a la calidad, tamaño y embalaje de este fruto con objeto de su comercialización, ofrecen un valioso complemento de informaciones y convierten esta obra en una guía completa sobre este tema.

El Cultivo Protegido en Clima Mediterráneo Food and Agriculture Organization of the United Nations, 2002-11-30 La técnica de los cultivos protegidos se adoptó rápidamente en los países del Mediterráneo, especialmente desde que se fabricaron telas de polietileno para cubrir las estructuras que los contienen. En comparación con los países situados más al norte, los países del Mediterráneo tienen un invierno más templado, que permite ahorrar energía para la calefacción. Inicialmente, los cultivos protegidos se destinaban mayormente a asegurar la producción vegetal durante los meses

invernales, pero la técnica de protección no tardó en ser utilizada para obtener cosechas durante todo el año. Este manual ofrece informaciones sobre la importancia de los cultivos protegidos, y descripciones de las distintas tecnologías y materiales usados para manejar los cultivos en función de las condiciones climáticas específicas de la zona del Mediterráneo.

Perspectivas interdisciplinarias Hernández Herrera, Claudia Alejandra, 2025-02-01 La creciente complejidad de los problemas sociales, económicos y científicos exige un acercamiento más integrador en cuanto a su solución. Este libro propone la interdisciplinariedad como una forma de abordar estos problemas integrando conocimientos, teorías y métodos de varias disciplinas no solo porque facilita la creatividad y la innovación sino también porque generan respuestas más completas e integradas en sus impactos en la sociedad. En los ocho capítulos incluidos, el lector podrá encontrar un recorrido por temas interesantes y relevantes en el momento en el que nos encontramos, como: 1. El emprendimiento femenino donde se evidencian los retos de las mujeres al afrontar el liderazgo de sus propias empresas. 2. Las percepciones de género en adolescentes donde expresamente se estudian los estereotipos persistentes en la ciencia y el trabajo, que atan a las mujeres y les impiden su desarrollo y que son generadores de violencia. 3. El trabajo de las mujeres en las zonas rurales donde se consideran como una pieza importante para la economía y alimentación de la familia, pero que son injustamente invisibilizadas y no reconocidas. 4. La gestión de riesgos del conocimiento en las organizaciones latinoamericanas, una revisión de la literatura, que alerta sobre los problemas a los que se enfrentan las estructuras por el manejo de información que pueden llegar a vulnerar la existencia de las entidades. 5. La integración hacia atrás para la competitividad de las MiPyMEs en el sector alimentario. 6. Un proceso para iniciar la sostenibilidad de las MiPyMEs en su urgencia por adoptar prácticas sostenibles frente a los desafíos ambientales, sociales y económicos. 7. El análisis de riesgos en las áreas de producción

mediante el método William T. Fine.8. Un modelo causal para la rehabilitación de consumidores donde no sólo se intenta la abstinencia en el uso de sustancias sino el bienestar de la persona. Este libro, es el resultado de las investigaciones financiadas por el Instituto Politécnico Nacional. A su vez, intenta servir a investigadores, académicos, estudiantes o tomadores de decisiones como referencia. A través de sus páginas se podrá descubrir el potencial de la interdisciplinariedad como forma de poner en relación los cuerpos de conocimiento que están disponibles para ofrecer respuestas integradas.

Historia, trabajo y territorio. El conflicto capital-vida en los campos de fresas de Huelva Alicia Reigada, 2022-07-24 El cultivo de la fresa en Huelva constituye un ejemplo paradigmático del modelo de agricultura industrial, sustentado en el uso intensivo de capital, trabajo y recursos naturales. Este libro se adentra en la historia social de este cultivo y a través de ella recupera la experiencia y la memoria colectiva de sus protagonistas. Mientras que la primera parte recorre la formación y la evolución de la agricultura intensiva onubense —guiada por el objetivo de convertir Andalucía en la California de Europa—, la segunda se centra en el sistema de contratación en origen, que, basándose en el reemplazo continuo de la fuerza de trabajo, está considerado el modelo ideal para lograr una migración ordenada. A partir de un estudio etnográfico e histórico, apoyado en una perspectiva feminista, este análisis ayuda a comprender la complejidad de la realidad social que hay detrás de las fresas que consumimos, y a conocer la diversidad de procesos y agentes sociales que articulan la contradicción entre el capital y la vida en este enclave agrícola. Los conflictos que han surgido recientemente en los campos de Huelva ponen de manifiesto la oportunidad de esta obra, pues ofrece un marco sociohistórico útil para interpretar el nuevo escenario que se abre.

Control biológico de insectos Clara I. Nicholls, 2008 Control biológico de insectos: un enfoque agroecológico muestra los

puntos más relevantes del control biológico de plagas y las formas en que la biodiversidad puede contribuir al diseño de agroecosistemas estables. El libro brinda bases teóricas, metodológicas y prácticas para manejar las poblaciones de insectos, describe los principales enemigos naturales y microorganismos utilizados en el control biológico de agroecosistemas y ofrece una estrategia de conservación mediante el manejo de la biodiversidad. La obra es una herramienta eficaz para contrarrestar los desequilibrios ocasionados por la utilización desmedida de pesticidas (brotes recurrentes de plagas y enfermedades en los cultivos, salinización y erosión del suelo, contaminación de aguas) y afrontar los desafíos de la agricultura del siglo XXI. La cuestión agraria en la Historia de Andalucía. Nuevas perspectivas Manuel González de Molina ,2014-05-26 Este trabajo reúne los textos de cinco investigadores - Manuel González de Molina, Ricardo Robledo, José Manuel Naredo, Manuel Delgado Cabeza y Gloria Guzmán- que contribuyen a derribar los distintos mitos historiográficos y económicos que durante décadas han servido para trazar la imagen de la cuestión agraria en Andalucía. 'La cuestión agraria en la historia de Andalucía', es la sexta entrega de la Colección Cuadernos de Andalucía en la Historia Contemporánea del Centro de Estudios Andaluces. Coordinado por el catedrático de Historia Contemporánea de la Universidad Pablo de Olavide, Manuel González de Molina, los trabajos que aparecen recogidos en el monográfico explican las similitudes, las diferencias y la actualidad del viejo lema campesino: "La tierra para el que la trabaja". Los investigadores que participan en esta obra colectiva derriban los mitos que han servido para transmitir una imagen inmovilista del tema. Esta obra es un texto de consulta obligada que instruye acerca del pasado, el presente y el futuro de la desequilibrada distribución de la tierra en Andalucía y de sus posibles alternativas.
