100 Best Quotes from Children's Books Susan Gabrielle, 2012-07-30 ABOUT THE BOOK Storytelling has been around as long as humankind, although the ability to be a storyteller or history-keeper is a special gift not everyone possesses. Generations of our ancestors told oral tales of encounters with nature-with wild animals or with the land itself, real or imagined. Clans gathered around to hear of dreams or of explanations of certain unexplainable phenomena, such as thunder and lightning. These stories were often illustrated by scratching them or painting them onto cave walls or on rocks, and especially those tales of great battles against warring tribes. Some of the stories only existed as verbal histories passed from grandfathers to sons to grandsons. MEET THE AUTHOR Susan Gabrielle has had work published in The Christian Science Monitor, TheBatShat, New Verse News, and local publications, and was a finalist in the Tiny Lights Narrative Essay Contest. Her short story What she should have said was published in the Social Justice issue of the Little Patuxent Review, and she has been nominated for a Pushcart Prize for her poem After 10 years of War. She currently teaches writing and literature classes as a university instructor, and is at work on a nonfiction writers' guide. You can reach her at Susan-Gabrielle.com EXCERPT FROM THE BOOK But while storytelling itself is an ancient art form, the genre of children's literature is relatively new, and children's book publishing only came to prominence beginning in Great Britain in the 18th century. As Allen notes, From the time John Newbery, publisher and bookseller, decided to create books just for children in 18th-century England until the end of the 19th century, when English industry produced children's books of the highest quality, the body of children's literature that became available from England earned a growing respect throughout the literary world. Before that time, children were treated as miniature adults, useful only insofar as their ability to bring income to the home. Most children up to the 1800s worked on the family farm, so there was little free time for play, and since many children did not attend school, they could not read. The family may have owned a Bible, but it most likely would have been read to them by the father, perhaps after dinner. **Ironies Leaders Navigate** Schuyler Totman,2014-09-15 Leaders constantly rely upon power. In fact, leadership and power have so much in common that their definitions are often functionally identical. Every act of leadership is an act of power. Hence, the better we understand power, the better we understand leadership. What, then, are the consequences if, as scholars argue, different people understand power differently and often fundamentally misunderstand power? One consequence turns out to be the emergence of a number of ironies. Another consequence is the opportunity to understand leadership settings better through a careful, redeeming, synergistic look at power. To that end, this book first presents roughly sixty studied, power-related dynamics, and then takes a closer look at how these dynamics clarify leadership settings. Ultimately, this study seeks a better understanding of a particular leadership setting--the local church. Challenges distinct to this setting are explored in marked sections, while the book as a whole offers useful lenses through which to assess the challenges all leaders navigate.

Citizenship Education in a Divided Society Elizabeth Anderson Worden,2022-12-30 This book examines the possibilities and realities of promoting citizenship, peace, and reconciliation through schooling in divided and post conflict societies. With specific attention to the case of Northern Ireland and the Local and Global Citizenship (LGC) initiative, the book investigates the faltering progress to develop and teach school curricula aimed at promoting citizenship as well as peace, tolerance, and mutual understanding. Following an overview of the scholarship on citizenship education, the author provides a broad social and political historical context within which to understand the educational reforms and changes that have taken place in Northern Ireland, highlighting various education initiatives of the 1970s, 1980s, and 1990s that sought to foster understanding of the other and promote reconciliation. The book's focus then shifts to the implementation of LGC, which began in 2007. Despite initially strong political support and a considerable investment in terms of financial and human resources, LGC has had limited impact. The book analyzes the obstacles impeding its success, which include marginalization within the curriculum and competing conceptions of the purpose of education. A concluding chapter reflects upon what we can learn from LGC's implementation and highlights innovative recent initiatives to bring the young people of Northern Ireland together. This book will appeal to scholars and students of education studies with interests in citizenship education, peace studies, educational policy, and curricula and practice.

**The Watcher in the Pine** Rebecca Pawel,2006-02-01 The third Carlos Tejada investigation Spain, 1940: Potes, a remote northern mountain village, is Carlos Tejada's first independent Guardia Civil command. He soon discovers that this "promotion" is a mixed blessing. The villagers are unwelcoming. He and his pregnant wife, Elena, have no place to live but the jail, and his own men seem strangely hostile. Is it just their suspicion of his wife's Republican sympathies? Or is there

more going on in the beautiful but bleak area, recently devastated by the civil war? Tejada discovers that there may, indeed, be a new outbreak of that war with Potes as its epicenter. And he must find a way to reconcile his love for his wife with his duty.
